ROOF STANDARDS

Russell T. Gray, advertising agency, Peoples Life Bldg., Chicago, Ill., has issued a thirty-two page book for the Federal Cement Tile Company, containing, besides complete general roof tile specifications and specific specifications covering the various types of Federal Cement Tile, twenty-six pages of detail drawings showing the application of pre-cast reinforced concrete slabs to all types of roof construction. There is also a page on grandstand seat deck construction. Copies will be sent on request (without charge) to the Federal Cement Tile Co., 608 S-Dearborn street, Chicago, Ill.

TRACTOR MERGER INCORPORATED

Articles of Incorporation for the Caterpillar Tractor Company, a consolidation of the Holt Manufacturing Company of Stockton and the C. L. Best Tractor Company of San Leandro, have been filed in the office of the Secretary of State Frank L. Jordan. The company is capitalized for \$12,000,000. The stock is divided into 500,000 shares of the par value of \$25 each.

As shown by the articles, the amount subscribed is \$225, represented by one share held by each of the nine directors. The directors are Charles R. Wayland, Palo Alto; Vincent I. Compagno, Donald M. Gregory, Blair S. Shuman, Clifton R. Gordon, A. DeMartini and G. Connors, all of San Francisco, and Horace T. Beverly and M. E. Jones of Oakland. San Francisco is given as the headquarters of the concern.

FLOOD CONTROL BILL SIGNED

Governor Friend W. Richardson has signed Senate Bill No. 826, by Senator Thomas Ingram of Grass Valley, appropriating \$250,000 as an emergency deficiency for channel and flood control work on the Sacramento and San Joaquin Rivers. The sum is matched by the federal government. In 1923 the legislature appropriated \$500,000 for this work, but the governor eliminated \$250,000, believing half the amount would be sufficient. However, the federal government appropriated the \$500,000, and it became necessary for the 1925 legislature, in order to keep faith with the government, to make up the \$250,000 deficiency.

STATE IRRIGATION SUPPLY

State Department of Public Works, Division of Water Rights, in recent announcement says: The general situation as regards irrigation supply appears more favorable throughout the northern and central portion of California than at this time last year. In southern California, however, the prospect is not so good. The precipitation has been approximately one-half that of normal, as it was last season, but owing to the depleted ground water caused by pre-ceding dry years the situation as regards irrigation supply is more acute.

ALAMEDA CITY COUNCIL PLANS INNER HARBOR PROJECT

New inner harbor improvements, recommended by a special survey board and which are to be included in a bill to be introduced into Congress by Congressman Albert E. Carter asking for an augmented appropriation from the federal government, was unanimously endorsed by the Alameda city council in a special session.

Although he voted in favor of the improvements, Mayor Frank Otis warned the council that he will strenuously oppose any bonded indebtedness which might be one of the contingencies exacted by the congress in making the appropriation. This statement was made by Mayor Otis following a lengthy discussion of the possibility that the city may have to purchase a 50-foot strip of land along the tidal canal between Park street and San Leandro bay.

Highlights of the improvement program adopted are:

1—Widening of the channel through Goat Island shoal to 800 feet, narrowing to 600 feet at ends of Oakland jetties, and increasing depth to 35 feet.

2—Increasing depth of approach channel to Key Route basin to 35 feet and width to 800 feet.

3—Deepening of channel from outer ends of Oakland jetties to westerly end of Government Island to 33 feet and increasing width to 600 feet.

4—Deepening of channel in tidal canal from Park street bridge to San Leandro bay to 25 feet and increasing width to 275 feet.

5—Acquisition of an additional 200 feet on either side of the tidal canal to facilitate its future deepening to 30 feet.

6—Reconstruction or replacement of Park street, Fruitvale and High street bridges, providing foundations with adequate clearance for navigation.

The discussion centered chiefly around the improving of the tidal canal which is of primary importance to Alameda in all of the contemplated improvements. The council was joined in this discussion by members of the Alameda Chamber of Commerce, the city planning commission and Captain Harry Pond of the United States army engineers.

STREET IMPROVEMENT BILLS ARE SIGNED BY GOVERNOR

Four bills designed to expedite and simplify street improvement proceedings have been signed by Governor Friend W. Richardson. They are senate bills Nos. 497, 498, 499 and 410.

In signing the bills the governor said:

"These bills will permit cities to act more quickly in the matter of street improvement. Under the present law there have been many vexatious delays and street openings have been delayed for years, in one case as long as ten years.

"The bills are in the interest of efficiency and economy. The great growth of many cities of the state has made it absolutely necessary for them to have wider streets and these bills will help in the good work."

HIGHWAY COMMISSION BREAKS "BOTTLE NECK" THROUGH CONTRACT

Further widening of the "Bottle neck" on the Peninsula highway south of San Francisco, reconstruction of pavements and new bridges in Southern California, and grade widening in Contra Costa and Mendocino counties were the projects provided for in eight contracts awarded yesterday by the California Highway Commission.

Funds obligated reached \$915,150.70, the largest single award so far this year. With the exception of a bridge in San Diego County, which will be built with federal aid, all of the work is classed as reconstruction and will be financed with 1925 gasoline tax revenues.

The contracts awarded are as follows:

San Diego County—Reinforced concrete bridge over San Onofre Creek, 300 feet long, 30 feet wide; part of an important line change; awarded to Fluor Construction Company of Los Angeles; bid \$55,216.25; engineer's estimate \$69,835 (County to refund cost of bridge to state).

Orange County—Re-paving San Juan Creek to Gallivan, 5.6 miles with "second story" concrete, 20 feet wide; awarded to John and Bressi, Los Angeles; bid \$160,978.30; engineer's estimate \$186,895.25.

Los Angeles County—Reinforced concrete bridge over the San Gabriel River on the Whittier Boulevard; length 432 feet, roadway width 40 feet; six foot sidewalks on either side; awarded to Charles and F. W. Steffen of San Diego; bid \$92,575.20; engineer's estimate \$116,727.50. Painting four bridges in Los Angeles County, awarded to D. E. Burgess, of Stockton; bid \$7,906.25; engineer's estimate \$11,510.

Santa Barbara County—Widening and repaving of 1.9 miles between Santa Barbara and Ortega Hill; new width of highway 30 feet; awarded to Cornwall Construction Company of Santa Barbara; bid \$64,102; engineer's estimate \$66,612.50.

Contra Costa County—Widening to 30 feet with asphalt macadam, 6.6 miles between San Pablo and El Cerrito; awarded to Kaiser Paving Company of Oakland; bid \$136,498.10; engineer's estimate \$135,057.60.

San Mateo County—Widening from 24 to 40 feet and resurfacing 4.4 miles of the Peninsula Highway between Cypress Lawn Cemetery and San Bruno; awarded to Federal Paving Company of San Francisco; bid \$204,002.50; engineer's estimate \$206,129.50.

Mendocino County—Widening and resurfacing 6.3 miles of the Redwood Highway between Leggett Valley and 2 miles north of Rock Creek; awarded to the Butterfield-Sears Company of San Pedro; bid \$194,772.10; engineer's estimate \$249,056.70.

City of Eureka, Humboldt County, contemplates bond issue for \$1,000,000 to finance municipal water supply project. A preliminary report, covering the proposed improvements, has been submitted by N. B. Ellery, consulting engineer of San Francisco.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

San Francisco capitalists are investigating the possibilities of developing some of the great forest regions of Manchuria, according to Z. K. Baranowski, general manager of the Russian Trading and Industrial Company, of Harbin, China, writing in the current issue of "San Francisco Business," the weekly magazine of the San Francisco Chamber of Commerce. The writer points out the great possibilities which Manchuria offers for the commercial development of lumber. "Manchurian forests will supply the world's demand for pulp and paper products," says Mr. Baranowski, "as they constitute one of the world's few remaining sources of suitable lumber. It is expected that pulp can be produced in Manchurian pulp mills at a cost which will be less than in any other center, due to low labor costs, low cost of materials, combined with easy facilities for transporting to market. The ordinary lumberman considers the equivalent of 60 cents a day expressed in American money as very good wages."

Members of the Fresno County Board of Supervisors have reached an informal decision that competition to draw plans for the buildings to be erected under the proposed county bond issue will be open to all architects in the county. In the event of the passage of the bonds every architect will be asked to submit plans for the buildings whose erection has been approved by the voters. The buildings under discussion in the proposed bond issue are a courthouse annex hospital annex and new county jail.

Governor Richardson has signed two bills in regard to the conduct of building and loan associations. One bill eliminates the present provision authorizing associations to charge a withdrawal fee and the other measure prohibits the present provision that a reserve of more than \$50,000 need not be kept by an association. This bill would require all associations to have at least 25 per cent reserve of the paid-in guarantee stock.

A \$10,000,000 water bond issue proposal has been ordered placed on the ballot for the municipal election, June 2, next, in a resolution adopted by the Los Angeles city council. Of the total proceeds of the issue \$2,000,000 would be used for preliminary work on the Colorado river aqueduct and \$4,500,000 for purchase of lands and development of water resources in Owens Valley.

A. L. Du Fay, 61, architect and resident of Portland, Ore., since 1896, died in that city, May 2, following an extended illness. Mr. Du Fay was born in Louisville, Ky.; December 11, 1864, and completed his education in Rose Polytechnic college, Terre Haute, Ind. He later lived in Los Angeles and then in Portland. A son, Fred K. Du Fay, resides in Berkeley.

San Bernardino County, at recent election, voted bonds of \$450,000 to finance erection of a new court house. The issue was approved by a vote of 7015 in favor and 5721 against.

Prof. C. D. Marx of Stanford university, a member of the special board of Oakland harbor engineers, is in conference with Leroy R. Goodrich, commissioner of public works, preparatory to the government hearing to be held in the United States engineer's office in San Francisco, May 21 on the recommendations for changes in pierhead lines. The recommendations were made by Professor Marx and his two associates, G. B. Hebard of Portland, and Maj. C. T. Leeds of Los Angeles, at the close of their recent visit to Oakland. Since then the city engineer's office has been preparing maps for presentation at the hearing. The three special harbor engineers will probably attend the hearing.

Extension Circular No. 78 from the Alabama Polytechnic Institute, entitled "Dry-rot in Buildings and Stored Construction Materials, and How to Combat It," is off the press. Dry-rot is a serious menace to builders and lumber dealers, particularly in the South and Pacific Northwest. Dr. C. J. Humphrey, Madison, Wis., and Dr. L. E. Miles, Auburn, Alabama, the authors, will forward copy of the bulletin, without charge, on request.

Requesting \$1000 to continue work in drafting a uniform building code for East Bay cities, the uniform building committee has forwarded a communication to the city council stating that work was well under way, and that standard regulations have been adopted by members of the East Bay Builders' exchange. The letter was signed by W. F. Breuer, chairman.

The Heenan System interests have submitted plans to the Oakland City Council for an incinerator costing \$225,000 to handle 400 tons of garbage a day. An alternative plant bid was also submitted for \$420,000. This would have attached a steam plant generating 1500 pounds of steam. The steam could be put on the market, thereby cutting the cost of operating the plant.

Unfilled tonnage of the U. S. Steel corporation declined 416,396 tons in the month ended April 30, according to the month report of the corporation issued May 9. Orders of April 30, aggregated 4,446,568 tons against 4,863,564 on March 31 and 5,284,771 on Feb. 28 of this year. One year ago the corporation reported unfilled orders of 4,298,447 tons.

C. F. Detlefsen has discovered a large gypsum deposit on his foothill ranch, according to word from Gustine, Merced County. The deposit, which is of unknown depth, lies three feet below the surface. Detlefsen is reported to be negotiating with a large coast firm with a view of developing the deposit.

The steamer Canada arrived in Oakland May 6 to discharge 1000 tons of cement from Antwerp for East Bay firms.

Art Iron Works, formerly located at 12 Geary street, announces the removal of its offices to 1753 Union street, Phone West 7561.

TRADE NOTES

The P. B. Yates Company with general offices at Beloit, Wis., and factories at Beloit and Hamilton, Canada, officially opened its San Francisco office, warehouse and factory at 725 Bryant street, May 14th. The company carries a complete line of woodworking machinery and according to B. F. Bader, San Francisco branch manager, is the world's largest manufacturer of such equipment. The San Francisco branch, formerly located in the Monadnock Building, will serve as a supply depot and purchasing department especially for west coast users of woodworking machinery. A complete supply of repair parts for all Yates machines sold in California and tributary territory will be carried. There will be a special San Francisco territory service department in charge of John Stewart, formerly in charge of both test floors at the Yates home factory in Beloit. A machine shop, installed as part of the San Francisco warehouse, will be available for repair and rebuilding jobs, according to Branch Manager Bader.

P. E. O'Hair and Co., wholesale plumbing supply dealers, have moved from 857 Mission street to their own warehouse and offices at 945 Bryant street, between Seventh and Eighth streets, where with greatly improved facilities the company will be able to render efficient service in the matter of plumbing goods. New phone number, Hemlock 4280.

The King-Russell Electrical Company has opened quarters at Third and San Fernando Sts., San Jose. Ted Russell and Leslie King, both of San Jose, are operating the business of retailing electrical fixtures and supplies, in addition to house wiring, electric stoves and ranges.

The Superior Waterproofing & Paint Company, with the principal place of business in San Francisco, has been incorporated. The company has a capital stock of \$25,000. Directors are: H. F. Wiggins, F. S. White and C. O. Greiver.

Atlas Mortar Company will shortly commence erection of a two-story addition at the rear of the present plant at 259 Tenth street, San Francisco. The addition will be of frame construction and will cost approximately \$5000.

The Kratt Clay Products Company has started operations in its new plant at Niles, Alameda County. The company is engaged in the manufacture of hand made mission roofing tile and special clay products.

The Steelform Contracting Co., capitalized at \$350,000, with the principal place of business in San Francisco, has been incorporated. Directors are: C. B. Hopkins, S. W. Greer, G. L. Baraty, Elena A. Hopkins and H. F. Peart.

Frank E. Johns, operating the Visalia Plumbing Company at Visalia, has opened a new shop in Oroquieta, Tulare County. The branch will be managed by Wm. Woods.

W. T. Adams & Son, painting and decorating contractors of Ferndale, have opened a branch office and stock warehouse in the L. L. Bryan Bldg., Fortuna.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

EAST BAY MATERIAL EXHIBIT IS OPENED

To enable architects to study materials and equipment and to permit the prospective builder to see features to be installed in his project in a finished state, the Building Material Exhibit of San Francisco has opened an east bay division at 1410 Madison St., Oakland.

"Our determination to establish an East Bay exhibit was brought about following a survey of the construction activities in the Alameda County district," says L. S. Rodgers, manager of the San Francisco exhibit. "Building activities in the East Bay section, and particularly in Oakland, will continue brisk. Especially is this true of home building."

"Our east bay exhibit covers twelve thousand feet of floor space for the display of building materials and office quarters. On the floor we maintain a competent staff of demonstrators and stenographers who are especially trained to handle any business connected with the building trades industry."

EXCHANGE ANNUAL BANQUET TO BE HELD MAY 23

Line up boys for the annual feast—the Builders' Exchange Banquet—to be held at the Fairmont Hotel, Saturday evening, May 23, commencing at 6:30.

Wm. H. George, president of the exchange, announces a feature of the evening will be one of the best speakers west of Chicago. This talk will probably form the educational unit of the evening while the Entertainment Committee promises to stage a show that will knock the builders for a row of reinforced concrete buildings.

Reservations are now being made and from present indications this banquet will probably prove the biggest given by the Exchange. Reservation must be filed with Mr. Schenck, assistant secretary of the exchange.

ELECTRICAL MEN ELECT

Electrical jobbers of the Pacific Coast concluded the convention in Santa Barbara, May 9, with an election of officers. S. W. Murlon of Los Angeles was elected president; Frank Norton, San Francisco, first vice-president; H. R. Olson, Portland, second vice-president; H. Zweifel, San Francisco, third vice-president; Alfred H. Elliott, San Francisco, secretary. The executive committee follows: H. Zweifel, H. Englund, R. S. Stratton, J. Lovenson, Frank Norton, all of San Francisco.

BETTER HOMES DEMONSTRATION

Under the direction of the National Better Homes in America Campaign and the City and County Federation of Women's Club, an official demonstration home will be opened May 10th until May 17th, inclusive, at 330 San Leandro Way, San Francisco. The home will be open from 2 to 10 P. M. daily. The structure is located two blocks east of Junipero Serra Boulevard and can be reached by "12" car or 12 car to San Leandro Way. Members of the construction industry are especially invited to inspect this home.

Architectural Industries Will Be Represented at Paris Exposition

A number of the architectural, building and other allied art industries connected with the Exposition of Modern Decorative and Industrial Art, which opens in Paris, in May, will be represented by delegates who will accompany the commission appointed by Secretary Herbert Hoover of the Department of Commerce. The delegate who will represent the Society of Arts and Crafts is Charles J. Connick, designer of stained glass windows of Boston, Mass., Noble Foster Hoggson of Hoggson Brothers, New York City, and Dwight L. Hoopingarner, of New York City, representing the American Construction Council, and A. J. Thorndy of the Narragansett Machine Company and Adolph Mueller of the Mueller Company representing the National Association of Manufacturers.

The increasing interest of American industries in the art movement which is finding expression in the great International Exposition has attracted many delegates who will join in a survey and study of the specialized exhibits to which the exposition is restricted.

As the exposition will comprise those arts which make for beauty in the domestic and personal lives of the people, only those who are interested in the trades and crafts of textiles, costumes, jewelry, silver, lighting fixtures, builders' hardware, wall paper, glass, ceramics, decoration, construction, and the graphic arts, will visit the vast displays shown in the superb and specially constructed buildings.

The exposition will occupy the Esplanade des Invalides, the Alexandre III Bridge and the Gardens of the Cours la Reine, the entire Grand Palais and the quays of the Seine, from the Concorde to the Alma Bridge. Practically every foreign country will exhibit its artistic products.

Interest in the arts shown at this exposition has been greatly fostered by the attention given to it by Secretary Herbert Hoover who appointed a commission to head the delegation,

comprising Dr. Charles R. Richards, president of the American Association of Museums, as chairman, Mr. Henry Crenge, the winner of the Friedensart and Industry Medal, and Frank G. Holmes of the Lenox potteries in Trenton. The commission appointed Edward L. Bernays, counsel on public relations, as an associate member.

In officially recognizing the importance of this exposition, Secretary Hoover has taken the first step in the government interest in these industrial arts. He called upon the commission to report on such features of the exposition and phases of the individual groups of exhibits, as may be of interest and value to American manufacturers.

That there will be many unique developments presented for these delegates to study is assured by the statement in the official program, "Works admitted to the Exposition must show new inspiration and real originality. They must be executed and presented by artisans, artists, manufacturers, who have created the models, and by editors, whose work belongs to modern decorative and industrial art. Reproductions, imitations and counterfeits of ancient styles will be strictly prohibited." This ensures the dominance of the modern spirit. This modern movement began some thirty years ago, largely in the field of glass and the new spirit has extended during the last twenty years so that the new characteristics have crept into the designs of many continental countries.

From such sources to which this country is not contributing, fruitful and inspiring ideas and ideals will be brought to our artists and craftsmen which will soon be felt in the elimination of many useless and unbeautiful things which have carried the artistic approval of crude minds which are devoid of taste. It is probable that the reports of this commission will have a far-reaching effect in improving the grace and charm of American life and surroundings.

ELECTRICAL DEALERS ORGANIZE

Meeting in Pittsburg, May 5, forty electrical and electric appliance dealers, organized a trade association, elected officers and directors. A name for the association will be selected at a meeting to be held at Crockett on May 18. Jack Cummings of Crockett was elected president of the association and A. Kass of Martinez was chosen secretary. Aspects of the electrical trade were discussed at the meeting by outside speakers.

ENGINEERS ELECT

The Kern County Chapter, American Association of Engineers, at a meeting in the Hotel Tegeler, Bakersfield, May 5, elected officers for the year as follows: E. Lissom, president; Ralph Myers, first vice-president; E. T. Langdale, second vice-president; E. A. Bartlett and F. G. McDowell, directors, and Charles K. Badger, secretary and treasurer.

CITY MANAGERS OPEN OFFICE

Announcement that the Central California section of the State Assn. of City Managers will maintain headquarters in Berkeley during the present year, is made by City Manager John N. Eddy of Berkeley, president of the Central California section. Professor Samuel C. May, city councilman, has been named consultant of the section, and will assume his duties on his return from a tour of Europe.

BUILDING CODE ADOPTED

The Palo Alto city council has adopted a new building and plumbing code. The former provides that the building inspector will act as the general inspector of all building and construction work in the city, thereby consolidating these activities into one office, which, it is believed, will result in efficiency and economy.

FIREPROOF HOUSES WITH GYPSUM CONCRETE WALLS

"Houses made fireproof by gypsum concrete walls" are described in the current issue of Popular Science Monthly. The magazine says:

Gypsum, commonly called "plaster of Paris," which has been used for centuries for plastering walls, is the essential part of a new fireproof building material. Mixed with clinders, gravel, crushed stone or furnace slag, and poured in forms, it can be used to construct main walls and partitions of one and two-story buildings. It is possible now to erect an entire house of this incombustible mineral at a cost that compares favorably with that of a wooden building.

While it takes ordinary concrete several days to harden, gypsum concrete will harden in about 30 minutes. This speeds up construction work, lessening labor costs. Also, since the material sets so rapidly, a comparatively small number of forms can be used over and over as the walls go up. Another advantage is that gypsum is considerably lighter than other concrete.

All corners and openings are reinforced by steel rods on welded steel fabric. In one-story construction, outside walls are made at least six inches thick; in two-story buildings eight inches, while partitions need be only three or four inches thick.

In a laboratory test made recently by the Department of Civil Engineering at Columbia University, a wall of gypsum concrete was exposed to fire and kept under temperature of 1700 degrees for an hour. After the test the exterior surface of the wall showed no signs of the heat. When the side of the wall exposed to the flames was washed with water from a fire-hose, it showed only a little of the cement washed away, leaving a slightly pitted surface.

GASOLINE ROAD TAX

Last year thirteen states had not adopted the gasoline tax plan for construction of roads. In 1925, there is only one state left that has not passed or is not considering a gasoline tax law, according to a report issued by the Engineering Department of the National Automobile Club.

Arkansas had a four cent (4¢) tax last year, the highest of all.

In 1925, four of the states have raised the gasoline tax to four cents (4¢) and four other states have increased it to five cents (5¢). New York is the only state which clings to a one cent (1¢) tax.

The total amount collected last year from gasoline taxes in the United States amounted to \$76,648,851. The amount to be collected under the revised levy will be in excess of \$200,000,000. Road construction in the next two years will be one of the great progressive movements of the country.

CITY PLANNERS QUIT

The Fresno City Planning Commission at a meeting May 5, resigned in a body. The commission is the third city advisory board to eliminate itself from the new city administration. The resignation of Miles O. Humphreys was the first to be presented verbally by Mayor Al E. Sunderland. It was immediately followed by those of Mrs. George H. Taylor, Louis Gundelfinger, Dr. Thomas T. Giffen, and Legislative Commissioner George F. Sharp. City Attorney William E. Simpson and Commissioner of Public Works Andrew M. Jensen did not resign, their incumbency being mandatory under the city zoning regulations.

Building Outlook is Good— Wage Increases Definitely Checked

(Special Correspondence from National Association of Building Trades Employers)

The upward tendency of wages in the building trades seems to be definitely checked for this year at least, and possibly for two or three years, since in a number of the larger cities long term agreements at present rates have been negotiated, many of which will not terminate until 1927 or 1928. There has been a growing tendency on the part of contractors in many localities to make two and three year agreements in place of one year contracts, because it was felt that the longer agreements would tend to stabilize the industry and eliminate the uncertainty attending the negotiation of new contracts each spring.

The firm stand taken in the matter of refusing to consider wage advances this year by contractors in such important cities as Boston, St. Louis, Cleveland, Louisville and Washington, D. C., has done much to stabilize the industry generally. The victories won by the contractors this year in these and many other cities present another strong argument in favor of organization. Singly or in individual trade groups the employers would have been at the mercy of the unions, but when practically all of the contractors of an entire city as was the case in St. Louis and Boston put up a united front and collectively opposed increases they were in a position to attain their desired objective.

Now that the wage question is practically settled, it is expected that a vast amount of construction that was temporarily held up will be released and the remaining months of 1925 will no doubt surpass in volume the same period for 1924. It is doubtful, however, if the total for the year will be as great as that of last year because during the first three months of 1925 there was a considerable falling off as compared with the same period last year. According to the American Contractor, reports from 207 cities indicate that building permits issued in January fell off 4 per cent from January, 1924, record. February figures fell off 6 per cent and March figures fell off 16 per cent. New York City accounts for the greater part of the loss in that permits issued during the first three months of this year show a decrease of \$161,000,000, as compared with the same period last year. Aside from New York, most of the larger cities show a good increase over last year, and in a number of cities where the figures are less the loss is very slight. Chicago, San Francisco, Atlanta, Minneapolis, Detroit, Kansas City, St. Louis, Cleveland, Philadelphia, Pittsburgh and Seattle are among the larger cities where the construction volume for the first quarter of 1925 exceeds that of last year.

Uniform Highway Marking Recommended

The adoption of a uniform system of through-route marking for the United States, based on numbering, and the selection of a uniform shape and type of marker to indicate these routes will be recommended by the joint board of State and Federal highway officials appointed recently by the Secretary of Agriculture at the suggestion of the American Association of State Highway Officials.

Simplicity and uniformity were the keynotes in the suggestions advanced by highway officials of 18 States and the Bureau of Public Roads of the United States Department of Agriculture attending the initial two-day meeting of the board at Washington, April 20.

The State highway departments of a majority of the States, represented directly by members of the board, already have the necessary authority to put into effect any recommendations which are likely to be made for bringing about continuity and uniformity of route marking and safety signs; and all States in which the highway department lacks such authority at present will be urged to pass the necessary legislation conferring such powers as promptly as possible.

To provide a basis for the selection of the interstate routes, each State highway department will be asked to submit to the board a map showing the routes within the State which in its opinion should be selected. Correlation and ultimate adoption of the through routes will follow subsequent regional meetings of officials of groups of adjacent States.

Before selecting a design for the standard route marker each State, through its highway department, will

be invited to submit suggestions covering the form and color of the marker. For cautionary and danger signs the uniform designs already in use in a number of States in the Mississippi Valley, and recommended by the American Association of State Highway Officials, are tentatively adopted subject to later modification.

The shape, size and position of warning signs with respect to the danger of which they give notice are regarded as important—more important even than the wording or lettering to be placed on them, since it has been found by experience in a number of States that the use of distinctive shapes frequently serves to notify the traveler of danger ahead before the words or symbols become visible.

Selection of colors for luminous and non-luminous signs, to represent varying degrees of danger, will be made only after a thorough study of all suggested colors with respect to their relative visibility, durability and economy.

The board has decided to adopt as its policy the recommendation of the American Association of State Highway Officials that the reputable trails associations now existing be permitted to continue their markings unless they conflict with the marking systems and policies now in force in the several States. But no trail association will be permitted to establish further routes on State or Federal-aid roads. The board commends to the attention of all citizens the warning of the association to investigate carefully the responsibility of trail organizers and to demand convincing evidence insuring proper expenditure of funds before contributing to or otherwise supporting such agencies.

YES, it was some rain.

FOR MAY.

BUT SANDY Pratt, President.

OF THE Pratt Building Material Co.

DOUGLAS 300—"easy to remember."

SHOULD WORRY.

BECAUSE THE rain.

MAKES THE rivers rise.

AND BRING clean sand.

DOWN THE American River.

AT SACRAMENTO.

AND THE Yuba River.

AT MARYSVILLE.

WHERE SANDY.

PRODUCES GOOD sand.

FOR PLASTERING and concrete.

AND THIS is a poor "K.C.B."

BUT SANDY.

IS TELLING the truth.

ABOUT HIS clean sand.

AND SANDY.

DIDN'T SAY a word.

ABOUT HIS crushed rock plant.

AT PRATTROCK (near Folsom).

COSTING \$250,000.

ANYWAY TRY.

TO WRITE stuff.

LIKE THIS.

THREE TIMES per week.

EVERY WEEK in the year.

AND SOME of yours.

WILL BE as bad.

AS SANDY'S near comedy.

"I THANK you."

The above K.C.B.-like story by Sandy Pratt, president of the Pratt Building Material Co., and producer of clean, sharp sand, hard, crushed rock and well graded, washed gravel, is just one of Sandy's "not-quite-so-good" ones. Sandy would rather be fishing than writing stories.

TURLOCK, Stanislaus Co., Cal.—**Frank A. Johnson, Turlock**, at \$28,746 will be awarded contract by Turlock Grammar School District for two-story and basement addition to Lowell School. **G. N. Official Proposals

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on June 8, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Tehama County, through Corning (11-Teh-7-A), about one (1.0) mile in length, to be paved with Portland cement concrete.

Nevada County, a reinforced concrete girder bridge, 21 feet wide, across Truckee River at Prosser Creek (111-Nev-38-A), consisting of two 60 foot and two 34 foot spans on concrete piers and bents.

Nevada County, a reinforced concrete girder bridge, 21 feet wide, across Truckee River near Boca (111-Nev-38-A) consisting of one 144-foot open span and one span and two 40-foot approach spans.

Nevada County, a reinforced concrete girder bridge, 21 feet wide, across Southern Pacific Railroad at Hinton (111-Nev-38-B), consisting of one 57 foot, one 20 foot and two 42 foot spans on concrete piers and bents.

Placer County between Tahoe City and Nevada State Line (111-Pla-39-A), about eleven and six-tenths (11.6) miles in length, to be surfaced with crushed gravel or stone.

Sonoma County, between Healdsburg and Mark West Creek and near Santa Rosa (11-Son-1-B), about eight and eight-tenths (8.8) miles in length; seven and six-tenths (7.6) miles to be paved with Portland cement concrete, and one and two-tenths (1.2) miles to be surfaced with crushed gravel or stone.

Merced County, between Six miles east of Los Baños and San Joaquin River (VI-Mer-32-C), about ten (10.0) miles in length, to be widened with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division Engineer will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: May 11, 1925.

NOTICE TO CONTRACTORS

(Montclair School—Oakland)

Office of the Secretary of the Board of Education of the City of Oakland. Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 19th day of May, 1925, at 9:45 o'clock A. M., at which time said bids will be opened for execution and completion of the Montclair School Building, of the Oakland School District, facing on Mountain Boulevard, on Lots 5, 6, 7, 8 and 9, being a portion of that certain 56.76 acre piece or parcel of land described in that certain deed from George Sterling and Carrie R. Sterling, his wife, to The Realty Syndicate, a corporation, dated September 20, 1912, and recorded June 23, 1913, in Liber 920 of Deeds, at page 80, in the office of the County Recorder of Alameda County, State of California. These bids will be opened in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 532 15th Street, Oakland, Calif.

On a deposit of Twenty-five (\$25) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office hereinafter mentioned and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and application to the Superintendent of Buildings at his office hereinafter mentioned and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

ments are on file in the office of the County Clerk, in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk, the sum of Fifty (\$50) Dollars for each department. Contractors will be restricted as to length of time these plans and specifications may be retained to ten (10) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposits to the County of Alameda.

Each bid must be accompanied by a check for at least ten (10) per cent of the amount of the bid or proposal certified to by some responsible bank and made payable to George E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda, as agreed and liquidated damages, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the board of the faithful performance of the contract.

The Board of Supervisors reserves the right to reject any and all bids.

Dated: May 14th, 1925. **G. E. GROSS,**
Clerk of the Board of Supervisors, Alameda County, California.

NOTICE TO CONTRACTORS

Donner Summit Bridge, Tahoe National Forest

Sealed proposals for constructing the above-named bridge on the Emigrant Gap National Forest highway, located within the Tahoe National Forest, Nevada County, California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at the Bay Bldg., 9 Main St., San Francisco, California, until 10 o'clock A. M. on the 26th day of May, 1925, at which time and place they will be publicly opened and read. The right is reserved to accept any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The bridge is located on the Auburn-Truckee State Highway about one and one-half miles east of Summit (Donner P. O.). The project consists of a concrete arch bridge of 110 ft. span with concrete girder approach spans, and the principal items of work are approximately as follows:

Class A Concrete, 530 cu. yds.
Class B Concrete, 61 cu. yds.
Class E Concrete, 19 cu. yds.
Reinforcing Steel, 100,000 lbs.
Roadway Excavation, 1500 cu. yds.
Construction shall be started within fifteen days after notice of award of contract has been given to the contractor by the District Engineer. The work shall be completed within one hundred (100) weather working days after said notice of award of contract is given.

The contract forms, maps, plans and specifications may be examined by responsible contractors at the following addresses:
1400 Bldg., 9 Main St., San Francisco, Calif.

% California Highway Commission, Forum Bldg., Sacramento, Calif.
The Bureau has available for loan to contractors on a rental basis, equipment at Government Island, Oakland, California, as listed in the specifications. Bidder will state in his bid the Government owned equipment that he will use during construction and minimum time required. The estimated rentals will be taken into consideration and award will be made on the bid to the best advantage of the Government.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and experience, and upon deposit of a check for \$10.00 to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming a part of the specifications above referred to.

C. H. SWEETSER, District Engineer.
May 7, 1925.

HOLLISTER, Cal.—Hollister Water Co. has applied to the Railroad Comm. for permission to issue notes not to exceed \$25,000 for the purpose of replacing with cast iron pipe the wooden pipe in its transmission sys.

PLAYGROUNDS AND PARKS

SAN FRANCISCO.—Walter A. Hoff, Landscape architect, reports awarding of contracts for garden work for A. H. Markwart, Piedmont, on a cost plus basis, to the West Coast Nursery Co., 526 Powell St., S. F. The Markwart Estate will be unusual in that it is developed along the lines of natural plantings. Winding glades of natural California plants are the dominant features of these glades.

Mr. Hoff also reports an additional development of a large English garden on the Colonel Marks estate in the Santa Cruz mountains. The main axis of this garden is a flag stone walk bordered by masses of perennial plants. Other features of the mountain garden development are rustic garden houses, and garden nooks. An abundantly flowing spring will be developed, which will bring about the construction of a water garden and rockery. Contracts for sprinkler systems and lawns have been awarded on cost plus basis. Contr. for developing of the grounds of Oscar Boldermann Jr., in Hillsborough, has been awarded to the West Coast Nursery Co. A long court in front of the house, and 11-ver garden are features of this naturalistic development.

Mr. Hoff is preparing several other landscaping plans at this time, report to be given shortly.

SALINAS, Monterey Co., Cal. — City council has ordered plans prepared for playground and public park at East Alisal and Front Sts., the site of the old East End school. Howard F. Cozens is city engineer.

BERKELEY, Alameda Co., Cal.—City rejects proposal to issue bonds of \$900,000 to finance purchase of sites and establishment of playgrounds and parks.

Interior of Grauman Metropolitan Theatre, Los Angeles. Done entirely in concrete. William Lee Woollett, Architect.

TRULY CREATIVE

AMONG advanced achievements in concrete is the interior of Grauman Metropolitan Theatre, Los Angeles.

From lobby to proscenium the conception has been executed in the same basic material used to insure structural soundness and economy.

Especially worthy of note are the rough, form-marked walls with murals painted on them, the great open trusses and massive beams, the decorated columns and the symbolic statuary—all of concrete.

The result is a daring creation indicating possibilities through the medium of concrete undreamed of a few short years ago. And it may well be that this truly creative work will serve as an inspiration for other individual achievements destined, perhaps, to herald a new era in architecture.

* * *

Competently supervised, modern workmen can produce concrete in any form, texture or color the architect may direct. If you are interested, we shall be most happy to send further information. Simply address the nearest office listed below.

A Variety of Work on the Same Machine

In addition to business correspondence the modern
office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
o-graph cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.

Congress of March 3, 1879.

LAST GAP IN COAST ROUTE TO BE COMPLETED

The only break in the pavement between San Francisco and San Diego, via the Coast Highway, is going to be closed by the California Highway Commission, it is announced by Chairman Harvey M. Toy. Bids have been asked for two bridges at Pismo Beach, San Luis Obispo County, the first step in the elimination of a dangerous curve and an unpaved section of the highway at this point.

Because of the problem involved in eliminating a dangerous grade crossing of the Southern Pacific railroad just south of Pismo, a short section of the highway never has been paved. To eliminate the curve and make the improvement possible, the commission is condemning a right of way on a direct line, which shortens the distance 1680 feet and eliminates five curves.

An overhead crossing will be built over the railroad and a new bridge constructed across Villa Creek. This is the work for which bids have been asked; necessary grading will come later. San Luis Obispo County is contributing \$25,000 toward the cost of the project the state's share of which will be defrayed with federal aid. The bids will be opened in Sacramento, June 15th.

East Bay Dam Will be One of Highest of Its Kind in the World

The Lancha Plana dam, a contract for which will be let shortly by the East Bay Municipal Utility District, will be one of the highest of its kind in the world, according to Arthur P. Davis, chief engineer and general manager of the project.

The dam will be of concrete built in the form of an arch towering 350 feet above its foundation, or about as high as the Arrow Rock dam of Idaho, now the highest structure of its kind in existence.

The dam will take 350,000 barrels of cement which will be shipped in over the Southern Pacific and the Utility District's specially constructed branch line from Valley Springs to the dam site; 7000 railroad car loads of gravel and approximately 3500 cars of sand. The sand and gravel will be obtained from gravel pits not many miles from the scene of the work.

The dam will be built in a gorge very narrow at the bottom, having a width of only twenty feet at this point. At the top the main structure will be 710 feet in length and there will be a wing on each end giving a total of 745 feet more. This will bring the grand total length of the dam at the top to 1462 feet or a little over one-fourth of

a mile. The structure is technically known as a variable radius arch type dam and is designed along lines which have proved successful in many other American dams.

The reservoir will cover 2040 acres of land back of the dam and will hold 217,000 acre feet of water, which means that the water in the reservoir would cover 217,000 acres, one foot deep. It will hold 72,300,000,000 gallons, or more than twice as much water as it is now possible to store in San Pedro reservoir, Lake Chabot and Upper San Leandro combined, the three local reservoirs of the East Bay Company.

The figures show that the flow of the Mokelumne River is sufficient to fill this great reservoir to the top in any one year with certain rare exceptions. Only twice in the last twenty-five years has the flow of the river been insufficient to fill the Lancha Plana Reservoir in twelve months.

The Lancha Plana dam is the largest piece of work on the East Bay project.

The plans call for a power house at the dam, using the overflow from the river to which the district is entitled pending the construction of the second and third units of the Mokelumne project.

DEMAND FOR BRICK FALLING OFF SURVEY SHOWS

Current reports from 156 manufacturers of common brick indicate that the high pressure demand of 1924 has diminished, according to the Monthly Digest issued by the Common Brick Manufacturers' Association of America. Continuing the report says, this general summary reflects the experience of individual brick producers in all sections, except in a few areas where construction has not fallen materially from the high volume of 1924.

The most conspicuous example of the latter class is Chicago, where both the movement of brick and the orders on hand show an increase. New England also indicates a decided pickup since the report of thirty days ago. Everything indicates that there is now a normal volume of construction activity. Those who were tuned up to the super-demand of the past year are inclined to feel that there is a slump; but if compared with any normal year in the past, the present volume would show a thoroughly satisfactory condition.

TRADES COUNCIL REINSTATED

After being "outlawed" for nearly three years, the older of the two Cleveland Building Trades Councils is now the recognized and chartered council in that city, according to recent advices from Washington. This results from the action of the executive council of the Building Trades Department of the American Federation of Labor, which has sustained the plan adopted by the 16 international presidents of the crafts involved. The older council has 11 crafts and the other council 5.

FIVE-DAY WEEK REMEDY

One commentator upon the action of the building trades that have imposed a five-day week upon the industry has explained its existence from the cupidity of those mechanics.

Here is the idea: the trades are principally those required to finish a building job. The owner is anxious to have the job done; the contractor is anxious to get his money; the architect wants to see the structure completed. With a five-day working week, and a possible sixth day conveniently in the offing—for which, being overtime—double pay, or, at best, time and a half time wages are demanded, haste may be made—for a price.

Every one concerned in the business knows it is immoral, every one knows it is a hold-up, but they pay!

When the day arrives when no overtime work will be tolerated this sort of thing will be at an end.

Who will start the innovation? Selfish interests so far have hindered the innovator from view.—Building Arts.

COMMON LABOR SUPPLY

Mexico and Canada are now furnishing the United States with the bulk of the common labor needed in the construction industry, according to an analysis of the effects of the 1924 immigration law made by the National Industrial Conference Board. Total immigration from July 1, 1924 to January, 1925, shows a reduction of 68.3%, as compared with corresponding period in 1923.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

CHOOSING A VOCATION

The choice of a vocation or profession is one of the most important steps in the life of any individual. It is something that each one has to decide for himself. Upon the proper decision rests largely whether a person will go through life happy in the knowledge that he is performing a work that is well worth while, or unhappy in the knowledge that he is attempting to do something for which he is not especially fitted. Between now and the middle of June countless thousands of boys will leave the public schools of this country to make their own way in the world. Many of these boys are mechanically inclined and have creative instincts. Hundreds of them could be induced to enter the building industry if the matter was put up to them in the proper manner.

Boys, who would make good bricklayers or plumbers, may get into industries for which they are temperamentally unfitted, and fall in life simply because the advantages of the building trades was not presented to them at the proper time. Here then is an excellent opportunity for every contractors' association in the country to perform a service that will not only benefit the construction industry, but society in general. Between now and the closing days of the school year, an effort should be made to have the building industry brought to the attention of every boy who is not contemplating a college career. Local associations should appoint an educational committee whose job it would be to see that a practical builder appeared on the platform of every school to talk on the subject of choosing a career, emphasizing the advantages offered by the construction industry. With that thought in mind there has been prepared in the office of the National Association of Building Trades Employers (Electric Building, Cleveland, Ohio), an address entitled, "Choosing A Profession," copies of which will be sent to association secretaries and others interested in the subject upon request. This is a matter of vital importance. We can no longer look to Europe to train our skilled labor, and consequently must do the job ourselves. The time to get the boys in when they are about to leave the public school. If every one in the industry will interest himself in this matter, it will be but a short time until we have apprentices enough enrolled in the construction industry to insure an adequate labor supply for the future.

CONSTRUCTION ONE OF BRIGHT SPOTS IN INDUSTRY

Building construction and the manufacture of automobiles constitute the two bright spots on the industrial map of the country. Many basic industries are showing a general tendency toward contraction of productive activity in order that production and consumption may be adjusted. A notable example is in the coal industry, where as one authority has put it, "conditions are worse now than they have been at any time during the present generation." The reason assigned for the slump in this industry is that union mines, where the basic scale as fixed by the Jacksonville agreement is \$7.50 a day, can not compete with non-union mines where the rate is much less. As a result the non-union mines are getting the bulk of the business and the union mines are idle.

While the volume of construction business for the first four months of this year is not as great as it was in 1924, the demand still keeps up, and every indication points to a fairly busy year taking the country as a whole. The biggest drop in contract letting is in New York, but considerable work started last year has not been completed so the industry in the metropolis will be kept going at full capacity for the balance of the year. The drop in New York is counterbalanced to a certain extent by the continued building boom in Chicago. Most of the other large cities report a volume of business on a par with 1924. It is believed that the nation-wide boom of the past two or three years is at an end and that the industry has settled down to normal.

	*Electricians	1.37½	1.43¾

*Effective Aug. 1, 1925 rate goes to \$1.50.

The Architects' League of Hollywood has been organized with Charles H. Kyson as president; H. E. Pentland, vice-president, and M. L. Barker, secretary-treasurer. Weekly luncheon meetings are held by the league, the place of meeting being changed from week to week. Most of the architects located in the Hollywood district are enrolled in the organization which was formed to bring the members together in a social way and for the interchange of ideas.

J. Z. Lear has been appointed building inspector for the city of Pomona. Mr. Lear assumed the office on May 16.

The State Railroad Commission has authorized the construction of a viaduct over Dominguez creek on the Anaheim road in the Wilmington district of Los Angeles to give the Los Angeles and Salt Lake railroad access to tidewater by a new route. The cost will be \$335,000.

Preparations are under way in Yuba County to call an election to vote bonds to finance construction of a county road system. An issue for \$800,000 is contemplated. The proposal has the endorsement of the Yuba County Chamber of Commerce.

TRADE NOTES

The Union Planing Mill has opened its new quarters at 735 South Sutter Street, Stockton. The new plant, representing an expenditure of \$125,000, was started immediately following the fire in the old plant at Sutter and Lafayette streets. Bruce Martin, heads the enterprise as president. Active management of the plant has been placed in the hands of George Little, a newcomer to Stockton. Associated with Little is W. A. Curtis, who has a thorough knowledge of the production end of the business. Backing these two men, the following, Orrin L. Merrill, Louis E. Tschierschky, Harry Reid, R. N. Stevens, John Magnuson and George Y. Shepherd, make the backbone of the organization. The new plant, with an area of 84,000 square feet, represents an investment of over \$125,000. Machinery is of the latest type and all electrically driven, about 175 horsepower being necessary to drive the load. About 35 men will be employed steadily the year round.

Fetner Manufacturing Company of Portland, Ore., manufacturers of factory cut buildings, especially residences, will open a Sacramento office in the immediate future. G. C. Nichols will be Northern California representative for the concern. George S. Milliken, for many years a resident of Sacramento, will be in charge of the Sacramento office and distributing agency which will be located at 620 J Street.

The San Francisco Waterproofing Company, operated by H. E. Borland and T. C. Heaney, has recently established itself at 1378 Mission street, San Francisco, to engage in the manufacture and distribution of waterproofing and waterproofing products. The company has purchased the equipment of the Imperial Company, formerly of 142 Stillman street, and will maintain a waterproofing engineering and contracting department.

Articles of incorporation for the Cozy Home Building Company of San Mateo have been filed in Redwood City, listing the company's capital at \$25,000. Samuel S. Stevens of Oakland, Joseph D. Toohig of San Mateo and Lloyd Dinkelsfeld of San Francisco are named directors.

New salesrooms for the Cooks Wall Paper & Paint Company has been opened at 330 B street, San Mateo, carrying a complete line of wall paper, paints, varnishes, enamels and brushes. W. C. Cooks is manager of the company.

J. W. Bender Roofing & Paving Co., and Redwood Block Floor Co., formerly located at 576 Monadnock Bldg., have moved to their new quarters at Bryant and Eighteenth streets, San Francisco. Phone Hemlock 892.

Thomas Brodie, plumbing and beating contractor, announces the removal of his shop and offices from 2119 Fillmore street to 1281 Mission street, San Francisco.

The John Lucas Paine Company with headquarters at 365 Twelfth street, Oakland, plans early construction of a \$250,000 plant in San Francisco. A site for the plant is yet to be selected.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

STATE TOUR TO BE ELECTRIC MEET FEATURE

The wealth of California's hydro-electric resources is to be displayed to some of America's biggest investors next month on the occasion of the forty-eighth annual convention of the National Electric Light Association to be held in San Francisco June 15 to 19.

A feature of the convention is to be a tour of the state's hydro-electric developments made by four special trains originating in the East and carrying capacity delegations to the meeting.

ELECTRICAL LEAGUE ELECTS

Officers of the Northern Counties Electrical Development League at a meeting in Corning, May 14, elected the following officers to serve for the ensuing year: A. Libhardt, Glenn County Electric Works, Willows, president; Max Stewart, Pacific Gas & Electric Co., Red Bluff, secretary-treasurer; Don Bird, Bird Electric Co., Chico, vice president, and the following directors: A. D. Wood, Redding; F. E. Sherman, Corning; L. R. Haseleu, Chico, and C. E. Benninghoff, Orland.

VALUE OF TRADE EDUCATION

"A community must pay either for the cost of training labor or for the greater cost of inefficiency of labor, and inefficiency of labor means inevitably general industrial and commercial inefficiency," says Secretary of Commerce Hoover. "To provide such training is clearly a public responsibility. Education in general, including vocational education for the youth, is Democracy's most important business."

PLUMBING ORDINANCE PROPOSED

Master and journeymen plumbers of Reno, Nevada, have introduced a proposed amendment to the city council whereby all plumbing work or drain laying within the city limits would be required to be done by competent skilled plumbers who first would be required to make application to the city clerk and then prove before an examining board their ability to do the work required.

OPPOSED TO LICENSING

The Associated Pennsylvania Constructors at their annual meeting in Harrisburg, Pa., March 14th, unanimously adopted the following resolution: "Resolved, that the Associated Pennsylvania Constructors is opposed to any legislation looking to the registration or licensing of general contractors."

TO LICENSE CONTRACTORS

City Attorney Thomas C. Gould of Alhambra is preparing an ordinance providing for the licensing of electrical contractors in that city. It is proposed to require each contractor taking out a license to give a bond of \$1000 in addition to paying a license fee of \$100 a year.

Milan, Italy, is Awarded the Fifth International Road Congress

The Fifth International Road Congress will meet at Milan, Italy, at the invitation of the Italian Government from September 6 to 13, 1926. The announcement is made by M. LeGavrian, Secretary General of the Permanent International Association of Road Congresses, through the Bureau of Public Roads, United States Department of Agriculture.

The program announced for the Congress will include discussions of the following questions:

First Section: Construction and Maintenance. Concrete Roads — Progress achieved in the use of materials for the construction of roads in cement-concrete.

Bituminous and Asphaltic Roads — Qualities required of the materials employed; binder, aggregate.

Standardization of tests for the following road materials: coal-tar, bitumens, and asphalts.

Second Section: Traffic and Administration. Census of Traffic — Search for uniform international bases for adoption in every country.

Development and planning of towns in interests of Traffic. — Progress achieved in the general control of traffic in towns.

Special Roads reserved for Motor traffic. — What conditions justify their being built; the appropriate authorities for their initiation and constructing; financial arrangements; contribu-

tion from public funds; tolls; rules for traffic circulation and for exploitation; relationship and connection between motor-roads and other highways, in the interests of safety and the continuity of traffic generally.

An international exposition open to manufacturers or producers of materials and implements used in the construction and maintenance of roads, as well as to manufacturers of vehicles and accessories, will be held in connection with the Congress.

The Italian Committee of Organization, in co-operation with the Executive Bureau of the Permanent International Association of Road Congresses, has arranged, in addition to the regular sessions, for a series of visits to modern roads built or under construction, notably the Autodrome of Monza where a race for the grand prize will be run, and the new automobile highways which connect Milan with the Italian Lakes. Visits are also scheduled to industrial plants and road construction projects which will be under way at the time.

Information concerning the exposition may be obtained from the Secretariat of la Commission Internationale d'organisation du Vème Congrès international de la Route, Via Sala 3, Milan (M. l'ingénieur G. LORI, Secrétaire Général) or the Secrétariat de l'Association Internationale Permanente des Congrès de la Route, 1 Avenue d'Iena, Paris.

RICHMOND BUILDERS BANQUET

The fourth annual banquet of the Contra Costa County Builders' Exchange was held Friday evening, May 15, in the exchange's banquet hall with President Percy M. Stanford, presiding. The banquet hall was filled to capacity, 160 members and their friends being seated about the tables.

Speakers included W. H. George, president of the San Francisco Builders' Exchange; J. F. Brooks of the Standard Oil Company; D. J. Hall, E. M. Tilden, H. A. Johnston and J. H. Plate, mayor of Richmond.

Music was furnished by a 4-piece orchestra composed of exchange members.

NEVADA MASTER PLUMBERS NAME OFFICERS AT RENO SESSION

John J. Pelizzari of Reno was elected president of the Nevada State Master Plumbers' Association following a two-day session in Reno recently, during which problems affecting the trade were discussed. George Lang of Lovelock was named vice president of the organization and James V. McCormick of Reno, secretary and treasurer. The delegate to the National Master Plumbers' Convention to be held at Portland, Oregon, June 22-25, this year will be George E. Wilkinson of Reno. F. C. Savage, Reno, was selected as the alternate.

S. F. GETS ENGINEERS MEET

San Francisco was selected as the scene of the 1926 national convention of the American Society of Mechanical Engineers at a meeting of the organization's council in Milwaukee, Wis. San Francisco won the convention over three other cities. The society held its last convention in Cleveland.

Richmond, Va., Kansas City and White Sulphur Springs, W. Va., each made strong bids for the conclave. But in the final voting San Francisco was the unanimous choice of the council, the executive committee and the committee on meetings and program. Dr. W. F. Durand of San Francisco, president of the society, took an active part in the meeting and selection of a conference city.

PORTLAND PAINTERS STRIKE

Union painters at Portland, Ore., are on strike seeking an increase in wages from \$8 to \$9 a day and for a 5-day week instead of a 5½-day week. Double pay for overtime is another demand.

ELIMINATE BUILDING PEAKS

The American Construction Council at its May meeting in New York devoted its two day's session to a discussion of a movement to eliminate building peaks and depressions and of plans for improvement of the quality of materials and workmanship in the erection of homes and other buildings.

LUMBER CENTER PROPOSED AT SAN MATEO

Proposals to develop a lumber and shipping business in East San Mateo, including construction of a wharf on the bay shore and erection of a lumber mill and box factory by W. R. McComb of San Francisco, are being investigated by City Manager O. F. Weissgerber of San Mateo, to whom the matter was referred by the City Council after application had been made to the Council for a franchise to link up the proposed mill site by means of a spur track of the Southern Pacific Company over Eleventh avenue.

The application on behalf of McComb was filed with the Council, along with a diagram showing proposed purchases of land in East San Mateo and the development of the lumber industry on an extensive scale.

It is proposed to erect a lumber mill on Eleventh avenue, just east of Bayview boulevard, a box factory at Ninth avenue and C street and a wharf at the foot of Eleventh avenue in connection with the development.

The spur track is to connect the wharf with the Southern Pacific main line and its construction is linked with a plan to widen Eleventh avenue from 60 feet to 100 feet.

Action on the franchise for construction on the spur track will be postponed pending a report from the city manager following his investigation on the proposals submitted.

STEEL-CORK HOUSES ERECTED IN ENGLAND

Not far from the famous Deal Castle, built by Henry VIII, at Deal, England, several workmen's houses of cork with steel framework are being built as an experiment designed to assist in relieving the housing shortage in England.

The skeleton of the newly conceived houses is of steel and the insulation core of the walls is formed of slabs of compressed cork. On the exterior the cork is enclosed in solid concrete to the depth of an inch and a half by a "cement gun," which applies the concrete under pressure. The cork itself, having been pressed into a mould, will not swell and burns very slowly. Calculations of the builders show that its insulation value saves 25 per cent in heating costs.

Another advantage of the cork house claimed by the inventors is that it is sound-proof in comparison with the ordinary structure of brick, stone or timber. Owing to the fact that it may be built by unskilled labor under direction of experienced hands, the cost is low.

APPRENTICE TRAINING IN N. Y.

The Apprentice Commission of the New York Building Congress reports that there are 2240 apprentices enrolled in the building trade schools of that city at the present time, representing 7 of the building trades. Negotiations are now under way for the inclusion during the coming year of several other trades.

AMERICAN PLAN PAVES WAY

In his sixth annual report, President Rice of the Los Angeles Merchants and Manufacturers Association, says: "We have made it possible to build anything and to do anything under open shop conditions. A fifteen per cent saving, due to these conditions, is a most conservative estimate. On a \$600,000,000 building program alone, Los Angeles has saved \$90,000,000. The savings in other industries are in like proportion."

Pacific Coast Building For April

Building permits calling for an aggregate construction cost of \$51,218,759 were issued in 80 principal cities of the Pacific Coast during April. This indicates the greatest building activity ever reported from the seven Far Western States, according to the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.

Analyzing these figures, the Straus survey shows the April total to be 2% greater than that of March, 17% greater than that of last April and of April, 1923, and 29% greater than the total of April, 1922, from these cities. The April figures bring this year's total above that of any previous comparable Western year, and are the official April, 1925, construction figures reported by building department executives from 80 cities in the seven Pacific Coast States:

	April, 1925	April, 1924	March, 1925
Alameda	\$ 164,221	\$ 447,262	\$ 154,717
Alhambra	374,650	606,525	228,295
Anaheim	30,865	32,780	40,814
Bakersfield	105,791	56,472	204,968
Berkeley	442,358	702,535	1,029,452
Beverly Hills	871,933	425,376	749,122
Burbank	114,495	22,445	102,515
Burlingame	307,080	183,638	206,476
Colton	11,550	32,150	20,800
Compton	435,139	107,700	120,893
Coronado	19,000	56,827	25,725
Emeryville	259,000	13,580	15,590
Eureka	43,266	4,800	70,800
Fresno	202,287	172,386	152,139
Fullerton	87,538	57,602	83,886
Glendale	83,304	79,954	79,021

LUMBER BUY IN NORTH REPORTED

Although there is no transfer deed yet of record, there is a well authenticated rumor at Alturas, Modoc County, that the Pickering Land & Timber Company of Kansas City, Mo., has purchased the timber holdings of the Roe-Burgess Land Company of Oshkosh, Wis.

These lands embrace a total of 5720 acres, all located within the Modoc National Forest, and contain a fine stand of yellow pine, white fir and incense cedar, the first named species forming about 90 per cent of the stand. The total stand of timber on these lands will approximate 85,000,000 feet of merchantable stuff.

The nearest railroad point to these lands at the present time is Alturas, located on the Nevada, California and Oregon Railway (narrow gauge, about thirty miles distant. However, the Pickering interests own over 70,000 acres of other timberlands located south and west of the rumored purchase, having acquired about 7000 acres of timberland from various small owners in the past couple of years, mostly quarter sections contiguous to their already extensive holdings within the Modoc Forest.

STREET CONTRACTOR SUED

A United Press report from Bend, Ore., under date of May 6, carries the following information:

To force maintenance under a five year guarantee, of approximately a mile and a half of Willitte pavement laid here four years ago, the city of Bend, Ore., is preparing to bring action against C. S. Reed, Los Angeles contractor. Such action was authorized by the city council here last night. The pavement is rapidly deteriorating, large holes having appeared in a number of places, while an extensive network of cracks is the rule rather than the exception, it was declared by councilmen. Referring to one portion, Mayor R. H. Fox asserted that "a good hard rain would wash it away."

HIGHWAY SURFACING ORDERED

To reduce heavy maintenance costs on the Auburn-Colfax unit of the Victory Highway, east of Auburn, Placer County, the California Highway Commission has approved the recommendation of the State Highway Engineer that the section be given a light asphalt macadam surfacing over the present rock macadam base.

This section has considerable local travel as well as a heavy summer traffic to Lake Tahoe, Nevada points and the East, and maintenance of the crushed rock base has become considerable of a problem. Bids for the work have been asked and will be opened in Sacramento June 15th. The work will be financed with maintenance funds.

POWER DEVELOPMENT PLANNED

The Southern California Edison Company has been authorized by the State Railroad Commission to issue and sell before December 31, 1925, 15,000 shares of its seven per cent preferred stock of the aggregate par value of \$1,500,000 and 100,000 shares of its six per cent Series "B" preferred stock of the aggregate par value of \$10,000,000, and to use the proceeds for additions and betterments. The company states that its total estimated expenditure during 1925 will be \$25,000,000, of which \$11,500,000 will be spent for new production, and the balance on transmission and general system betterments.

Examinations For State Positions

The California State Civil Service Commission, Forum Building, Sacramento, announces examinations will be held in Sacramento, San Francisco and Los Angeles in the immediate future for several state positions in the construction industry. The receipt of applications for these examinations closes May 30. The examinations are for the following positions:

Assistant Estimator, (Buildings), Grade IV—Salary, \$235 to \$280 a month.

Associate Mechanical Engineer—salary \$285 to \$350 a month.

Architectural Designer—salary \$285 to \$350 a month.

Junior Equipment Engineer, (Highways)—salary \$170 to \$230 a month and Assistant Equipment Engineer (Highways)—salary \$235 to \$280 a month.

General Foreman of maintenance and repair, mechanical equipment, highway—salary \$190 to \$220 a month and Superintendent of maintenance and repair mechanical equipment, highways, \$230 to \$290 a month.

Positions in Bureau of Architecture, State Department of Public Works,

Junior Architectural Draftsman, (Grade 1) \$130 a month; Assistant Junior Architectural Draftsman, (Grade 2), \$135 to \$165 month; Architectural Draftsman, (Grade 3) \$170 to \$230 month; Assistant Mechanical Engineering Draftsman, (Grade 2), \$135 to \$165 month; Mechanical Engineering Draftsman, (Grade 3) \$170 to \$230 month.

These examinations are open to all American citizens who have reached their eighteenth birthday but not their sixty-first birthday, who are in good physical condition and will meet the requirements for the respective positions.

Complete details regarding filing of applications together with other necessary information are obtainable from the Sacramento offices of the commission, also in room 116 State Building, San Francisco, and the State Employment Offices located as follows: 771 Howard St., San Francisco; 401 Tenth St., Oakland; 176 S-Market St., San Jose; 115 E. Second St., Stockton; 206 Court St., Los Angeles; 106 B St., San Diego.

Home Shortage for People of Small Means Subject for Discussion

Because a large proportion of the new dwellings erected in the United States during the last few years have been for the well-to-do, people of small means are still living in badly cramped quarters, in some instances worse than ever before, says a statement issued by the Civic Development Department of the Chamber of Commerce of the United States. The Civic and social effect resulting from cramped living accommodations are serious, it is stated by the department.

"The evil effects of the housing shortage," the statement continues, "are evident to everyone who has looked into the subject at all. America is fortunate in that the shortage has not been so great as in some of the European countries where it has become a political issue, but it is serious enough to call for hard thinking and constructive action. Four or five years ago every element in the community felt the pinch. Since then there has been considerable relief due to the unprecedented amount of house building. But the new dwellings have been in large proportion for the well-to-do. People of small means are still badly cramped, in some places worse cramped than ever because houses wear out, are demolished or converted to other uses and so the supply is steadily diminished. Meanwhile new, inexpensive houses have not been erected in any considerable number, though the population requiring such houses constantly increases. The value of adequate, comfortable, attractive dwellings in terms of citizenship can scarcely be over-estimated."

The whole question of housing in relation to citizenship is one of the important subjects that will be discussed at the thirteenth annual meeting of the National Chamber in Washington, May 29 to 31. This question will be considered by a special group meeting under the auspices of the Civic Development Department. The subject will be presented to the meeting by Morris Knowles, an engineer who has had wide experience as a developer of industrial communities and as chairman of the Pittsburgh Zoning Commission.

In announcing the subjects for its group meeting, the department says that the topics which will be considered are of "very practical interest to all business men who are concerned in the physical development of their city, which means all who own or rent a business building or a home or who are considering the effect of the housing shortage upon their employees."

"In the United States," it is pointed out, "the policy has been to look to private initiative to meet our needs, in contrast to some of the leading countries abroad where there has been a strong tendency to look to the government for leadership in financing and building, at least in the field of wage-earners' dwellings. The American policy implies an alert and informed public opinion and co-operation among the groups primarily concerned."

Included in the program for the Civic Development group meeting is the question of the Building Congress. "This," it is explained, "is one of the most promising developments of post war years. It brings together architects, engineers, financial men, contractors and sub-contractors and labor in an effort to promote better understanding, economy and efficiency. The cities have already had experience which is valuable to other cities. The speaker on this topic, John M. Gries, chief of the Division of Building and Housing, United States Department of Commerce, has kept in close touch with all these congresses and will bring out at the meeting what the experience of each has shown will be of value to other cities."

The third subject to be considered by this group meeting will be "The Economic Use of Land in Urban Communities." "This," the department says, "is a subject of basic importance if we are to develop instead of merely exploit our urban resources. It underlies city planning and zoning. Its importance has been recognized by the National Association of Real Estate Boards which is co-operating with the Institute for Research in Land Economics in studies which will give us a sound policy in a field that heretofore has been neglected."

LAKE COUNTY TO GET LARGE LUMBER MILL

The largest sawmill yet to be established in Lake County is assured as the result of the closing of a deal by Edgerton & Adams of Grants Pass for the Loftus tract of timber in the Crane Lake District, 15 miles east of Lakeview, Ore. The tract contains several thousand acres and is reported to contain approximately 10,000,000 feet of pine. The Grants Pass sawmill men have been looking over Lake County timber and selected the Loftus tract as being best fitted for their plans.

A mill of a daily capacity of 40,000 feet will be constructed at once. The new owners are now purchasing sawmill machinery. It is expected to have the mill in operation for a considerable cut during the coming summer. It is understood the mill will be located in Crane Lake valley if a sufficient water supply can be obtained, otherwise a site on the Camas creek.

TRAFFIC ON MAIN HIGHWAYS

In Iowa it is estimated from traffic census figures that approximately 80 per cent of the entire highway traffic of the state is upon the primary road system. The figures for California agree very closely with those of Iowa. As a result of a very complete traffic census on the main traveled system and a traffic census on the secondary highway system, the California authorities estimate that approximately 76 per cent of the entire vehicle ton miles in the state is upon the 7 per cent main traveled primary road system.

BUILDING COSTS STABLE

A chart showing average construction costs for the past 10 years has recently been issued by the Associated General Contractors of America. An interesting feature of the chart is that it unquestionably shows the increasing stability which has been developing in the last two years.

Taking the 1913 level as 100, there was a rapid increase of cost to the peak of nearly 250 in 1920. Costs then began to decline and reached the level of 185 in 1922. This decline was followed by a slight increase and for the past two years costs have remained stable around the 200 mark.

BRIDGE BOND REQUIRED

Cash bond of \$50,000 to guarantee that work will proceed upon the proposed Coyote Point bridge to Alameda county is required of Frank Elbridge Webb in a resolution adopted by the San Mateo County Supervisors. Webb, who is head of a company planning construction of a bay bridge, was given ninety days in which to raise the bond. The Supervisors agreed to renew Webb's franchise provided the money is raised and deposited in the three months' period.

PURCHASE PLANT SITE

Willis-Overland Company has purchased a site from the Contra Costa Laundry Company, running from Kirkham to Center, Thirteenth and Fourteenth streets, Oakland. Officials of the company were reticent concerning their plans for development of the tract, but it is reported, the company will shortly begin construction of a central distributing plant as the first unit of which will be a big western factory for the manufacture of their cars.

Would License Law Eliminate The "Irresponsible Contractor"?

Licensing of contractors to eliminate the "irresponsible contractor" is a subject for discussion in every section of the country. An editorial in a recent issue of the Southwest Builder and Contractor furnishes food for thought dealing with the subject. The editorial is published herewith.

Licensing of contractors appears to many persons to be the best alternative plan for eliminating the "irresponsible contractor." Responsible contractors are, however, divided in opinion as to its efficacy or as to its advantages to them. Some are unable to see how licensing would entirely suppress irresponsible persons in the contracting business. People who are "crooked" are not easily suppressed. Ignorant and inexperienced persons may be squelched, but the crook is generally shrewd and resourceful enough to dodge many barriers, and he is above all most persistent.

Drafting a license law that will pass the test of the courts is not as easy as some persons believe it to be. It must be uniform in its operation and it must be shown that it is not discriminatory in any way. It must be apparent that framing a law licensing contractors—from the man capable of building only a small house to one fitted to erect a skyscraper—presents many difficulties. If an examiner or test of any kind is required, what shall it be? Contracting is a business. A man cannot survive in it on technical qualifications alone. He must have capital, and how can the right of a man with capital and plenty of means to hire men with technical knowledge, which he himself does not possess, be denied the right to undertake a contract? It might be very desirable from certain points of view, but would it be valid?

The "irresponsible contractor," so called, is the bane of the construction industry and a menace to the public. Both would like to eliminate him, but how it shall be done is a vexed question.

California had for a brief period a law that was most effective in suppressing the "irresponsible contractor." It made the application of funds paid on a building contract for any purpose other than the discharge of obligations in connection with that specified contract a felony. As long as this law was in force it proved an effective deterrent to fraudulent operations in the contracting business. But it was nullified by the courts declaring it in violation of the right of private contract and therefore unconstitutional. Some attorneys have expressed the opinion that this measure could be rerafted so that it would stand the tests of the courts, but no one has essayed the task.

If contracting was a matter of professional qualifications, as some contractors regard it, licensing might be worked out along lines similar to those for licensing of engineers and architects. But even with those technical professions licensing has been a difficult thing and it has not accomplished all that was expected, although it has not been devoid of benefits. Some phases of contracting call for professional knowledge to insure success, but this applies only to important work involving engineering which is a relatively small part of the great volume of construction.

Licensing of contractors both by the state and municipalities has been advocated. Several states have laws li-

censing contractors, but these laws have only a limited application and they are too recent to be considered as having established definite principals, for they have not passed the highest courts. Municipal licensing has been attempted in various cities, but the prime motive for legislation of this sort is selfish, the purpose being to protect the local contractor from outside competition rather than to uplift the contracting business.

Long Beach has an ordinance providing for licensing of contractors which is exceptional, but although it has been in force for more than a year it has not been tested in the courts. Contractors of that city believe that it has been beneficial to the contracting business and has secured a large measure of protection for the public. Compliance with the city building regulations for the protection and safety of the public, if the principle on which this ordinance is drafted, it is contended that the ordinance is fully sustained by the police powers of the city, but it has not yet received judicial approval.

Southern California Chapter, Associated General Contractors, has voted to sponsor a bill for a state license law for contractors. Just what form it will take has not even been decided. One idea is to ask for a simple registration law, something along the line of the law providing for the licensing of realty brokers. It is contended that such a law would put the dishonest man out of business because, when charges of dishonesty were sustained, his license could be revoked. A law of this sort, while it probably would fall short of the expectations of many contractors, would no doubt accomplish much good. Moreover it would be more likely to pass the legislature than some more drastic or complicated measure.

Whether such legislation can be obtained at all is something which cannot be forecast. But that can never be determined until it is tried. Every new licensing measure meets with some opposition. Undoubtedly a bill to license contractors would provoke discussion as to its limitations which might open up many complications. The danger would be that it would be restricted to contractors doing a certain class of work which would not give the full measure of protection to the public which is sought by the Associated General Contractors.

In considering the licensing of contractors it should not be overlooked that no citizen can be deprived of the right to do his own work; in other words, to be his own contractor. If the crook is barred from operations by a license law the owner-contractor will still be left to him for prey. So a license law, although it may do a great deal for the construction industry and for the public, cannot be expected to wholly eliminate frauds. A clever crook may influence a gullible owner to do his own work and employ him as superintendent of the job, in which capacity he might fleece the owner as effectually as if he posed as a contractor.

APARTMENTS

To Be Done by Day's Work.

APARTMENTS. Cost, \$20,000.
SAN FRANCISCO. N. Green, 70 W. Polk St.

Two-story and basement frame (4) apartments.

Owner—Mrs. Alama Conner, NW Polk and Green Sts., S. F.
Architect—Charles Fantoni, 550 Montgomery St., S. F.

To Be Done by Day's Work.

APARTMENTS AND FLATS. Cost, \$10,000 & \$6,000 resp.
SAN FRANCISCO. W. Alblon, 115 & 150 N. 17th St.

Two-story and basement frame (8) apartments, and 2-story and basement frame (2) flats.

Owner—Thomas Egan, 1359 Howard St., S. R.

Architect—J. C. Hladik, Monadnock Bldg., S. F.

To Be Done by Day's Work.

APARTMENTS. Cost, \$10,000.
OAKLAND. 394 49th St.

Two-story 12-room apartments.

Owner—Gray and Roberts, 2535 Telegraph Ave., Berkeley.

Architect—None.

Contract Awarded.

APARTMENTS. Cost, \$14,500.
SAN FRANCISCO. N. Lombard, 100 W. Powell Sts.

Three-story and basement frame (4) apartments.

Owner—A. Vatuoni, 460 Lombard St., S. F.

Architect—Paul De Martini, 946 Broadway, S. F.

Contractor—John Harder, 870 39th Ave., S. F.

Plans Being Figured.

APTS. & STORE. Cost, \$15,000.
SAN JOSE, Santa Clara Co., Cal. First and Reed Sts.

Two-story frame and stucco apartment and store building.

Owner—W. L. Romsel, San Jose.

Architect—Wolfe & Higgins, Auzaerals Bldg., San Jose.

Segregated Figures Being Taken.

APARTMENTS. Cost, \$24,000.
SAN FRANCISCO. Jackson St. near Buchanan.

Three-story frame and stucco apartment house containing six 4-room apartments.

Owner—Withheld.

Architect—E. E. Young, 2002 California St., S. F.

Segregated Bids Being Taken.

APT. & STORE BLDG. Cost, \$50,000.
BERKELEY, Alameda Co. Center St., bet. Shattuck Ave. and Oxford.

Alterations to apartment and store building.

Owner—Mrs. Bruner.

Architect—McWethy & Greenleaf, 2910 Telegraph Ave., Oakland.

To Be Done by Day's Work.

APARTMENTS. Cost, \$15,000.

Three-story frame and stucco apartment and store building to contain eight 3-room apts. and 3 stores on ground floor.

Owner—Withheld.

Architect—Fabre & Hildebrand, 110 Sutter St., San Francisco.

Plans Being Prepared.

APARTMENTS. Cost, \$15,000.
SAN FRANCISCO, SE cor. Union and Webster.

Two-story frame and stucco apartments (4 apts.)

Owner—Samuel H. Levin, 2055 Union St., S. F.

Architect—Reid Bros., 105 Montgomery St., S. F.

To Be Done by Day's Work.

REMODEL. Cost, \$50,000.
SAN FRANCISCO. NW Cor. Geary and Jones Sts.

Remodeling of interior of apartment bldg. and addition of 4 stores on first floor.

Owner—Julius Burghauer and John Holst, 105 Montgomery.

Architect—C. O. Clausen, Hearst Bldg., S. F.

LOS ANGELES, Los Angeles Co., Cal.

Architects Russell & Alpaugh, 1106 Story Bldg., will take bids soon for the finishing of a 13-story reinforced concrete apartment building at the northwest corner of 6th and Carondelet Sts., for Sutherland, Barry & Co., John E. Sutherland, Pres., New Orleans, La.; building at present is constructed up to 9th floor and will have 240 rooms arranged into 104 apartments, lobby, etc., plus 10,000 sq. ft. plaster exterior, cast stone trim, electric heating system, 2 electric passenger elevators, refrigerating system, tiled baths and drainboards, wall beds, plate glass, composition roof, hardwood floors and trim, ornamental iron work.

SEATTLE, Wash.—A. S. Hainsworth, National Bank of Commerce Bldg., at approx. \$250,000 awarded contract by Architect J. Lister Holmes, Pantages Bldg., to erect "Sovereign" apartments at Union St. and Boren Ave.; 5 story and basement, brick and ordinary masonry construction faced with cast stone; will contain 50 two and three-room suites.

LOS ANGELES, Cal.—Arch. H. J. Reed Barrett, 243½ S. Western Ave., is preparing wks. plans for a 12-story and basement class A apt. bldg., cor. Wilshire Blvd. and Highland Ave.; each flr. to have one 9-rm. apt. with 2500 sq. ft. flr. space; reinf. conc. cast stone and stucco or terra cotta facing, comp. tile baths and showers, tile drainbds., 2 elevators, dumb waiters, hdwd. and pine trim, steam htg., cast stone mantels; \$200,000.

ESCONDIDO, San Diego Co., Cal.—Esccondido high school dist. will again hold bond election on June 6, at which time it is proposed to vote \$123,000, proceeds of which would be used to build new high school.

SAN BERNARDINO, San Bernardino Co., Cal.—San Bernardino county has advertised for bids on the \$450,000 courthouse bond issue voted May 5. Architects Howard E. Jones and De Witt Mitcham have started preparation of working plans and it is expected that work will start about Oct. 1.

Contract Awarded.

APARTMENTS. Cost, \$12,000.
OAKLAND, Alameda Co., Cal. 1227 1st Ave.

Two-story 8-room apartments and stores, addition.

Owner—P. M. Clecak, 1227 1st Ave., Oakland.

Architect—None.

Contractor—Frank Critchett, 139 Grand Ave., Oakland.

Contract Awarded.

APARTMENTS. Cost, \$20,000.
SAN FRANCISCO. N. Sutter 135 E. Gough St.

Three-story and basement frame (15) apartments.

Owner—Timothy & Margaret O'Leary, 3483 Sacramento St., S. F.

Designer and contractor—Evans & Co., 359 Pacific Bldg., S. F.

To Be Done By Day's Work.

APARTMENTS. Cost, \$34,500.
OAKLAND, Alameda Co., Cal. W. Lee 242 N. Grove.

Three-story 39 room apartments.

Owner—T. E. Ostbourne, 333 Park View Terrace, Oakland.

Architect—A. W. Smith, American Bk. Bldg., Oakland.

Contract Awarded.

APARTMENTS. Cost, \$20,000.
OAKLAND, Alameda Co., Cal. E. Emerald 225 N. 41st St.

Two-story 26 room apartments.

Owner—J. E. and A. Bouquet, 63 Santa Clara Ave., Oakland.

cisco.

THIS MUST be the open season.
FOR LUMBERMEN.
FOR THE Rotary Club.
OF SAN Francisco.
ELECTED MATT Harris.
OF THE Van Arsdale-Harris Lumber
Company.
PRESIDENT of their club.
AND THE Rotary Club.
AT AUBURN, California.
ELECTED ED. Robie.
OF THE Auburn Lumber Co.
AS ITS president.
DOWN AT Tulare City.
WHERE SANDY Pratt, producer.
OF SAND, crushed rock.
AND WASHED gravel.
WAS BORN and raised.
LIVES SANDY's brother, Leonard.
ALSO A lumberman.
THEY ELECTED Leonard Pratt.
EXALTED RULER of the Elks.
IN SANDY's home town.
AND IF the missing precincts.
WERE HEARD from.
NO DOUBT an army.
OF WOOD merchants.
WOULD BE in power.
ALL OVER the country.
AND THEY are hard.
TO "SHAKE."
ONCE THEY get the big "stick."
THEY "FINE."
TO HOLD office.
AND THEY "spruce" up.
AFTER THEIR election.
THEIR WIVES (May Hoganey).
WEAR "KNOTS."

IN THEIR hair.
AND CARRY a "stick" (cane).
ANYWAY, SANDY Pratt, president.
OF THE Pratt Building Material Co.
DOUGLAS 300—"easy to remember."
SHOULD WORRY about lumbermen.
MOST OF them.
HAVE SAW mills.
AND OPERATE logging trains.
AND SANDY sells "engine" sand.
FROM THE American River.
AT SACRAMENTO.
OR THE Yuba River.
AT MARYSVILLE.
OR MONTEREY Bay.
AT PRATTO (near Hotel Del Monte).
TO THESE lumbermen.
ALL LOCOMOTIVES like humans.
MUST HAVE "sand."
TO KEEP them from slipping.
AND SANDY has the "sand."
FOR HIS own self.
AS WELL as all locomotives.
"I THANK you."

Somebody left the gate (made of wood) open and they let the above three lumbermen in—all grabbed a gavel (made of wood). Sandy Pratt, president of the Pratt Building Material Company and producer of clean, sharp sand, hard, crushed rock and washed gravel is for the lumbermen, because you have to use their lumber for the "forms" for concrete.

Segregated Figures Being Taken.

Official Proposals

NOTICE TO CONTRACTORS

Road Construction—Bnr. Yds. & Docks

SEALED PROPOSALS, indorsed "Proposals for a road at the Naval Radio Compass Station, Point Saint George, California, Specification No. 5037," will be received at the Public Works Office, Navy Yard, Mare Island, Calif., until 11 o'clock a. m., Wednesday, June 10th, 1925, and then and there publicly opened, for constructing a road from Radio Compass Station, Point Saint George to the County Road at Crescent City, Calif., Specification No. 5037, and accompanying drawing may be obtained on application to the Bureau of Yards and Docks, Washington, D. C., or to the Commandant, Navy Yard, Mare Island, Calif. Deposit of a check or postal money order for \$10.00, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on June 15, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Nevada and Sierra Counties, between Floriston and Nevada State Line (H-Nev-Sie-38-B and A), about six (6.0) miles in length, to be graded and surfaced with crushed gravel or stone.

Placer County, between Auburn and three-quarters mile north of Colfax (H-Pla-37-A, B & C) about fifteen and seven-tenths (15.7) miles in length to be surfaced with a bituminous seal coat.

San Luis Obispo County (V-S.L.O-2-E), two reinforced concrete girder bridges, 24 feet wide, one across Villa Creek at Pismo, consisting of six 30 foot spans on concrete pile bents, the other over Southern Pacific Railroad near Pismo consisting of three 35 foot and six 30 foot spans on concrete bents. Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the office of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are at Los Angeles, Williams, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVEREDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.

W. F. MIXON, Secretary.
Dated: May 18, 1925.

NOTICE TO CONTRACTORS

(Emigrant Gap National Highway—Donner Pass and Donner Pass Extension Sections)

Sealed proposals for surfacing the above-named National Highway, located within the Tahoe National Forest, Placer and Nevada Counties, California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 400 Bay Building, 9 Main St., San Francisco, California, until 10 o'clock A. M. on the 2nd day of June, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The project to be surfaced is located at Summit Station, California, about 8 miles west of Truckee and is approximately 6.86 miles in length. The principal item of work is as follows: 15,700 cu. yds. Crushed Rock Surface.

Construction shall be started within fifteen days after notice of award of contract has been given to the contractor by the District Engineer. The work shall be completed within one hundred and fifteen (115) weather working days after said notice of award of contract is given.

The contract form, maps, plans and specifications may be examined by responsible contractors at the following addresses:

400 Bay Building, 9 Main St., San Francisco, California
California Highway Commission,
Forum Bldg., Sacramento, California.

The Bureau has available for loan to contractors on a rental basis, equipment at Governor's Island, Oakland, California, as listed in the specifications. Bidders will state in his bid the Government equipment that he will use during construction and minimum time required. The estimated rental will be taken into consideration and award will be made on the bid to the best advantage of the Government. The Government will furnish explosives in accordance with the terms of the specifications.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and experience and upon deposit of check for \$10.00 payable to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the terms of the specifications.

Architect's Preliminary Estimates

ance with the instructions forming a part of the specifications above referred to.

C. H. SWEETSER, District Engineer.

NOTICE TO CONTRACTORS

(Snpt. Residence—Ventura, Cal.)

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Bldg., Sacramento, California, up to 2 o'clock P. M., Tuesday, June 16th, 1925, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the Superintendent's Residence, California School for Girls, near Ventura, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and specifications will be on file for inspection only, at 818 Pacific Finance Building, Los Angeles.

The contract for this work will include the Residence, Garage, sidewalks, driveway, fence, grading around the site and service connections. The California School for Girls is located about 3 miles from the city of Ventura, in Ventura County, California.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and Specifications, the deposit to be returned immediately upon the return of plans and specifications to the Division of Architecture, at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope "Proposal for Superintendent's Residence, California School for Girls."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,

State Architect.

W. F. McCLURE,

Director of Public Works.

NOTICE TO BIDDERS

(Electrical Apparatus—Alameda)

Notice is hereby given that the Board of Public Utilities of the City of Alameda will receive bids for furnishing 2-48 K. V. A. Regulators and certain other electrical apparatus in accordance with specifications on file in the office of the Secretary of said Board to which bidders are referred to for full particulars.

All bids must be sealed and marked "Proposal for Regulators and Certain Other Electrical Apparatus" and must be delivered to the Secretary of the Board of Public Utilities at 1114 Park Street, Alameda, Cal., before 5 o'clock p. m., Friday, May 29th, 1925. No bids will be considered which are handed in after the time mentioned.

The Board of Public Utilities reserve the right to reject any and all bids.

By order of the Board of Public Utilities, Alameda, Cal.

A. D. GOLDSWORTHY,
Secretary.

May 18th, 1925.

Engineering News Section

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

BUSINESS OPPORTUNITIES

(Continued from Page 19)

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advancement Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

9177—San Francisco, Cal.—Representative of an Eastern manufacturer of complete radio sets, phonographs, and combination radio-phonographs, is in San Francisco to select an export firm to handle foreign business. Machines are said to be moderate in price, and suitable for Oriental and Australian markets. Machines are being demonstrated in San Francisco show rooms and appointments can be made by interested parties through the Foreign Trade Bureau.

9178—Oslo, Norway. Foreign trade firm desires to purchase Ebonite powder suitable for use in making knobs and fittings for radio sets and also machines for compressing this powder; also desires to purchase gasoline motors for canoes and pleasure boats, of one-half to one horsepower. This company wishes to act as representative in Norway for an established San Francisco firm and invites correspondence. Best references will be supplied.

9181—Indianapolis, Indiana. Manufacturers of electric grills for toasting

sandwiches, used by lunch houses, electric toasters, hot plates, and electric irons, for domestic use, wish to appoint an active San Francisco exporters to develop the foreign market from San Francisco.

9184—San Francisco, Cal.—The following stocks of the British Government are being offered for sale: Tanks, electrical generating sets, engines and boilers, pumps, electrical plant, transformers, machine tools, fans and blowers, air compressing plant, cranes and lifting gear, weighbridges. Complete catalog and fullest information can be obtained at the British Consulate General, Alaska-Commercial Building, San Francisco.

9185—United Kingdom. British manufacturers of hemp rope and superior patented wire wish to select a suitable San Francisco import firm or manufacturers' agent to represent them on the Pacific Coast.

D-1547—Baltimore Md. Manufacturers' Agents, Importers and Exporters desire connection with California manufacturers or distributors wishing representation in their territory.

CLYDE

HOISTS and DERRICKS

"Equipped by Clyde" has become a mark of distinction in the construction field. More and more are complete Clyde outfits being purchased. The resulting splendid service justifies the expenditure.

Illustrated here is a Clyde 20-ton guy derrick with a 115 foot boom operated by a Clyde two drum electric hoist. Both are owned and operated by the Phoenix Utility Company on the \$10,000,000 development for the Minnesota Power & Light Co., at Fond du Lac, Minnesota.

The outfit handles all material excavated for a large power house and was one of six similar installations used on the project.

Clyde Electric Hoists are built with all the thoroughness found in any other Clyde unit. They are provided with specially designed motors, automatic mechanical brakes in addition to foot brakes, rugged drum type controllers, semi-steel friction drums, and gears with machine cut teeth. The lever arrangement is designed for easy and instantaneous control.

Additional information given cheerfully.

You'll Take Pride in Your Clyde!

NEW TYPE OF HOME PREDICTED BY DECORATOR

"America's new art in the decoration of homes will be derived from the inspiration of the physical possibilities of concrete arched doorways, curved ceiling; plastic conceptions of the wall surfaces of rooms will all be revolutionized through the use of concrete," said Jules Bouy, interior decorator of Paris and New York, to a group of architects and officials of the Lehigh Portland Cement Co., at the Architectural & Allied Arts exposition in New York.

Mr. Bouy stated that America has been long chided for its lack of individuality in homes. "It has been said that every apartment interior looks nearly like every other apartment interior. Through the flexible use of concrete, an individualistic and highly personal form of interior architecture has arisen.

"I predict that the modern interior architectural art will be marked by the highest form of fundamental artistry that will have limitless possibilities for individuality and for impressing the soul of the artist in terms of the needs of the home builder."

FRAUD CHARGED IN SEATTLE BOND SALES

Control of the City Council of Seattle by a group of bond houses, who are declared to have used their influence to "defraud the city" of large amounts through illegal discounts on city bonds and by jockeying contractors' estimates, is charged in a complaint filed in United States District Court in San Francisco.

The charges are made by two San Francisco men, Robert B. Muir and R. C. Storrie, partners in the general contracting firm of R. C. Storrie & Company, with offices in San Francisco.

They make allegations concerning the handling of Seattle's big municipal power development on the Skagit river a portion of which, the Gorge Plant tunnel, they constructed. Their claims are embodied in an answer and cross-complaint to a suit brought against the contracting firm April 16 by R. M. Grant & Co., Inc., a bond house, for collection of \$177,425.

John L. McNab, San Francisco attorney, represents the Storrie Company. The complaint alleges:

1.—That in 1921 a group of bond houses controlled the Seattle city council and the engineer in charge of the Skagit river project.

2.—That the law authorizing the sale of bonds for this project specified that the bonds must be sold at par, without discount.

3.—That the bond houses represented they would be unable to sell the bonds for more than 95 cents on the dollar in the market.

4.—That the contractors should agree to defray a part of this loss by a payment to the bond houses, and that an agreement be drawn up providing for the ostensible purchase of the bonds by the contractors and their delivery to the bond houses at 83 cents on the dollar.

5.—That the contractors were to be reimbursed by "concessions" from the council and the engineer in charge.

6.—That these "concessions" would be in the nature of cash advances which would not be repaid, and further, the purchase by the city of various items of contractors' equipment.

There was a hitch in carrying out the program, however, the complaint indicates, with the result that the work was actually carried out at an alleged loss to the contractor.

UNEMPLOYMENT ON DECREASE SAVS LABOR CHIEF

With building and harvesting operations over the state continuing active unemployment in California has shown a marked decrease, according to a report of the San Francisco branch of the United States Employment Service. Only in the lumber industry has the unemployment shown an increase.

In a report along similar lines, Walter G. Mathewson, state labor commissioner, declared the building activity in the state is unusual and that labor in building materials alone showed an increase of 13 per cent. An increase in employment by iron and steel forging companies was reported at 16 per cent.

\$6,000,000 FOR PEARL HARBOR IS PROPOSED

The naval sub-committee will recommend an appropriation of \$6,000,000 for the Pearl Harbor naval base in the Hawaiian Islands.

This was the assurance brought to San Francisco by W. B. Oliver, congressman from Alabama, who, with Congressman W. B. Ayres of Kansas and John Tabor of New York, all members of the naval sub-committee of the House appropriations committee, arrived in San Francisco from Hawaii after witnessing the army-navy maneuvers.

The \$6,000,000 fund, which was authorized, but not appropriated by the last Congress, will be used for the deepening and widening of the channels of the marine approach to Pearl Harbor.

It will also be recommended that the Government place a dredge at Pearl Harbor, and take other steps to insure competitive bidding on the project, Oliver said.

The Pearl Harbor project, along with projects for the improvement of harbors at Honolulu, Hilo, Maui and Kaula, will necessitate total expenditures of \$10,000,000, the congressman indicated, pointing out that up to the present time maritime improvements by the Government in Hawaii have totaled less than \$6,000,000.

Of the \$10,000,000, the Hilo project, next in importance to that of Pearl Harbor, will cost \$2,000,000.

RENTS KEEP UP

Although the general cost of living has decreased nearly one-fifth (19.2 per cent) from the peak in July, 1920, rents still hover close to the highest level they ever reached, which was in July of last year. Average rental rates, having climbed last July to a point 86 per cent higher than they were at the beginning of the war, today are still 82 per cent higher, according to the cost of living computation of the National Industrial Conference Board. Although slow and small, the decline in average rents during the past seven months has been consistent. During the last four months, including March, the greatest number of increases in rents are reported from eastern cities, while the preponderance of changes in the Middle West and South was toward lower rents.

LUMBER PRODUCTION DECREASES

Production of lumber in the United States last year decreased 4 per cent, as compared with 1923. This is shown in data collected by the Department of Commerce in its annual census of forest products taken in co-operation with the Department of Agriculture. This census covers the lumber out of 769 large sawmills, each sawing 5,000,000 feet or more in either year. The total lumber cut in 1924 was 16,210,107 thousand feet, board measure, as against 16,910,026 the preceding year.

Gains were noted in Alabama, Florida, Georgia, Idaho, Missouri, New Mexico, Tennessee and West Virginia, all other states showing decreased production.

Tests Show Imported Cement to Be Inferior to American Product

ALONG THE LINE

Resolution Adopted At Statewide Mineral Conference Held in Los Angeles Protesting Against Use of Foreign Cement—Tentative Ordinance Adopted for Use of Cities, Counties and State Contains Rigid Cement Specifications—Civil Organizations Asked To Co-Operate To Place Reasonable Duty on Importation of Product.

At a statewide mineral conference held in Los Angeles last week a resolution was adopted strongly protesting against the use of imported cement. It was pointed out at the meeting that repeated tests had shown the foreign product to be inferior to American cement.

A tentative ordinance for all cities, counties and the state to adopt containing rigid cement specifications was submitted at the meeting.

Herewith is published the resolution suggested for adoption by the Southern California Section of the Statewide Mineral Conference, Cement and Gypsum Manufacturers Group:

WHEREAS, foreign cement is being imported in considerable quantities to California ports, and

WHEREAS, some years ago there was a duty of 32 cents per barrel on all imported cements, which duty does not now exist, and

WHEREAS, most of the imported cements coming into the California market are from Belgium, in Belgian francs is only worth today, in American money, one-fourth of what it was in pre-war days, cement manufactured abroad can and does compete in this market because of this deflated exchange rate, and

WHEREAS, the manufacturers of local cement consume large quantities of fuel oil, power, powder, gypsum, bags, and iron and steel products and employ much skilled and unskilled labor and are a very material part of the business and economic welfare of this community and all parts of the state of California, and

WHEREAS, in addition the railroads, which in turn employ much skilled and unskilled labor and buy many supplies, enjoy millions of dollars worth of freight business from the cement companies when cement manufactured in California is used in place of foreign cement, and

WHEREAS, every barrel of cement manufactured in California carries with it its proportionate share of the Federal, State, County and City taxes, which goes for proper protection and administration of the welfare of citizens of this State, and

WHEREAS, most of the foreign cement imported is stored in warehouses at the ports where it deteriorates rapidly on account of damp air, and

WHEREAS, tests made on such cement on its arrival are not properly representative of the cement after it has been stored a relatively short period of time, and

WHEREAS, imported cements which have become lumpy from exposure to dampness have been reconditioned and resacked, frequently in sacks of other brands, and

WHEREAS, considerable quantities of foreign cement have failed to pass the standard tests on arrival at the ports, but such cement is sold and used in construction work by people who are not aware of its poor quality, and

WHEREAS, the Board of Public Works of the City of Los Angeles has found that the average test of local cements show approximately 25 per

cent greater strength than the average tests on the foreign cements received here, and

WHEREAS, foreign cements which have failed to pass standard tests are sold to an unsuspecting public, and

WHEREAS, there is a great underlying preference for home products, for any or all of these reasons; there is an inclination on the part of public bodies to specify that only American made cements be used in work under their jurisdiction, and this is also true of the War Department of the U. S. Government; therefore,

BE IT RESOLVED, that the Statewide Mineral Conference is hereby requested to use its utmost influence with architects, engineers and public bodies to protect domestic producers of cement, to adopt specifications or ordinances reading as follows:

"Portland Cement"

"All cement shall be true Portland cement and must conform to the following requirements and be subject to the following test which will be open to the contractor. Samples for test may be taken from any package delivered or proposed to be used upon the work, and unless they meet the requirements herein specified such package or packages of cement will be rejected."

"No cement shall be accepted, tested or permitted to be used unless delivered in the original unopened packages, filled at the cement mill and with the manufacturer's name and the brand of the cement plainly marked thereon. Each sack must contain not less than ninety-four (94) pounds net of cement. Such sacks of cement must be uniform in weight and the sacks shall be whole and unbroken. The cement must be dry and free from lumps that cannot be crushed to powder with the fingers."

"No cement shall be used which has been mixed in any way with any other brand or quality of cement or which has been tampered with in any way after having been placed in the original package of the manufacturer, nor shall any cement be used from any packages containing lumpy cement or cement which has been recondored. To prevent sifting or loss of weight, and for protection from moisture, all cement that has been transported by water must be in paper-lined cloth sacks, the paper liners to be stout, with open mouths, or the sealed type with valves for filling."

BE IT FURTHER RESOLVED, that this Statewide Mining Conference of California is hereby urged to seek the cooperation of such bodies as the Los Angeles Chamber of Commerce, San Francisco Chamber of Commerce, and the California Development Association, in putting such ordinances into effect by addressing communications to all other Chambers of Commerce in the State of California, as well as to State, County and Municipal authorities on this matter."

BE IT CERTAINLY RESOLVED, that the members of this conference and all their associates use their best efforts with the California Congressional delegation to the end that a reasonable duty be placed upon the importation of true Portland cement.

Batcheller and Kneen, consulting engineers, have opened offices at 929-930 Dexter Horton Bldg., Seattle. Both members of the firm have been connected with the manufacturing industries of the Pacific Northwest and Alaska for a number of years. W. T. Batcheller has specialized for several years in power development and industrial power application. C. H. Kneen has specialized in production, plant layout, and industrial management.

Leslie Engram, city clerk of Redding, in a report to the city council reports that the Redding Municipal lighting system cleared \$31,891.97 for the city in the last fiscal year. He estimates the profits for this year at \$35,000. When the system was acquired in 1921 by purchase from the Pacific Gas & Electric Company there were 1069 consumers. The number now is 1346.

F. D. Butler, formerly of the Loop Lumber Company, San Francisco, has arrived in Oroville to become vice president and general manager of the Swayne Lumber Company, a position made vacant by the death of Warren H. Swayne. Butler is the brother of Mrs. W. H. Swayne.

C. D. Windham, city manager of Long Beach, announces bids will be considered on June 26 to construct approximately 6984 lineal feet of rubble mound breakwater, 4242 lineal feet of rubble mound moles, and 2028 lineal feet of rubble mound bulkhead. The project will involve approximately 1,800,000 tons of rock.

The Oakdale and South San Joaquin Irrigation Districts in Stanislaus and San Joaquin counties, at a recent election, voted bonds of \$2,200,000 to finance construction of the Melones dam project. Each district voted \$1,100,000.

R. M. Dorton, present city manager of Pittsburg, Contra Costa County, has been appointed city manager of Monterey. His appointment is effective at once with a salary of \$4800 a year.

J. A. Tassi, formerly operating as a superintendent of construction, has opened offices in the Adam Grant Building, 114 Sansome Street, San Francisco, and will engage in the general contracting business.

LOS ANGELES BUILDING IN APRIL 814,498.031

Los Angeles building in April totaled \$14,498,031. During the month 4040 permits were issued. This total is slightly under that for March, when 4264 permits with an estimated valuation of \$14,714,002 were issued. It is the first monthly total for 1925 to show an increase over the same month last year. In April, 1924, the city building department issued 4541 permits with an estimated valuation of \$13,224,568.

APRIL CEMENT OUTPUT

Production of Portland cement in April amounted to 13,807,000 barrels, compared with 11,726,000 barrels in April, 1924. Geological Survey states shipments in April totaled 14,594,000 barrels, compared with 12,771,000 barrels shipped in April, 1924. At the end of April, stocks of finished Portland

cement on hand amounted to 19,882,000 barrels, compared with 20,469,000 barrels at the end of March, and 17,159,000 barrels at the end of April, 1924. In the first four months of 1925, production was 41,952,000 barrels, against 39,420,000 in the same period of 1924. Shipments in this period of 1925 totaled 35,850,000 barrels, compared with 32,309,000 barrels shipped in the first four months of 1924.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SANTA CLARA COUNTY BUILDERS TO HOLD ANNUAL BANQUET

The thirty-fifth annual banquet of Santa Clara County Builders' Exchange will be held Wednesday evening, June 6, in the Commercial Club, San Jose, according to an announcement of W. L. Howe, executive secretary of the organization.

Real eats, ultra-superfine entertainment and barrels of fun are assured by the committee in charge of arrangements. Dinner will be served at 6:30 and will be followed by an open house meeting at the Exchange headquarters, 76 W. San Antonio St. A large number of visiting members from the bay region and from the San Joaquin valley will attend. At the open house meeting after the banquet plans for the annual picnic of the exchange will be made. Secretary Howe has assured all members that speeches will be few and snappy, leaving plenty of time for eating and entertainment.

L. A. CONTRACTORS OPPOSE WAGE INCREASE FOR BRICKLAYERS

Declaring conditions do not warrant any increase in construction costs, Southern California Chapter, Associated General Contractors, at a recent meeting went on record as opposed to the increase in wages of \$1 per day for bricklayers demanded by the union effective May 9 on jobs contracted for subsequent to March 15. Bricklayers have been receiving \$10 per day for 8 hours. Following is the resolution adopted by the Chapter:

"Whereas, it has come to our attention that there has been a discussion concerning a rise in bricklayers' wages; and,

"Whereas, we deem that the \$10 scale which has prevailed for several years past, is an example working wage for this craft is our community; and,

"Whereas, we believe that a rise in wages at this time would discourage projected construction; now, therefore, be it

"Resolved, that the Southern California Chapter of Associated General Contractors of America is hereby opposed to raising the wages of bricklayers at this time."

MILLWORK MEET POSTPONED

The quarterly meeting of the Millwork Institute of California, which was to have been held at Fresno May 22 and 23, has been postponed to June 12 and 13. Hotel California, Fresno, will be the headquarters for the convention. H. T. Diedrich, managing director of the Institute, with headquarters in Los Angeles, has been confirmed in his bed as the result of an accident, but expects to be out soon.

OPEX SHOP ADOPTED

The Painting & Decorating Employers' Association of Boston announced that they have withdrawn all offers to the painters' union and will henceforth proceed on an open shop policy. They offer a maximum of \$1.10 an hour to experienced painters. All further conferences with union committees have been called off.

S. F. Builders Hold Annual Banquet

The thirty-fifth annual banquet of the San Francisco Builders' Exchange held Saturday evening, May 23, at the Fairmont Hotel was a huge success, more than seventy-five per cent of the membership being seated about the tables.

Festivities were opened by Wm. H. George, president of the exchange, who, in a brief talk reviewed the activities of the exchange since the last annual social.

A. C. Rice of Salt Lake City and chairman of the Open Shop Conference, was the principal speaker of the evening, his topic being "Builders of a Great City." He paid glowing tribute to the members of the exchange for the stately structures erected in San Francisco and closed his talk with words of praise for the people of San Francisco who erected a metropolitan city

from a field of ashes in a remarkably short period.

During the banquet selections by Bobba's orchestra were interspersed with solos, dancing numbers and vaudeville, while the Neapolitan Quartet sang several requested songs, Pearl Chow, diminutive Chinese girl, lent an Oriental air to the affair in her "Dances of the Far East."

Committees in charge of the banquet follow:

Committee of Arrangements—Emil Hogberg, L. J. Neal, Walter S. Jamieson, S. A. D. Schenck.

Reception Committee—L. J. Neal, C. J. Hillard, Alexander Mennie, Wm. Feary, S. F. Cohn.

Publicity Committee—J. W. Bender, Wm. Feary, Walter N. Reed, C. J. Hillard and S. F. Cohn.

Alameda Builders Plan Entertainment

H. E. Bettinger of the Tyre Bros. Glass Company, has been appointed general chairman of a committee to arrange for an entertainment to be staged by the Alameda County Builders' Exchange. The affair will be held the latter part of next month.

As far as possible all talent will be selected from the exchange membership and members are requested to make known their qualifications to the Entertainment Committee.

Committees in charge of arrangements follow:

Entertainment—L. B. Kirby, Cowell Lime & Cement Co.; Jas. B. McKeon, J. B. McKeon Roofing Co.; Henry Caplan, W. P. Fuller Paint Co.

Promotion—Kenneth Graham, Atlas Heating Co.; A. B. Breenberg, Judson Mfg. Co.; Victor Treadwell, Calif. Pottery Co.; Jesse Stevens, Rice Sign Co.

Refreshments—Paul F. Cunningham, General Fireproofing Co.; Rex Thompson, Pacific Portland Cement Co.; Frank B. Moller, concrete contractor.

Building Trades of Country Busy

The building trades industry—considered a dependable barometer of business conditions throughout the country—shows building construction for the first three months of 1925 to have reached the stupendous proportion of \$1,750,000,000, according to a survey just made public by the Indiana Limestone Quarrymen's Association.

The report was compiled from figures gathered from several hundred cities and towns and declares that in addition to the deflation of artificial optimism in industry, it shows an un-

precedented soundness in business generally and in the construction business in particular.

Chicago is in the van with the greatest amount of building activity. Permits taken out in the first three months of the year total \$200,000,000 with the following cities in the order of their volume:

Philadelphia, Detroit, Los Angeles, Cleveland, Baltimore, Boston, San Francisco, St. Louis, Kansas City, Seattle, Milwaukee, Pittsburgh, Indianapolis, Minneapolis, Dallas, New Orleans and Atlanta.

PORTLAND CARPENTERS SEEK WAGE INCREASE

Portland, Ore., carpenters at a general meeting voted to seek an increase in wages of \$19 a day and double time for overtime. The craft now receives \$8.00 a day and time and one-half for overtime.

"KORREKT"

Professor—"Can anyone in this class tell me what steel wool is?"

Ple Bate—"Sure! Steel wool is shearing from hydraulic rams."

A NEAR ACCIDENT

"We weren't doing anything like thirty your honor. We may have been hitting it up a little when we struck the hill, but we were down to twenty miles within two car lengths."

Next Witness: "We never went faster than fifteen miles, your honor, and when we came to the cross road we slowed down to ten."

Defendant: "We were practically at a standstill when the officer came up."

The Court: "I'll have to stop this thing now or you'll be backing into some one. Twenty-five dollars." — American Motorist.

TRADE NOTES

E. J. Goodpastor has become associated with Ennis and Brown in the Enwood Sand and Rock Company at San Jose. Goodpastor, who is president of the Santa Clara Gravel Company, will have entire management of the Enwood company's business. Harry W. Flint who has been associated with the Ennis and Brown interests for more than ten years will continue as superintendent of plant operations.

R. J. Patcha & Son of Kentfield, Marin County, have purchased a site in Fourteenth street, Richmond, served by the Santa Fe Railway and will establish a marble yard. Approximately \$20,000 will be expended in the plant. Patcha, who was formerly connected with a San Francisco marble concern, reports that the new plant will operate with a force of between ten and twenty men.

A certificate of co-partners transacting business under a fictitious name has been filed with County Clerk Henry A. Pfister at San Jose by Evered H. Norton and Harper K. Phelps, who set forth that they are transacting a business in the town of Los Gatos under the name and style of Norton-Phelps Lumber Company and that they are the sole owners and only persons interested in the enterprise.

The Beecher Company, contracting furnishers and decorators, formerly located at 788 Mission street, has moved to a modern structure at 1161 Mission street. The new home is reported to be the most complete and up-to-date furnishing and decorating establishment on the Pacific Coast.

Maisier Brothers Lumber Company has purchased a tract of land in the Austin Terrace Tract, Fresno, and plans an expenditure of \$150,000. A number of residences, an apartment house and a business block will be erected.

BRIGHT INDUSTRIAL OUTLOOK FOR EAST BAY

With many manufacturing plants operating at capacity, and some on two shifts, the industrial situation in the East Bay cities "continues to improve," according to the weekly report of the Pacific division of the U. S. department of labor, just released. Building trades are very active, the report says.

"A vast amount of small houses, apartment houses, industrial plants and several large buildings are under construction in Oakland," the report states. "However, there is a surplus of workers in all lines, excepting bricklayers, structural steel workers and first class plasterers. Extensive building is progressing in Berkeley and an increasing number of residences is being erected in Alameda."

WORLD'S LARGEST BUILDING

What promises to be the largest building in the world was outlined in Chicago at a meeting attended by more than 100 leaders in the farming industry from every part of the United States. The structure will be known as the American Agricultural Mart. It will contain 3,000,000 square feet of rentable space and will be approximately 800 feet long and 320 feet wide.

Changes in Cement Imminent in Germany—Higher Grades Talked

(Reprint from Engineering News-Record, New York)

Reports of the annual meeting of the German Portland Cement Association at Berlin on March 11-13, 1925, indicate that the manufacturers of cement there are making a most intensive study of the so-called high-grade portland cements, that is, cements that will give early (1- to 2-day) strengths comparable to the alumina cements recently put on the market. The chairman reported that scientific investigation has been active in this field and it seems that it will result in new discoveries and show new paths to better accomplishment.

Revision of Standards

A final report on the activities of the committee on standards and proposed changes from the present standards could not be given, because not enough has been learned in the field of high-grade portland cements, and investigations in that field have not yet been concluded. The presentation of a new set of standards would, therefore, in the opinion of the committee be premature; it was advisable to await the results of the test now being made in order to be able to provide standards for high-grade cements also. However, the results already obtained justify proposing figures for the minimum strength of high-grade portland cement under compression, namely 250 kg. (3550 lb. per sq. in.) after 3 days, and 450 kg. (6300 lb. per sq. in.) after 28 days combined setting.

In the discussion which followed it was proposed to set temperature limits within which these hardening tests must be conducted. In the case of these high-grade cements the strength figures depend to a large extent on the temperature, a fact not previously taken into account. Entirely different figures are obtained for high-grade cements depending on whether they are allowed to harden at 10 to 12 deg. C. or at 15 to 18 deg. C. Great care must be taken not to assume that the figures obtained in the laboratory will represent actual conditions in the field exactly. It was pointed out that a bill proposed by the Ministry of Communications called for a strength test not of 150 kg. (6300 lb. per sq. in.) after 28 days but of 500 kg. (7100 lb. per sq. in.).

Laboratory Activities

Dr. G. Haegemann gave the report on activities of the association's laboratory. He said that the results on general cement testing, both for standard portland cements and for high-grade cements, have been entered into a comparative table. This table showed that in the case of the 159 standard type portland cement samples tested in the year 1924 the retention on the screen was on the average less than for the previous years. The specific weight of portland cement has remained unaltered for the past ten years. The binding properties were the same as for the year before, but the strength values showed an increase in certain respects. The average value of the strength under compression after 28 days setting under water was 41 kg. (485 lb. per sq. in.) and after 28 days combined setting 82 kg. (1225 lb. per sq. in.). The tests show that 18 percent of all the plants are in a position to manufacture a portland cement which will show a strength test of over 350 kg. (4970 lb. per sq. in.) after 28 days setting. In the matter of the high-grade portland cements, whereas only two mills were

manufacturing this product in 1923, by September, 1924, fifteen works were engaged in manufacturing such cement. Special cements are now being manufactured which after 3 days setting under water show a strength of 400 kg. (5680 lb. per sq. in.) and after 28 days combined setting a strength of over 700 kg. (9940 lb. per sq. in.). This is a distinct advance. The tensile strength also increases with increasing strength under compression. In any case, high-grade portland cements are now in a stage of active development.

Strength tests with alumina cements show that the compression strengths are very high, but the tensile strengths are lower than those for high-grade portland cements. Blast furnace and slag cements were investigated and experiments were conducted on the utilization of ashes and lignite slags. A series of tests was made on high-grade portland cements, in which it was found that one part of high-grade cement costs as much as 1 1/4 parts of ordinary cement. Investigations were made to determine whether mixtures of one part of high-grade cement with sand showed the same properties as the mixtures with 1 1/4 parts of ordinary cement. Equivalent results were obtained with one brand, but in the case of other brands the results were not so good.

Standard Tests

One part of the discussion was devoted to the standard tests for cement. Comment was made on the variability which results from variation of testing room temperature. It was stated, too, that screen tests could make no claim to exactitude and that variation in the methods of tempering the test pieces did not conduce to certainty of results. Finally, doubt was expressed as to the suitability of the standard sand for testing. It was stated that all other countries have a larger proportion of fine sand in their standard sand, and it may be that the higher strength figures obtained, for example, in Holland, Switzerland and many other countries are to be ascribed not only to different methods of testing but also to the different standard sand. It was remarked that in selecting the German standard sand attention was not devoted to obtaining the best strength figures but merely to finding the most suitable sand. The standard methods result in obtaining unified testing methods which have nothing to do with the magnitude of the strength figures.

Dr. H. Kuhl of the government laboratory at Berlin-Lichterfelde discussed the problem of cement testing without regard to the problem of cement standards. There is a large range of properties which are not standardized as, for instance, resistance to chemical attack and against mechanical wear. Fineness is included in the standards, but we are approaching the time when the determination of fineness by screen tests alone will no longer be possible. Screening data are no longer comparable if the cements are ground in different types of mills. Air separation has not found application in the laboratory owing to the fact that the apparatus has not been sufficiently developed. The sedimentation method with alcohol is too complicated for use in the plant. Another method for the investigation of the fine particles of cement is indicated in a proposal in which the surface of a substance absorbs radioactive substances more

strongly the finer the particles of the absorbing substance are. The cement could be shaken up with an alcoholic solution of a radioactive substance and in this way the fineness of the particle determined.

WHOLESALE PRICES DECLINE IN APRIL

A sharp decline in the general level of wholesale prices is shown for April by information gathered in representative markets by the U. S. Department of Labor through the Bureau of Labor Statistics. The Bureau's weighted index number, which includes 404 commodities or price series, dropped to 156.2 for April compared with 161.0 for the preceding month, a fall of 3 per cent.

Among metals there were substantial decreases in iron ore, pig iron, steel billets, structural steel, copper, lead, tin, and zinc, while lumber was responsible for a drop in the general price level for building materials. Other commodity groups showing decreases from March prices were cloths and clothing, fuel and lighting, and chemicals and drugs. House furnishing goods were slightly higher and miscellaneous commodities were appreciably higher than in March.

Of the 404 commodities or price series for which comparable data for March and April were collected, increases were shown in 50 instances and decreases in 187 instances. In 167 instances no change in price was reported.

Comparing prices in April with those of a year ago, as measured by changes in the index numbers, it is seen that the general level increased approximately 5 1/2 per cent. On the other hand prices in the groups of fuel and lighting materials, metals and metal products, building materials, and house furnishing goods averaged lower than in April of last year.

LUMBER AND MILL WORK ON INSTALLMENT PLAN

E. L. Blackman, operating a plant at 4221 East Fourteenth Street, Oakland, announces a plan to provide time payment accommodations on lumber and millwork to prospective builders. Blackman, in speaking of his new plan, says: "A contractor gives you a contract price on your intended improvements—for example, we will say that he estimates the total cost at \$200. This amount to include labor, lumber, millwork, plumbing, painting, etc., etc., needed to complete the work. You pay one-fifth down, or \$40. The balance of \$160, you can pay in ten monthly payments of \$16 each. Or, if you do the work, we will furnish the lumber and millwork on the same plan of one-fifth down and the balance in ten monthly payments.

LOW ROAD BIDS

Warning is sounded by the superintendent of public works of New York that road contractors are bidding "too low to do a profitable business." From far-off Nevada the highway department announces that early bidding this year "was well below the engineer's estimates." Special correspondence from Indianapolis tells us that in Indiana so far "bids have been materially lower than estimates." In brief it appears that the road contractor, running true to form, again this year is angling to hook a job and not to net a profit. —(Engineering News-Record).

Uniform Highway Marking Will Be Discussed by Highway Boards

Highway officials of Wisconsin, Michigan, Indiana, Illinois, Ohio and Kentucky will meet in Chicago on June 3 to designate the important interstate roads in these States which will be uniformly marked as United States highways. The meeting is the outcome of the initial conference of the Joint Board on Interstate Highways composed of State and Federal highway officials which was held in Washington April 20 and 21. Regional meetings were held in San Francisco on May 15 and in Kansas City on May 27 and the Chicago meeting will be followed by meetings in Atlanta, New York and Boston for the purpose of selecting the important interstate roads which, after coordination as between the various sections, will be known as United States Highways.

The selected routes will be designated by number and marked uniformly in all States with a standard marker. As a basis for the selection of the routes, each State highway department will present at a meeting a map showing the routes within the State which, in the opinion of the department should be selected. The proposal to designate important interstate roads and mark them uniformly was initiated by the American Association of State Highway Officials at the annual meeting of the Association in San Francisco in November 1924, when the Secretary of Agriculture was asked to name a joint board to consider the matter.

There has been a feeling among highway officials for some time that a remedy should be found for the present confused situation in respect to interstate roads. Information was presented at the recent meeting of the Joint Board in Washington showing

that overlapping of named routes is common. There are few of such routes that are not coincident in part with other routes. One well known route 1500 miles long overlaps other routes for 70 per cent of its length. Ten different routes are involved in this overlapping and in places two or three of them coincide for many miles.

At the regional meetings tentative proposals with respect to the form and color of warning and directional signs for the interstate roads will be presented to the State highway officials for consideration. It has been tentatively decided to adopt a standard round sign for marking all railroad crossings and an octagonal sign to indicate danger or stop, a diamond sign for caution or slow, a square sign to indicate "look" or attention, and a rectangular shape for directional or informational signs.

Recommendations with regard to the standardization of highway signs have been made recently by a number of national organizations, including the American Association of State Highway Officials, the Hoover Street and Highway Safety Conference, the sectional committee on color code for highway signs of the American Engineering Standards Committee, the National Safety Council, the United States Bureau of Standards, the National Research Council and the American Automobile Association. As a result of the work of the Joint Board on Interstate Highways in cooperation with the State Highway Departments it is anticipated that a practical scheme, taking into account all such recommendations, will be evolved in the near future, and applied, at least, to the designated important interstate highways.

Road Builders Deplore Lack of U. S. Convention Accommodations

That the National Good Roads Convention and Exposition held each year under the auspices of the American Road Builders' Association has become so colossal in size that there is no longer an exposition building and convention hall in the United States large enough to house the dual event was the statement of the newly elected President of the road builders' organization, William H. Connell of Pennsylvania who has just been inaugurated at the Association's annual May meeting in New York. Mr. Connell predicted that the 1926 convention and exposition will eclipse all that have been held heretofore, and registered a plea for the erection of exposition buildings of greater capacity in convention cities.

At a meeting of the newly elected officers and directors of the Road Builders' Association, held in conjunction with the May meeting, Chicago was definitely selected as the city in which to hold the convention and exposition next January. "This," said Charles M. Upham, business manager of the association and state highway engineer in North Carolina, following upon after a careful survey of conditions in many other cities, especially in the East. One great difficulty was to find exposition and convention halls

in a city with hotel accommodations sufficient for the 25,000 persons who attend. Our greatest obstacle in the selection of an exposition building is encountered not only in the lack of sufficient space but in securing a floor capable of carrying heavy loads. The floor must be capable of supporting single exhibits weighing as much as 50 tons and total exhibits of approximately 300 carloads of road building machinery and equipment. At the same time the roof of the building must be high enough to permit the operation of the tallest steam cranes and shovels.

"After a thorough study of the principal convention cities of the country such as Chicago, New York, Boston, Atlantic City, Philadelphia, Washington, Pittsburgh, Cleveland, Cincinnati, Buffalo, Indianapolis, Louisville, Milwaukee, Minneapolis, Kansas City, St. Louis, Denver, Baltimore, San Francisco and others, it was found that no such exhibition building is available in any city wherein hotel accommodations are ample. Chicago's facilities come nearer to filling our needs than those of any other city and the next convention and exposition will be held there, notwithstanding that the exposition will overflow the Coliseum into several adjoining buildings that will have to be leased for the purpose."

WELDED STEEL BRACES PREVENT SAGGING OF INDUSTRIAL PLANT

At a cost of approximately five hundred dollars and through an unusual use of electric arc welding the Lincoln Electric Company of Cleveland has successfully erected steel braces between its office and factory building unit which are preventing further sagging of steel beams and the pulling apart of the structure.

For a number of years the two units of the Lincoln structure had been gradually pulling apart, bringing about a gradual sag in the roof and endangering the entire plant. The sagging resulted from the fact that the back is on land with a four foot fill, which as it settled down at the rear of the property tended to pull the factory away from the office building.

In an effort to straighten out this condition the company tried numerous methods of applying supports and spent a great deal of money, according to J. F. Lincoln, vice president of the Lincoln Electric Company. None of the attempts succeeded until the welding of the steel braces was tried, it is stated.

Mr. Lincoln reports that the sag, which had developed over nearly a ten-year period, has now been entirely eliminated and that it is certain that there will be no further pulling away of the factory from the office portion of the structure, regardless of further settlement of the rear of the plant.

Lincoln engineers made the repair on the building themselves through the use of steel bridge construction to support the sagging members. This was done by welding with the Lincoln "Stable-Arc" welder, at a saving of thousands of dollars on repairs alone.

The importance of this piece of welding work may be better appreciated when it is realized that it is safeguarding an industrial structure, the reproduction value of which is better than \$350,000.

The strain that the welded steel is successfully withstanding may be understood, from the fact that the factory portion of the structure alone covers a total of 90,000 square feet of floor space. While the plant is of the single story type, the office unit is two stories in height.

The real significance of this repair job is not so much to be found in the fact that through the application of welding a possibly dangerous sag and pulling apart of the building has been prevented at a nominal cost, but rather in the fact that it shows the probable extent to which welding may be applied in construction of the future, according to Mr. Lincoln.

Mr. Lincoln holds that as engineers gradually come to a better understanding of the possible application of welding, that this method of joining members will replace the older one of riveting. He points out that riveted pieces were unsuccessful when applied to the condition that existed in his own plant, because they did not supply the strength necessary to withstand the strain imposed upon them by the gradual pulling away of the factory unit.

SCHOOL CONSTRUCTION ROOMS IN LOS ANGELES

W. E. Record, business manager of the Los Angeles board of education, announces that 121 new school buildings will be erected in the near future with the \$7,640,000 bond issue voted at the election in June, 1924. Of these 45 now are under contract, four others have been advertised for bids and plans for 72 more are in the hands of architects.

San Francisco American Plan is Endorsed in Strong Editorial

Editorial From "The Argonaut," San Francisco, Under Date of May 2, 1925.

San Francisco long had the reputation of being the most labor-ridden city in the United States, and although in recent years there had been more atrocious strike outrages elsewhere, conditions here were bad enough. In the building trades especially no such thing as industrial freedom existed, and peace was a thing on which no one could count for more than twenty-four hours. Often the cause of conflict was one in which neither owner nor contractor was involved. Jobs were tied up by jurisdictional disputes about the "ownership" of what could not be owned, namely, certain classes of work. Processes of production were retarded and people that tried to build were bedeviled half crazy. Building costs were artificially excessive, which restricted the amount of building done; hence reduced the number of jobs that offered. Reduction in jobs was offset by reduction in the number of those permitted to work; union men from other cities could not get in, apprentices were limited—a demonstration of the hollowness of the claim that these restrictions were for the benefit of labor.

Thanks to the Industrial Association, the Builders' Exchange and the American Plan, San Francisco is today more free in regard to industry relations than any other large city in the United States. And the Federal Supreme Court has now upset the late Judge Dooling's decision and thus in effect affirmed the methods by which that freedom has been brought about. The development of the city is to continue without hindrance from within; the prosperity of its working people will not be sacrificed to those in control of the labor organizations. In San Francisco, labor is free. And it gets along at least as well as it does anywhere else.

No one should wish to see labor ground down, exploited, deprived of a comfortable living and its due share of the returns of industry—if anyone can ever determine what that due share is. But the condition that brought about the Industrial Association had grown intolerable. Under it no city could long have prospered, and this one was approaching the end of its prosperity. Conditions were not on an American basis, with the right to labor, and to contract for labor, secured to every member of the community. They were on a closed shop basis. Union men not only would not work with non-union men, but they would not work with union men unless they belonged to a San Francisco union, and the price was made almost prohibitive. Against this sort of domination the individual was powerless and could get no help from any quarter. The shut-out was airtight.

Men are not to be trusted with unchecked power. Those in control of the situation by the rules that still further curtailed work and production, and therefore robbed the community of the normal results of industry. Effort was limited, large jobs were made of small ones, and certain labor-saving devices were prohibited. The authority of the employer was abolished; an employing plumber, for example, was not permitted to stay on a job more than two hours a day. Men that did more work than the union prescribed were discriminated for being efficient. The painters' union prohibited the use of a brush more than four inches in width, and in roof painting sweep brushes were prohibited and only small one

permitted. Spraying paint was prohibited. No union painter could paint non-union lumber. Bear that in mind, for it is typical and significant.

Class consciousness, ideal of the Marxists and the Russian Bolsheviks, had gone far. Violation of these rules by a contractor was punished by a strike not only by the craft involved but by other crafts employed by him, and not only in San Francisco but in any other city in which he had work going on. They gave the contractor every inducement to "be good," and individually he was as helpless as the individual laborer. There were fifty building unions, and they ruled. Arbitration failed, and building in San Francisco came to a halt. The city's growth was threatened and a city's life is its life.

In this crisis the Builders' Exchange instituted the American Plan, and the Industrial Association came into being to help execute it. This did not mean the "open shop" in the sense attaching to that phrase elsewhere, for the American Plan is far more favorable to organized labor. In other cities the "open shop" means a shop in which no union men work. Under the American Plan half the men may be union members, but the other half and the foreman must be non-union. That is not ideal. There should be complete freedom; but apparently that is not practicable and an arbitrary rule had to be made. And today San Francisco is the only important city in the Anglo-Saxon world in which union and non-union men in the same craft work amicably side by side. They have no quarrel. Work is plentiful, wages are good, and there is nothing to quarrel about. There has been a delightful absence of strikes, a tremendous building activity, and best of all from the laborer's point of view there has been steady employment.

But there were a few contractors and material men that did not understand Americanism and would not abide by any plan, and they made it difficult for the others. So a rule was adopted to the effect that contractors operating on the American Plan should be informed of those that were operating on the closed-shop plan, so that materials should not be sold to them. A person desiring certain materials had to get a permit from the Builders' Exchange. This seemed like restraint of trade and was denounced as a violation of the Sherman Anti-Trust Act—although no union man had been heard to denounce the rule that prohibited a union painter from painting non-union lumber. There were prosecutions under the Cartwright Act, followed by jury acquittals; and two weeks later the Federal Government filed a bill of complaint against the Industrial Associations of the city. The bill named as defendants the Builders' Exchange of San Francisco, and forty-five other defendants, some individuals and some organizations, charging conspiracy in restraint of interstate commerce and praying for dissolution of the Builders' Exchange and the Industrial Association. The late Judge Dooling was a learned lawyer and eminently fair in his decisions, but perhaps in this case he was a little less practical than the Supreme Court; and he held that though it was not serious enough to warrant the dissolution of the two organizations principally concerned in operating the American Plan, there had been interference with interstate commerce, through the permit

system, and he enjoined its further operation. The defendants maintained there had been no violation of the Sherman Act or the Clayton Act, and took an appeal, which has now been decided in their favor. The permit system is found not to be illegal. It was no more than the unions had been doing—what was sauce for the goose must be sauce for the gander; although that is not exactly the language of the Court.

The Argonaut believes that substantial justice has been done. Private citizens still have the right to strike, of which they should never be deprived; and in fact the same tribunal has just decided that the effort to deprive them of that right by the operation of the Kansas Industrial Court is unconstitutional. But employers have their rights as well, and unorganized free labor has its rights. And the recognition of these rights is the American Plan. Nothing else is.

BAY BRIDGE BACKERS SEEK NEW ORDER

Modification of the requirements for a transbay bridge will be asked of the war department by Clifton E. Hickok, Alameda city manager.

The war department demanded a 3000-foot tunnel at the San Francisco approach to the bridge and a 50-foot channel. Hickok will ask that this requirement be lessened to a 2000-foot tunnel and 40-foot channel.

The city manager will send a mass expression of supporting data to the war department to show the increase in transbay traffic which will follow construction of a bridge.

The East Bay cities should join with San Francisco in an attempt to seek a change in the ruling made by the war department that any bridge across San Francisco bay should be built below Hunter's Point. Mayor Frank Otis of Alameda asserts, with some expression of opinion from representatives of Oakland, Berkeley and Richmond and also will seek the co-operation of peninsular cities and towns.

PIG IRON OUTPUT LOW

April output of pig iron in the United States totaled 3,255,958 gross tons, against 3,554,247 tons in March and 3,233,428 tons in April, 1924.

Daily average for the 30 days of April was 108,532 tons, a decline of 6343 tons, or about 5½ per cent from the 114,975 tons produced daily in the 31 days of March. April was the first month since last July that the daily output of iron has shown a decline from the preceding month.

There were 30 furnaces blown out or banked and five blown in during April, a net loss of 25, bringing number of active units on May 1 to 250, according to "Iron Age" compilation. Estimated daily capacity of the 220 stacks was 103,050 tons, against 112,350 tons daily for the 245 active furnaces April 1.

ISSUES FOLDER

Louisville Cement Co., Louisville, Ky., has issued an eight page folder describing "Walsmet," a new product for interior and exterior walls. The product is a mortar material. It is a plastic combination of cements that, when applied, is practically impervious to water and may be employed in situations where other plasters are not efficient, for dampness does not cause it to scale or disintegrate.

Safety From Fire in Public Institutions Considered in Report

Safety from fire in hospitals, sanitariums and corrective institutions a problem brought to public attention in recent years by disasters such as the Ward Island State Hospital for the Insane and the Dunning Hospital for the Insane tragedies is given due consideration in the report of the Committee on Safety to Life of the National Fire Protection Association made before the Annual Convention of the latter in Chicago, May 13 by S. J. Williams, Chief of the Public Safety Division of the National Safety Council, chairman of the Committee. This new subject is incorporated in the Building Exits Code as Section 24.

"Exits alone are not sufficient to provide proper safety for occupants physically or mentally disabled or under restraint," the Committee states. "For this reason this section is treated differently from other sections of the code, and more emphasis is placed upon construction of buildings, fire prevention and fire protection. Horizontal exits are considered of a special value and relatively greater credit is given to horizontal exits and to ramps than in other sections of the Code.

Safety to life in buildings of this occupancy requires: (a) Proper construction of buildings; (b) Proper exits; (c) Careful housekeeping and protection of fire hazards; (d) A competent, trained, staff having adequate personnel on duty at all times.

This section of the Code applies to both new and existing buildings, the requirements for new buildings applying with respect to new construction incident to alterations.

The most important requirements may be outlined as follows: Fire-resistive construction is recommended for all buildings, and shall be used throughout for all buildings three stories or more in height. Frame buildings shall not exceed one story in height.

The interior finish on wood stud walls, ceilings and partitions of two-

story wood joisted buildings, and in alterations of existing combustible construction more than one-story in height, shall consist of expanded metal or wire lath and gypsum or cement plaster not less than ¾ inch thick. Aetal ceilings shall not be employed unless joists are first entirely covered with approved plaster board.

In buildings of non-resistive construction, with floor area exceeding 3000 square feet the rooms or portions of the building listed below shall be of fire-resistive construction throughout and shall have a standard fire cut-off from the remainder of the building or shall be equipped with a standard single supply automatic sprinkler system. The rooms or portions of the building listed are: Heating apparatus or boiler rooms; basement or attics if used for storage of combustible material; work rooms such as manual training, repair shops, carpenter shops, etc., laundries; main kitchen; main storeroom, such as furniture and miscellaneous storage; film storage and similar hazardous occupancies.

Every shaft for light or ventilation, stairways, elevators, dumbwaiters, chutes, etc., shall be continuously housed in enclosed walls and all openings thereto shall be protected by approved fire doors. Where glass is necessary, wired glass is fixed or automatic closing fire windows shall be employed. All fire doors, except those on elevators operated by regular attendant on shaft enclosures shall be self-closing.

Exits shall be so placed that the entrance door of every private room and every point in open wards, day rooms, dormitories and dining rooms shall be not more than 100 ft. from the nearest exit (along the line of travel). Exits shall be as remote from each other as practicable. Exits shall be so arranged with regard to floors that there are no pockets or dead ends of appreciable size in which occupants may be trapped.

Labor Union Progress

None but a crank can wholly glorify or wholly condemn the labor unions of America. In attempting to better their lot the unionists have accomplished much, and at times have benefited the public, as well as themselves. On the other hand, they have been offensive in their narrowness and culpable in their abuses.

Their position today, both from their own viewpoint and in the eyes of the public is probably the best it ever has been. Major strikes are neither in progress nor in prospect. Most of the unions have admittedly good pay and good working conditions. Work is reasonably plentiful.

While the latest public demonstration of union activity was the brick-layers' plasterers' jurisdictional dispute with its costly injustice to innocent parties, the undoubted general trend of recent union effort has been more toward concern with fundamentals of wages and working conditions and less toward bickering with employers or between unions. The public has sensed this fact and the unions have gained in esteem accordingly.

Abuses continue, however, in restriction of output, unreasonable limitation of apprenticeship and in other ways; and in these matters the unions neither deserve public support nor are likely to get it in large measure. It is easier to rouse popular sympathy against the misdeeds of employers than against the transgressions of workmen, either individually or grouped, but in time public opinion generally strikes close to the truth.

It is unfairness of act, not selfishness of motive, that is condemnable in labor unionism, and likewise in employerism. The higher ideal that places the welfare of others on a par with the welfare of self is still too rare to be demanded of one group of men by any other group. But absence of the ideal is not absence of all standards, and there is a practical minimum of morality which society demands in exchange for its support.

Labor and capital alike will fare best in the long run by keeping their acts clean. Advantages gained otherwise are usually temporary, as he who will may see.—Engineering and Contracting.

Results of Highway and Motor Vehicle Legislation

BY D. V. NICHOLSON

Assistant Secretary and Legislative Representative, California State Automobile Association

Adequate financing of new State highway construction.

Immediate use of all roads in the State system through statewide maintenance.

Greater safety on the highways of the State.

Uniform enforcement of motor vehicle laws.

Summarized these will be the results of the forty-sixth session of the California Legislature if Governor Richardson signs motor vehicle and highway bills now before him.

Senate Bill No. 661 provides for an increase of one cent in the present gasoline tax. This increase, plus Federal Aid, will yield \$10,265,000 in 1926 and \$10,815,000 in 1927. These funds will go entirely to the State and are required to be spent exclusively for new State highway construction. Including commercial vehicles the increased tax per car will average slightly less than \$5.

Under Senate Bills No. 605 and 606 this money will be spent 45% on designated Class A primary roads, including main trunk highways and interstate connections; 30% on Class B primary roads, including county seat connections, important laterals and major recreational roads; and 25% on secondary roads, which includes San Francisco's Bay Shore Highway. Nine missing links and the Bay Shore road were added to the State system under Senate Bill 606. Missing links added to the system, which are of special importance to Northern and Central California in addition to the Bay Shore road, which was universally supported are:

San Rafael to Point San Quentin, which provides an east bay connection with the Redwood Highway; Crescent City to Oregon line, which completes the northerly extension of the Redwood Highway, connecting it with the Roosevelt Highway now being built up the coast of Oregon; Alturas to the Oregon line near New Pine Creek, providing a connection from the northeasterly section of California to the State highway system of Oregon and completing an important travel route to Yellowstone Park by way of Southern Idaho; Bakersfield to Mojave, which provides a direct state highway from Central California to the Grand Canyon and taps the rich transcontinental motor traffic entering California via Needles.

Placing of the Bay Shore road in the secondary classification will be no handicap for the reason that 25% of construction funds must be spent annually on this classification, which includes comparatively few roads and none approaching its importance.

Assembly Bill 589 directs the State Highway Commission to maintain all traversable roads "which now are or may be hereafter included in the State Highway system." This assures the immediate taking over and maintenance of all unbuilt or unimproved sections of the State Highway system; giving immediate relief to those sections which have waited, in some instances, as long as fifteen years for some form of State highway service or improvement. It also broadens the powers of the State Highway Commission. Classification of the State highway system and provision for statewide maintenance were two of the important recommendations

made by the Highway Committee of Nine.

Senate Bills No. 599 and 600, drafted by attorneys of the California State Automobile Association and the Automobile Club of Southern California and supported by those organizations and the Motor Vehicle Conference, headed by Percy E. Towne, a director of the State Association, will do much to promote public safety.

Every future applicant under No. 599 will be required to file a sworn statement setting forth his qualifications to drive which will include a statement as to the condition of the applicant's hearing and eyesight, whether he has normal use of both hands and feet, has ever been afflicted with epilepsy, paralysis, insanity or other disability or disease affecting his ability to exercise reasonable and ordinary control over a motor vehicle while operating on a public highway. He must state whether he has previously operated a motor vehicle and if so, for what length of time, and whether he is able to understand highway warning and direction signs.

Whenever the Division of Motor Vehicles shall deem it necessary, it may require the applicant for an operator's or chauffeur's license to submit to an examination demonstrating his ability to drive. Such an examination would be held in the county in which the applicant resides and the division shall provide for the examination within five days of the date of application.

Pending examination, the Division of Motor Vehicles may issue a driver's permit which would permit the applicant to drive for 30 days when accompanied by a licensed operator or chauffeur.

The examination provided for may include a test of the applicant's hearing and eyesight, his ability to understand warning and direction signs, and he may be required to give an actual demonstration of his ability to drive.

In the case of either a refusal to grant a license or of a re-vocation or suspension of a license, a final appeal may be taken to the superior court. The age limit for chauffeurs has been increased from 16 to 18 years.

Chauffeurs or operators' licenses, under the new law, will be denied to drug users and habitual drunkards, insane, epileptic or feeble-minded until restored to competency, or to any person whom the Division of Motor Vehicles believes to be unable to exercise reasonable and ordinary control over a motor vehicle.

Revocation of licenses is required where operators are convicted of manslaughter or other felony involving the use of a motor vehicle, or of any person convicted upon one or more charges of reckless driving and one or more charges of speeding, making a total of three convictions upon charges of either reckless driving or speeding within the same calendar year.

Senate Bill No. 600 remedies various defects and clarifies the present California Vehicle Act. The registration period is changed to midnight, December 31 of each year and certificates of ownership need not be renewed annually, but remain valid until a transfer and cancellation by the Division of Motor Vehicles.

Fees for electric commercial vehicles

are made more equitable; vehicles used exclusively in the transportation of free delivery mails are exempted from weight fees and weight fees on all commercial vehicles are placed on a quarterly basis of payment.

Box-backed Fords and similar vehicles only occasionally or incidentally used for transporting property are exempted from payment of extra weight or commercial license fees.

Motorists arrested for misdemeanor are entitled to five days' notice as at present, within which to appear in court, but the officer before giving such notice may require identification of driver by inspection of latter's license or other means of identification.

Section 155 with reference to the use of speed traps, as amended by the Assembly, is practically the same as the present vehicle act, except that a court is declared without jurisdiction to convict on speed trap evidence.

Senate Bill No. 1274, sponsored by the Division of Motor Vehicles and the State Automobile Association, will make possible the uniform statewide enforcement of motor vehicle laws under the present terms of the California Vehicle Act. This bill eliminates the power of district attorneys to appoint or pay traffic officers.

1924 LUMBER CUT IS 37 BILLION FEET

According to a Census Bureau announcement 769 large sawmills have reported a cut of 16,210,107,000 feet of lumber in 1924. The same mills reported 16,910,026,000 feet in 1923 the 1924 decrease being 700,000,000 feet, or 4 per cent. In 1923 the cut of these mills was 45.5 per cent of the whole reported lumber output; if their proportion remained the same in 1924 the total 1924 reported production would be 35,620,000,000 feet and the total of production 37,000,000,000 to 37,500,000,000 feet.

These figures correspond as closely as could be expected to the estimates of 1924 production issued by the economics department of the National Lumber Manufacturers Association last January, which were 34,000,000,000 to 35,000,000,000 feet for the ultimate reported production and 36,000,000,000 to 37,500,000,000 actual production based on the known output during the first 50 weeks of 1924 of approximately 40 mills that make weekly reports to the National Lumber Manufacturers Association. In view of the increasing number of small mills (many of which never report) and their increasing proportion of the total cut, it is probable that the Association's figures are nearer the fact than inference from the Census Bureau's figures for 769 large mills.

Inasmuch as the virtual exhaustion of American forests by 1925 was predicted twenty-five years ago, it is worth noting that the present production is greater than it was in 1900, and that the prospects are that it is likely to continue so for many years without detracting from reforestation, and in accordance with conservation policies.

Building News Section

APARTMENTS

Plans Complete.
APT. BLDG. Cost, \$45,000
SAN FRANCISCO, 8 Golden Gate Ave.
W of Broderick.
Three-story frame and stucco apart-
ment building.
Owner—City Building Co.
Architect—George Weinmeyer, 57 Post
St., San Francisco.
Owner will take figures.

Structural Steel Contract Awarded.
APARTMENTS — Cost, \$120,000.

IF YOU want to see.
HOW POOR everybody is.
JUST GO up.

TO THE Assessor's office.

IN ANY courthouse.

AND HEAR the people.

TURN IN their assessments.

NODODY HAS any cash.

IN THE bank.

OR IN their pockets.

ON THE first of March.

CLARENCE SAND Pratt, President.

OF THE Pratt Building Material Co.

DOUGLAS 300—"easy to remember."

AND PRODUCER of clean, sharp sand.

AND HARD, crushed rock.

SPENT AN amusing half hour.

LISTENING TO the sworn statements.

OF OUR good citizens.

A CHINESE druggist was the first.

AND HE tried.

TO TELL the assistant lady assessor.

THAT HIS drug store.

LIQOR, FINTURES, dead lizards and all.

WAS WORTH only \$100.

WHEN ONE case of China gln.

WOULD SELL for that sum.

HE DIDN'T get away with it.

NEXT WAS an Italian Barber.

WHO OWNED two barber chairs.

AND A few soap bars.

HE PAID \$1.39 in 1924.

AND COMPLAINED

WHEN HIS total tax for 1925.

RAN UP to \$2 79.

AND NEXT was a funny old lady.

WHO WANTED her furniture assessed.

FOR LESS than \$10 per room.

BUT \$10 per room.

IS THE minimum on furniture.

SO SHE was very unhappy.

AND OVER assessed.

THEN AN office lady.

WANTED HER typewriter.

ASSESSED FOR less than \$25.

SO THAT'S the way it goes.

AND SANDY Pratt, Producer.

OF CLEAN, sharp sand.

AND WASHED gravel.

HEARD ONLY a few.

OF THE funny ones.

AT THE Assessor's office.

BUT WE are all alike.

NEVER WANT to pay taxes.

AND THE richer you are.

THE LESS you want to pay.

"I THANK you."

This fellow pays no taxes, has no roof for the roofers to fix and he never has a cold from wet feet. He lives on the American River near Sacramento and near the sand-producing plant of the Pratt Building Material Co. (Sandy Pratt, President).

Sub-Contracts Awarded.

Official Proposals

NOTICE TO CONTRACTORS

(Bakersfield, California)

Notice is hereby given that sealed bids will be received by the Board of Education, Bakersfield School District, Bakersfield, California, up to 8 P. M. of June 15, 1925, for furnishing all materials and labor necessary for the erection and completion of additions and alterations to the Hawthorne, Wm. Penn and McKinley School Buildings, in accordance with plans and specifications for same on file at the office of the Board of Education, City Hall, Bakersfield, and open for the inspection of bidders. Copies of said plans and specifications may be had upon deposit of Ten Dollars (\$10.00) at the office of Charles H. Biggar, Architect, 406 Bank of Italy Building, Bakersfield, California, and the work will be done under his supervision. Deposit will be returned upon receipt of plans and specifications in good condition previous to the time bids are received.

Bids will be received for the work on each building separately, or segregated as shown on bid form furnished by Architect. Bid must be accompanied by a cashiers' or certified check in the amount of at least ten per cent (10 per cent) of the amount bid, such check to be made payable to the Board of Education, Bakersfield City School District, and be submitted as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board of Education, and in addition thereto will furnish good and sufficient bonds therefor.

The board reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Education, Bakersfield School District, made May 21, 1925.

M. P. FLICKINGER, President.

W. T. WHITAKER, Secretary.

NOTICE TO CONTRACTORS

Yuba Pass Extension Forest Highway

Sealed proposals for constructing the above-named National Forest highway, located within the Tahoe National Forest, Sierra County, State of California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 400 Bay Bldg., 9 Main St., San Francisco, California, until 9 o'clock A. M. on the 16th day of June, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The project to be constructed consists of a section of the Yuba Pass road between Gold Lake Junction and Sierra City, and is 3.71 miles in length. The principal items of work are approximately as follows:

Clearing, 26 acres.

Excavation, unclassified, 54,652 cu. yds.

Class A concrete, 171 cu. yds.

Class B concrete, 94 cu. yds.

Reinforcing steel, 27,304 lbs.

Corrugated metal pipe, 1,222 lin. ft.

Crushed rock surfacing, 3,630 cu. yds.

Construction shall be started within fifteen days after notice of award of contract has been given to the contractor by the District Engineer. The work shall be completed within one hundred and twenty (120) weather working days after said notice of award of contract is given.

The contract form, maps, plans and specifications may be examined by responsible contractors at the following addresses:

400 Bay Bldg., 9 Main St., San Francisco, Calif.

J. P. Waller, Sattley, Calif.

The Bureau has available for loan to

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

contractors on a rental basis, equipment at Government Island, Oakland, California, as listed in the specifications. Bidder will state in his bid the Government equipment that he will use during construction and minimum time required. The estimated rentals will be taken into consideration and award will be made on the bid to the best advantage of the Government. Government explosives are also available according to the terms of the specifications. Corrugated metal pipe will be furnished by the Government.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and experience and upon deposit of a check for \$10.00 payable to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming a part of the specifications above referred to.

May 26, 1925.

C. H. SWEETSER, District Engineer.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on June 15, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

San Luis County, near Boulder Creek (IV-S.C.R.-44-A) the following: A reinforced concrete box culvert at Station 27+45 at Fall Creek, consisting of a 5-foot by 5-foot opening 94 feet long with wing walls.

A reinforced concrete girder bridge 24 feet wide, at Station 126+60 across High Bridge Creek, consisting of three 27-foot spans on concrete bents.

A reinforced concrete box culvert at Station 131+73 at Cleveland Dam Creek, consisting of a 5-foot by 5-foot

opening 45 feet long with a retaining wall and wing walls.

Imperial County between El Centro and Holtville (VIII-Imp-27-C), about eight and six-tenths (8.6) miles in length, to be graded and surfaced with crushed gravel or stone or with decomposed granite.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are requested to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY, LOUIS EVERING, N. T. EDWARDS,

California Highway Commission.

R. M. MOFFAT, State Highway Engineer, W. F. MIXON, Secretary.

Dated: May 25, 1925.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

ELECTRICAL LABORATORY FOR STANFORD

Stanford University is to have a high-voltage electrical laboratory voluntarily presented by a number of the large electrical companies of the country for experimental purposes, that will take rank with any similar establishment in the world, according to Paul M. Downing, vice-president of the Pacific Gas and Electric Company, chairman of a general committee formed by the companies interested in the project. Downing is a Stanford graduate of the class of 1895.

The new laboratory will study particularly the problems of high voltage power transmission. It will be equipped with a 2,000,000-volt testing set, valued at \$105,000, given by the General Electric Company, and a check for \$50,000 has been presented by the Pacific Gas and Electric Company. Downing estimates that when further gifts from other companies are announced the total value of the new laboratory will be between \$400,000 and \$500,000.

The new laboratory is to be named in honor of Dr. HARRY J. RYAN, head of the electrical engineering department of Stanford, and a scientist widely known for his studies in the field of power transmission. Downing and other electrical men say that longer and longer power transmission lines are the only solution of the country's power problems. They point out that California has water power resources in excess of 7,800,000 horse power, but most of this power is so far from the market that it cannot be commercially utilized until higher voltages or improved transmission methods are made available.

FEDERAL ROAD BUREAU TAKING BIDS

Announcement is made by State Highway Engineer R. M. Morton that bids will be opened June 22nd by the Bureau of Public Roads at its San Francisco office for the surfacing with crushed rock of 6.86 miles of state highway between Soda Springs and Donner Lake, in Placer and Nevada counties. The section crosses Donner Summit and is within the Tahoe National forest. The work will be financed with federal forest highway funds.

The Soda Springs-Donner Lake section was graded during the last two years partly with state funds and in part as a forest highway project. The work to be done with federal funds also includes a necessary bridge near Donner Summit.

Completion of this project will substitute maximum 7 per cent grades for the 18 per cent climb on the former road. It is on the trunk line connection with Nevada, via the Truckee River canyon, the route of the Victory Highway.

EPITAPH

A man, going sixty-five per. Didn't know what a drawbridge was.

As the bridge was ajar, He plunged with his car— Too quick on the draw, as it were.

NEW PRODUCTION RECORD FOR PLATE GLASS

All records for the production of plate glass in the United States were broken during March when the total output reached 9,773,957 square feet. According to P. A. Hughes, secretary of the Plate Glass Manufacturers of America, the end of the year 1925 will see the establishment of a new 12 months production record for the manufacturers of plate glass in this country. During the first three months of this year the production of plate glass was 7,015,881 square feet as compared with 3,506,147 square feet turned out during the months of January, February and March, 1924.

"Based on the known demand and the production of plate glass so far this year, it seems reasonable," says Mr. Hughes, "to estimate that the total output for the year will be between 105,000,000 and 110,000,000 square feet—enough plate glass to lay a crystal roof over a ranch of 2500 acres. This will exceed the production of 1924 by from 4,000,000 to 19,000,000 square feet, and it will double the production for the year 1921."

Millions Wasted by Existing Ventilation Legislation is Claim

That existing ventilation legislation wastes \$2,500,000 annually of taxpayers' money in the United States, and is not only needlessly extravagant but actually injurious to the health of school children, is asserted by Dr. C. E. A. Winslow, professor of public health of the Yale School of Medicine and chairman of the New York State Ventilation Commission. The Commission was appointed by a former New York Governor and supported by the Milbank Memorial Fund, of which Edward W. Sheldon, president of the United States Trust Company, of New York, is head.

In New York State alone, \$200,000 of public funds are foolishly spent each year in the operation of school ventilation systems based on a disproven theory, writes Dr. Winslow in the current number of the American School Board Journal. Mechanical systems of ventilation based on this theory not only cost more to build but, once constructed, require the wasting of more millions in operation, says the writer.

The heretofore supposed need in room ventilation of allotting a minimum of thirty cubic feet of fresh air per minute to every individual occupant is not borne out by the Commission's findings. Upon this requirement, known as the "carbon dioxide standard," most modern ventilation legislation is based. Introduced in 1862 by Max von Pettenkofer and later adopted by the American Society of Heating and Ventilating Engineers, this standard has resulted in the enactment by twenty states throughout the country of laws making mandatory the installation of extravagant school ventilation systems, the article says.

"If this were all," Dr. Winslow continues, "if the harm done by mistaken theories of ventilation were limited to the pocketbook, the matter might be dismissed as one to be settled between public appropriating bodies and their own consciences. There is, however, a

still more fundamental, and still more serious aspect of the case."

Ideal room ventilation, it was found, is not obtained by pouring in a volume of warm air, but by providing a small amount of cool, fresh air to counteract the occurrence of a warm, moist and still atmospheric condition. With an air supply of thirty cubic feet per minute, it is essential to maintain temperatures generally over 65° F to avoid unpleasant drafts, writes Dr. Winslow. Such a warm atmosphere causes a rise in body temperature, an increased pulse rate, respiration and decreased blood pressure, and results in markedly diminishing one's working efficiency and in seriously increasing one's susceptibility to respiratory diseases.

The Commission's investigators reported that among pupils in a classroom ventilated to require the maintenance of a high temperature, the incidence of respiratory sickness was 70 per cent above that among children in two rooms of lesser temperature ventilated by window inlets and gravity exhausts.

With Dr. Winslow on the Commission are Dwight D. Kimball, ventilating engineer of R. D. Kimball & Co., New York; Dr. Frederic S. Lee, professor of physiology, and Dr. James Alexander Miller, professor of clinical medicine, of the College of Physicians and Surgeons, New York; Earle B. Phelps, professor of chemistry, United States Hygiene Laboratory, Washington, D. C.; and Edward Lee Thorndike, professor of educational psychology, Teachers College, Columbia University.

In addition to Mr. Sheldon, the Milbank Memorial Fund's directing board consists of Albert G. Milbank, treasurer, John A. Kingsbury, secretary, Elihu Root, John G. Milburn, Thomas Cochran, of J. P. Morgan & Co., George L. Nichols, and Dr. Charles M. Caldwell.

Country Building 40,000 Miles Of Surfaced Roads Each Year

Construction of surfaced roads of various types has been going on throughout the country at the rate of approximately 40,000 miles a year since 1921, the good roads bureau of the California State Automobile Association announces. Estimates furnished the Association by the United States Bureau of Public Roads show that at the end of 1924 the total mileage of surfaced roads in the country was between 450,000 and 475,000 miles.

In connection with these figures, the Association's good roads bureau pointed out that improved roads are not luxuries. For the movement of every vehicle over a road there is a certain cost, it says, which is less if

the road be improved than if it be left in a state of nature. This amount, of course, depends upon the number of vehicles using the road. It is pointed out that the country loses more, in increased cost of operating vehicles, by not improving roads than it costs to improve them.

Whether or not a particular road should be improved to the point of hard surfacing depends upon the number and kind of vehicles that use it. When vehicles using a road are comparatively few, an unsurfaced but graded and drained road can be constructed and kept in satisfactory condition by proper maintenance work at a very low cost.

UNIONS SEEK RECALL OF CITY ENGINEER AT MODESTO

Three unions exploded a bombshell in the meeting of the Modesto City Council when they presented a petition asking the recall of P. W. McCarton, city engineer. Those signing the petition were the carpenters, electrical workers and metal workers. "Inefficiency" was given as grounds for requesting the recall.

It is believed the recall is being fostered as a result of a strict enforcement of the city's new building code as laid down by the city council.

Engineer McCarton in a certain building under construction in Modesto, ordered certain parts of the work torn out in order that a proper inspection might be made. In order to secure compliance with the order it was necessary to issue a warrant for the arrest of the contractor for violation of the code.

BRITISH IRON AND STEEL EXPORTS DECLINE

Exports of iron and steel from Great Britain during April amounted to 257,458 long tons, which is a loss of 5 per cent from the trade of the preceding month. Acting Commercial Attache Mitchell, London, reports to the Department of Commerce.

Tin plate was the commodity in which the decline was most noticeable. On the other hand, ingots, blooms, billets and slabs jumped from less than 1000 tons to more than 6000 tons.

Imports of iron and steel continued their upward trend, reaching 274,421 tons in April, as against 244,905 tons in March. Ingots, blooms, billets and slabs registered the heaviest increase.

There were 569,800 tons of pig iron and 597,600 tons of steel ingots and castings produced in April in the United Kingdom, as compared with 607,900 tons of pig iron and 634,700 tons of steel ingots and castings during March.

U. OF C. HAS CALLED FOR ARCHITECTS

A request for five men who have a speaking knowledge of Spanish to go to South America, for two architects who can design buildings, and various other requests have been received at the office of the Alumni Bureau of Occupations of the University of California. Mrs. Leslie Ganyard, manager, announces.

Five men are wanted by the United States government to go to South America, where they are to serve on an election board for a period of six months. The two architects must have from one to two years experience.

OAKLAND GETTING INDUSTRIES

Forty new industries have located in Oakland and the Eastbay district since January 1 of this year. W. L. Miller, secretary-manager of the Oakland Chamber of Commerce, announces.

The chamber has been solely responsible for location of twelve of the industries and materially assisted in finding locations for thirteen others, Miller declares.

The organization has now on file 247 active industrial prospects, 96 of them being developed since February 1, 1925.

OPENS BRANCH OFFICE

D. Zellinsky & Sons, Inc., "California's Master Painters," announce the opening of a branch office at 235 Seventeenth street, Oakland, with Jas. McInerney as manager. Offices of the company are now located in Los Angeles, Long Beach and San Francisco in addition to an office at Seattle.

Sacramento Material Dealers Organized—Aid Owner and Builder

Building material dealers of Sacramento have recently combined in the formation of the Material Dealers Credit Association, a non-profit organization, with the object of providing protection to the building public, reputable contractors and building material dealers against disreputable and non-solvent contractors.

Members and non-members alike are afforded the facilities of the association files, in which the credit rating of every contractor and builder of the city is listed, when the inquiry is for the legitimate use of the inquirer and not for the purpose of hampering or interfering with anyone's work.

Aid to Contractors

Although concerned primarily with protecting material dealers, loan companies and banks from being victims of contractors who have not the intention nor the ability to pay their bills, a protection is at the same time thrown around contractors of good reputation to keep them solvent and in good standing.

From the experience of the association, now in existence since January, a valuable set of suggestions to owners has been evolved. These suggestions have to do with the important steps which owner and contractor should take to insure a satisfactory job with no financial troubles at any stage of the work.

Suggestions Offered

They are as follows:

Suggestion No. 1. Investigate thoroughly your contractor's reputation and financial standing. You can get information through your bank, your lawyer, or through first-class building material dealers. There are plenty of contractors with a reputation for good building, square dealing and prompt payment of bills. You need not take any chances.

The law provides that you may demand from the contractor a bond to protect yourself. If there is any doubt in your mind about his responsibility, such a bond can provide for faithful performance (satisfactory completion at the contract price, according to plans and specifications), and for the full payment of any mechanic's liens which may lawfully be filed against the property, and such bond must be filed together with the contract in the office of the county recorder. Do not make payments to contractors ahead of time, or violate the contract or bond in any way, without written permission of the bond surety.

Suggestion No. 2. Have the contract and specifications in writing.

Payments are made to the contractor as the work progresses, usually about as follows:

The first 20 per cent when the first floor joists are in place and rough lumber is on the job; the second 20 per cent when the roof is on; the third 20 per cent when the building is plastered; the fourth 20 per cent when the building is completed, and the fifth 20 per cent after the time has elapsed for filing mechanics' liens.

Watch Financing

Suggestion No. 3. Finance your building project completely before beginning work. If an owner will require a loan for this purpose, he should make advance arrangements with a responsible loan association, mortgage company or bank. They will require that the deed of trust or mortgage be

recorded before any work is done or any material delivered upon the property. They will require that the title be examined down to date, thus safeguarding the owner himself by revealing any hidden defects. You cannot get a building loan after the building is started. You must record your loan papers in advance, or wait until liens recorded have lapsed after completion.

It is advisable to establish definitely the boundary lines of your property by a survey, so that you are sure your building will be on your own lot. To correct a mistake of a few inches has often been an enormous expense.

Comply With Law

Before you begin spending your money, have your building plans comply with the building laws and ordinances, and with the restrictions on your lot.

Suggestion No. 4. Record your building contract. This is done at the county recorder's office in the court house. This is not absolutely necessary, but the law gives the original contractor sixty days to file mechanics' liens, and material dealers within thirty days, after notice of completion is recorded. If you are getting a building loan, the fact that you have recorded your building contract, under the name of the original contractor, so the loan company is willing to pay out the money thirty-five days after recording notice of completion, by getting a release from the original contractor. If you do not record the contract, then they may hold the money for over sixty days in order to be sure that nobody claiming to be an original contractor will file a lien within the sixty days allowed.

Fire Risks

Suggestion No. 5. Insure your building in full against fire during the construction period. It is good business also to insist that the contractor carry public liability and workmen's compensation insurance, since it strengthens his financial position.

Suggestion No. 6. As you pay your contractor, have him furnish you with receipted bills (showing the address of your job) from every material dealer; also from sub-contractors, and from the dealers who supply sub-contractors materials. In this way you can make sure that the money you are paying him goes to settle the bills on your own work and not the bills against a building he is putting up for some other man.

Completing The Deal

Suggestion No. 7. File a notice of completion. First agree thoroughly with your contractor that the building is completed, which will constitute final acceptance of his construction work; then within ten days after completion, record a regular legal form of Notice Of Completion in the county recorder's office. Within thirty days after you do this, every material man, laborer or sub-contractor must file his lien or it will not hold against the property. It is thus a simple thing to assure yourself that there are no unpaid claims against which will be held against your property. If you do not record a notice of completion within ten days after completion of the job, then ninety days are allowed after completion for filing liens. Completion dates from the last work done.

The Officers

The officers and directors of the association are as follows:

J. S. Spellman, president; Allen Burr, vice-president; S. M. Mack, secretary; directors, W. A. Rapp, L. H. Chapman, J. J. Hawley, D. R. Green and C. H. Cutter.

The office of the association is located at 707 Plaza Bldg., Sacramento.

BUILDING INSPECTOR APPOINTED

J. H. Park has been appointed building inspector of Compton. He is a graduate in civil engineering of Dundee and Edinburgh universities, Scotland.

MANAGER NAMED

Edgar Reese, formerly in the furniture business at Oroville, has been appointed manager of the Palermo sales yards of the Sterling Lumber Company.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

SANTA CLARA COUNTY BUILDERS TO BANQUET

On Saturday evening, June 6, at 6:30 o'clock, the members of Santa Clara County Builders' Exchange will gather at the Commercial club, San Jose, to enjoy their 35th annual banquet.

Secretary W. E. Howe is arranging a musical program with short talks of from three to five minutes each by a number of the members on problems which they meet in their business.

The principal speaker of the evening will be Arthur Rowe, district sales manager of Garnett Young & Co., wholesale electrical supplies of San Francisco.

In addition to the membership, who are all planning to attend, it is expected that about 30 members of the local exchange residing in Oakland and San Francisco will be present while the presidents and secretaries of the exchanges in San Francisco, Oakland, Stockton and Richmond will, with a number of members from these exchanges, be the guests of the San Jose builders.

CEMENT CONTRACTORS OF ALAMEDA COUNTY ELECT OFFICERS

W. O. Nelson has been elected president of the Cement Contractors' Association of Alameda County. Other officers elected to serve during the ensuing year are: J. E. Wentworth, vice-president and R. H. Smilie, secretary-treasurer. An executive committee was also named to consist of the president and secretary with the addition of Paul Schnoor, Frank Jepson and George Cotterill.

The Cement Contractors' Association of Alameda County is a selected group of about thirty of the largest cement contracting companies in the Eastbay. Regular meetings are held twice a month at the new Builders' Exchange building, Hobart and Webster Streets, Oakland.

MONTREY COUNTY BUILDERS HOLD ANNUAL BANQUET

Twenty-one members of the Monterey County Builders' Association, and four guests, gathered at a banquet in Monterey May 27.

The principal speakers of the evening were T. A. Work and Ed. Simpson of Pacific Grove. Both stressed the importance of members of the association learning their trade thoroughly in order that they may better serve the builder. The speakers touched briefly on the satisfactory condition of the organization, the good work it is performing, and on the hope the good service would continue.

The meeting was presided over by C. W. Allaire, president.

PROPOSED ORDINANCE KILLED

Reno, Nevada, city council has "killed" a proposed ordinance restricting plumbing within the city limits to union plumbers. It is claimed by the opponents of the measure that the proposed ordinance would give the plumbing craft full control of the situation and prevent property owners from doing their own work. A similar ordinance was defeated a year ago.

Luncheon Meeting a Big Success

By Joe Odgers

The Builders' Exchange Luncheon Club was organized at the first luncheon meeting of the exchange held in the Palace Hotel last Monday. The French Parlor was crowded to capacity and judging from the enthusiasm displayed by the members the luncheons will continue to be a drawing card. It was voted to hold the luncheon weekly, every Monday at 12:15.

Emil Hogberg was elected president of the club; D. E. Parquharson, vice-

president; R. G. Guyett, secretary and A. Mennie, treasurer.

The following were appointed a committee on Organization and Rules: Jas. H. Pinkerton, Emil Hogberg, Alex Mennie, R. G. Guyett and Geo. E. Bowen.

Speakers at the luncheon included: W. H. George, president of the exchange, E. T. Thurston, Geo. T. Bowen, Jas. H. Pinkerton, D. E. Parquharson, Wm. Feary, Walter N. Reed and H. P. Noland.

Cement Men Win "Trust" Case Appeal

Trade association practices, looking to "the acquisition of wider and more scientific knowledge of business conditions," were held to be within the law by the Supreme Court June 1.

The ruling was established in majority opinions by Justice Stone in cases appealed by the Maple Flooring Manufacturers' Association and by the Cement Manufacturers' Protective Association from adverse decisions in the lower courts.

Chief Justice Taft, and Justices McReynolds and Sanford dissented.

Trade associations, combinations of persons, or corporations, the majority found, are not engaged in unlawful restraint of commerce, when they openly and fairly gather and disseminate information as to the cost of their product, volume of production, actual prices involved in past transactions, stocks of merchandise on hand, and the approximate cost of transportation from the principal point of shipment to the points of consumption, nor when they meet and discuss such information and statistics without reaching, or attempting to reach, any agreement with respect to prices, production or the restraining of competition.

The cases have attracted widespread attention in business circles as tests of trade association rights, particularly in view of the decisions of the Supreme Court holding unlawful the

associations which had been formed by hardwood manufacturers and the linseed trade.

Secretary Hoover, who has been considerably interested in the principles raised in the cases, withheld comment until he could have an opportunity to study the decision.

Justice Stone, in his opinion, declares:

"The natural effect of the acquisition of wider and more scientific knowledge of business conditions on the minds of individuals engaged in commerce, and its consequent effect in stabilizing production and price, can hardly be deemed a restraint of commerce, or if so, it cannot, we think, be said to be an unreasonable restraint, or in any respect unlawful."

Justice McReynolds, in his dissenting opinion, contends, on the other hand, that "carefully developed plans to cut down normal competition in interstate trade and commerce" had been adopted by the two associations "to defeat the policy of the law without subjecting themselves to punishment."

He insisted that the associations are "definite and unusual combinations and agreements, whereby each is obligated to reveal to confederates the intimate details of his business and is restricted in his freedom of action."

OHIO SUPREME COURT RENDERES LABOR DECISION

The Supreme Court of Ohio recently ruled that a closed shop agreement operating generally in a community when taking in an entire industry is illegal. Ohio follows the settled rule laid down in the courts of many states, including New York, New Jersey, Connecticut and Massachusetts. The language of the Ohio court follows: "Contracts by which an employer agrees to employ only union labor, contrary to public policy, when they take in an entire industry of any considerable proportions in a community, so that they operate generally in that community to prevent or seriously deter craftsmen from working at their craft, or workmen from obtaining employment under favorable conditions without joining a union."

SEES END TO LABOR ROWS

In the not distant future, according to Secretary of Labor Davis, employer and employee will think it just as senseless to fight in a strike or lock-out as it would be for a board of directors to transact business by peeling off their coats and going at each other in a battle royal. The old order of hostile employer and resentful union is passing rapidly, and a new order, one of co-operation, is taking its place says Secretary Davis.

PLUMBERS SIGN AGREEMENT

Plumbers have signed a twenty-one month agreement in Washington, D. C. which carries with it a wage rate of \$10.50 per day until Feb. 1, 1926. Effective for one year from that date the rate will be \$11.00 per day.

SIXTEEN SESSIONS IN FOUR DAYS IS SCHEDULE FOR ELECTRIC MEET

Sixteen business sessions in four days is the record that the National Electric Light Association will establish at its annual convention to be held in San Francisco June 15 to 19. The program is said to be the most diversified and comprehensive ever submitted to the membership at any national gathering.

Policies of far-reaching effect in matters of public relations, service and other phases of public utility operation will form the major themes of discussion. There will be four general sessions and the meetings of four main sections—public relations, commercial, technical and accounting.

The importance of this program, together with the opportunity that is to be offered to see California's greatest hydroelectric projects is bringing to this convention many of the outstanding leaders in the electrical profession.

Among these are Girard Swopes, president of the General Electric Company; General Guy Tripp, chairman of the board of the General Electric, and E. M. Herr, president of the Westinghouse Electric Company. In addition there will be practically all of the chief executives of the big power and light companies of the East—Boston, Philadelphia, Detroit, Buffalo, Chicago, St. Louis, Cleveland, Kansas City, New Orleans, Birmingham and Atlanta.

The advance reservation indicate an attendance in excess of 5000 delegates. Four special trains have been arranged for groups of delegates in New York, Chicago and vicinity.

The convention is to be opened by Governor Richardson. Among other speakers outside of the association's membership to address the meeting will be William M. Jardine, secretary of the Department of Agriculture; Herbert Hoover, Secretary of Commerce and L. J. Tabor, master of the National Grange.

TREND OF CONSTRUCTION COSTS LOWER

All building materials are moving in larger volume than a year ago.

The trend of construction costs has been downward, but the descent has been slight and accomplished by easy stages. Stocks of basic materials, at mills and at dealers' warehouses, are plentiful enough to prevent a sudden price advance, Engineering News-Record (New York) reports.

Such items as sand, gravel, crushed stone and other aggregates are cheaper than a year ago in all parts of the country except the South and West. Steel shapes are lower. Cement prices are notably stable, while a firmer situation prevails in brick, tile and lime.

The Northwestern fir lumber camps will shut down for the season in advance of the regular schedule and will not reopen until the log market shows greater stability. Roofing materials are slightly lower in price.

Value of contracts let in the United States on large engineering and construction projects in the week just ended amounted to \$35,052,000, which compares with \$61,610,000 in the preceding week. Total value of contracts let since the first of the year continues to show a healthy gain, amounting to \$36,723,000, as against \$34,548,000 in the corresponding period a year ago. Minimum costs observed in arriving at these totals are \$15,000 for waterworks and excavations, \$25,000 for other public works, \$40,000 for industrial buildings and \$150,000 for commercial construction.

Warm Air Furnace Industry Urged To Adopt Methods of Simplification

Summary of speech of W. A. Gately at Meeting of the National Warm Air Heating and Ventilating Association

"The industrial supremacy of the United States is being menaced by an insidious growth," W. A. Gately of the Division of Simplified Practice, U. S. Department of Commerce, told members of the National Warm Air Heating and Ventilating Association in convention at the Hotel Hollenden, Cleveland, Ohio, April 15.

"This menace comes from the various forms of waste. It falls on every man, woman and child is none the less real because it is invisible. But in six of the greatest industries of the country a group of industrial experts found, in 1920, an average waste of nearly 50 per cent of material and labor. This survey, made under the leadership of Herbert Hoover when he was president of the American Engineering Council, indicated that a large contribution to this deplorable state of affairs was from the effort to make something just a little different.

"It has been estimated," continued Mr. Gately, "that two remedies alone would provide means of recovering ten billion dollars a year—an amount sufficient to pay all Federal, state and municipal taxes, to pay for all passenger automobiles bought in this country in a year and the gas to run them, and then leave enough to pay for all the homes built last year.

"These two remedies are simplification and standardization. The latter takes considerable time and technical and scientific study for the development of the best methods and products. The former is a short cut.

"Simplicity is based on a study of the existing variety, a determination from sales records of what items of any industry are in greatest demand, and the elimination of the excess, obsolete or 'dead wood' styles, models and varieties. It permits concentration of production and sales efforts on the few items. You, as manufacturers, know what advantages mass production holds. And simplification is an application of a commonsense test which every live business man wants to make.

"Secretary Hoover set up the Division of Simplified Practice to help industry to carry this plan farther. He realized that group action was more effective than that of the individual. He understood that many manufacturers would like to make such reductions but fear what their competitors might do. And he charged the Division with cooperating with industry in assembling and studying the facts and in bringing producers, distributors and consumers in an industry together to consider and act on these facts. It is the action of entire groups like these which has brought about an average reduction of 80 per cent in variety among the products of 33 industries. The Division has no police power or regulatory authority to enforce this group action but it can and does give its support in other ways, and it assists in periodical re-surveys upon which revisions can be based to take advantage of the progress in developments.

"A study of the warm air furnace industry shows interesting possibilities for simplification.

"A survey, based on reports of manufacturers in 18 styles from Massachusetts to California, will interest you. Catalogs of 29 firms show that 26 sizes of furnaces are made in 173 styles and types, but that 66 per cent were made in eight sizes. They show that fire pot diameters range from 12 to 35 inches and that variations are as fine as quarter-inch increments.

"It is further shown that 42 sizes of radiators were used in 66 styles and types of furnaces, and that only four styles use the same diameter of radiator. Yet these 66 styles cover but 18 diameters of fire pots. We find 37 diameters of single casings used in 130 styles and types of furnaces, while in double casings there are 50 sizes with 60 styles and types of furnaces. Often times the same inside casing diameter will take two, three or more outside casing diameters.

"There may be reasons for this unusual diversity and apparent lack of relationship between these component parts of a furnace, but if so the reasons should be carefully sought out and analyzed with a view to correcting such a complicated state of affairs.

"Only five sizes of smoke pipe are used for the 26 sizes of fire pot diameters, because we have learned that the few sizes now in use are entirely satisfactory and practical. The same thing will in time be proven true of many of the other parts of the furnace.

"Again, in the eight more popular sizes of furnaces there are 50 different heights, running from 40 inches to 72½ inches. But note that only three heights are used in four sizes, one height used in five sizes, and most of the others used in but one.

"It would seem to me that some people are using more material than others to secure the same results, and probably with no improved efficiency in heating.

"But what is even more startling than any of the foregoing is that in the eight more popular sizes of furnaces the fire door ranges in size from seven by twelve and a quarter inches up to one foot square, and that there are 29 different sizes of fire doors. Certainly it is not possible that any such tremendous variation as this is needed in connection with fire door openings.

"These are but a few hastily-culled facts. Need further argument be advanced to show the need for modification of stock sizes and component parts? A reduction in the number of units now carried would unquestionably reduce manufacturing costs, overhead expenses, warehousing space, and release an appreciable amount of capital now tied up in slow-moving items. This release would benefit not only you manufacturers, but would redound to the benefit of your distributors and the great consuming public."

Mr. Gately in conclusion urged the Association to appoint a committee to examine the subject and to go into the technical details in order that determination might be reached of just how far reaching benefits might be had for the industry through development of simplified practice.

STATE WATER MEASURE IS APPROVED

Continuation of the water resources survey, which has been under way in California for several years, was assured when Governor Friend W. Richardson signed A. B. No. 624, appropriating \$150,000 for defraying the expenses of the investigation, which will be made by the state division of engineering.

Under the terms of the act it will be the duty of the state engineers to investigate surface and underground waters, determine the amount available for irrigation, hydro-electric and domestic uses, and also to investigate flood dangers and the necessity for their control.

The engineers will be required, according to Governor Richardson, "to ascertain the bounds of the agricultural lands and the amount of water necessary to bring them into maximum productivity, and the amount of water required for municipal and industrial purposes and for the development of hydro-electric industry."

"This bill was introduced by Assemblyman Mixer," said a statement by the governor, "and should prove of great value to the state. The state division of engineering has prepared many plans for water conservation and development and is in advance of the demand of the public in the raising of money for the consummation of this project."

"The \$150,000 appropriation will keep up the work heretofore done by the department. In addition to the appropriation allowed in the bill, there is also \$50,000 included in the budget and \$20,000 provided for stream gauging."

SACRAMENTO DOING \$1,000,000 WORTH OF BUILDING MONTHLY

Ben S. Covell, city building inspector of Sacramento, in a report to the city commissioners, shows that building permits valued at \$902,191 were issued during May, a gain of more than \$150,000 over the April permits. The total for the first five months of the year is \$5,450,617, or an average of \$1,090,000 in building each month this year. A continuation of this record, fully anticipated by Covell, will mean a \$12,000,000 constructional record for 1925, or \$3,000,000 more than last year.

The analysis of the May permits shows \$326,850 of the total was for new house construction covering ninety-two single family dwellings. Flats, apartment houses and duplex dwellings added greatly to the housing program.

A small amount went into re-constructional work and the remainder is accounted for by business projects.

PLUMBING PERMITS PROPOSED AT SACRAMENTO

An ordinance to regulate itinerant plumbers and to require those to whom permits to do plumbing work are issued to be registered plumbers has been introduced to the Sacramento city council by Councilman John H. Miller. Miller presented the ordinance at the request of local plumbers.

OAKLAND BUILDING

A. S. Holmes, Oakland city building inspector, reports during the month of May having issued 983 permits for new structures valued at \$2,995,958 and 135 permits for alterations, additions and repairs to standing structures valued at \$182,798, making the total operations for the month 1118 permits the expenditures totaling \$3,178,756.

More Color Urged in Architecture

"Americans are continually criticised for their failure to respond to the artistic or beautiful," said Hazel Adler, notable specialist and authority on color in her address before an audience of architects at the Industrial and Allied Arts Exposition at Grand Central Palace, recently. Miss Adler spoke at the invitation of the Lehigh Portland Cement Company.

Miss Adler said in part: "American temperament is supposed to be dominated by materialism and commercialism. How far the environments in which the great majority of Americans live, have influenced their colorless temperaments, may be judged when one pictures in the mind's eye the external atmosphere of a typical American city or town which, to even a tolerant observer, is drab, colorless and uninteresting. American 'Main Streets' are the cradles of American temperament."

"In every phase of modern life color now makes its appeal. Our books, periodicals and advertising are all colorful. Our clothing, our vehicles, the theatre and our shop windows outdo one another in presenting to the mind a color picture. As life becomes more colorful in all its aspects, so the visible expression of that life—architecture—must become increasingly colorful and architecture today is at the threshold of a color renaissance."

"The possibilities of architectural color expression offered by reinforced concrete represents the simplest and more responsive avenue of approach. The colors suitable for the body of concrete structures are only limited by the artistic conception of the architect. There are no decidedly right or decidedly wrong color. Each color is suitable to a particular architectural type, environment, texture of finish and roof and trim color scheme. The scope of selection is an inspiration in itself. Then, too, concrete color stain is a permanent stain and architects need not fear the havoc to their color selection of sun and weather."

"Colored concrete is not limited to urban cottages, but has even a greater service to offer to residences and buildings in congested cities. In the country, trees, sky, flowers and shrubs offer colorful background, but in the city where the great majority of our population is located, the majority of waking hours are spent amid the grayed and dingy background of the city streets."

"Residential blocks of variegated colored concrete, far from being an eye sore, can be made a source of exquisite delight. In a run down dilapidated neighborhood, only a few block away from the busiest business corner in New York City, a group of artists a few years ago purchased two rows of houses on two adjacent streets with back yards adjoining. They remodelled the exteriors of the old structures with concrete and tinted the back walls of the houses in a charming array of soft blues, stone pinks, gray greens and warm buffs. The back fences were removed and a community garden took the place of the individual backyards."

"The selection of the color for the concrete depends on the architectural type of the house, its surroundings and the roof and trim color scheme which is to be used with it. Warm cream and fawn are always a dependable selection. With the cream, several excellent color schemes readily present themselves."

"A brown roof can be used with green trim; a green roof with brown trim; or a red roof with white trim."

"Lichen green, terra cotta red, stone pink, sage-green, venetian orange, all offer interesting and practical possibilities for stucco houses. Each color of course demands artistic discernment in the selection of the other colors to be used with it."

"The coloring of the walls becomes the problem of the architect and builder as well as the decorator. A wide and delightful range of colors can be applied to interior concrete walls as well as a wide range of interesting textures."

L. A. Gas and Electric Corp. Plans Extensive Expansions

The Los Angeles Gas & Electric Corporation has been authorized by the Railroad Commission to issue and sell on or before September 1, 1925, at not less than 95 1/2 per cent of their face value and accrued interest, \$2,952,000 of its Series "C" general and refunding mortgage 5 1/2 per cent gold bonds, to be dated October 1, 1924, and payable October 1, 1945, and to use the proceeds derived from the sale of said bonds to reimburse its treasury on account of moneys expended on additions and betterments to its plants and properties.

The applicant sets forth in support of its application that during 1925 it will be called upon to expend for additions and extensions to its plants, properties and equipment the sum of \$1,955,612, including the following: Gas works, including two one million

cu. ft. per hour each compressors and one 15 million cu. ft. holder, together with auxiliary equipment and buildings—\$1,340,605.

Electric works: Alameda street station \$175,860; Seal Beach station \$2,570,000—\$2,745,860.

Gas distributing system, including 200 miles commercial mains, 34 miles pressure mains, 25,000 gas services, 40,000 gas meters, 35,000 gas regulators—\$3,438,610.

Electric transmission line from Seal Beach Station, together with step-down substation—\$1,000,000.

Electric distributing system, including new office, shop and garage building, together with substations, transformers, 20,000 electric services and 24,800 electric meters—\$2,757,769.

Miscellaneous—\$62,068. Overhead expense—\$644,600.

DISCUSS BUILDING LAWS

The Burlingame Chamber of Commerce has named a committee to work out a building code covering restrictions and fees for permits. E. L. Nor-

berg, architect, recommended a uniform building code. Following brief talks on the subject the following committee was named to submit a report: E. L. Norberg, Fred Peterson, Edwin Warner and Louis A. Nelson.

ALAMEDA SEEKS FEDERAL AID FOR HARBOR WORK

A move for greater industrial development of the estuary and enlarging the main channel to more than twice its present width was started when the Alameda Chamber of Commerce, at its annual meeting, adopted a resolution requesting the city council to petition the United States government for additional appropriations for harbor work.

The chamber specifically asked that the estuary be widened to a maximum of 1600 feet west of Government island, as has been recommended by harbor experts, to provide for the future growth of the port.

W. G. Norris, shipping magnate who sponsored the resolution, pointed out that at present it is difficult, if not impossible, to turn large ships in the estuary without having them beached on the mud banks on either side of the main channel.

According to Norris, the appropriation of \$884,000, under which the government is carrying out a project for widening the channel to 500 feet, is adequate to carry on work of increasing it to the required width.

DIVORCES HOLDINGS

Signaling the completion of divorce-ment of Oregon and California interests of the Pacific States Lumber Company is a lease filed with the county recorder at Martinez leasing the company's mill and yards at Bay Point to the Coos Bay Lumber Company of California for a period of two years. The concern was formerly known as the Coos Bay Lumber Company but a reorganization resulted in formation of the Pacific States Lumber Company for northern interests of the concern and the Coos Bay Lumber Company of California for the California holdings. The change does not affect the personnel at Bay Point.

ESTIMATOR EXAMINATION

The California State Civil Service Commission, Forum Building, Sacramento, announces an examination will be held shortly at San Francisco, Sacramento and Los Angeles for the position of Junior Estimator for Buildings, Grade 3. The position pays from \$170 to \$230 a month. Receipt of applications closes June 13. Blanks for examination entry and other particulars are obtainable from the commission at Sacramento.

LEAVES FOR EUROPE

Jas. Cantley of the Cantley Roofing Company left San Francisco May 30 on a tour of Eastern cities and Europe. He expects to be gone about four months.

PATENT ISSUED

On May 19, process patent No. 1,538,743 was issued from Washington, D. C. to C. W. Prickett (The Bull Dog Floor "Up Company) of Winterset, Iowa. This process patent is in addition to a reissue patent No. 15,881 granted July 29, 1924.

The Why of High Painting Costs— S. F. Painters Advocate Reductions

For some time past the Master Painters' Association of San Francisco has endeavored to reduce the cost of painting. There have been leaks in the industry, the association holds, that tend to greatly increase the cost per yard.

F. La Torres, secretary of the San Francisco Master Painters' Association with a desire to throw some light on the reason for the high cost of painting has offered for publication an article taken from a recent issue of the New York World showing one of the reasons for the high cost of painting.

"In the many years of many efforts to reduce the cost of painting," says La Torres, "Members of the association have systematized their shops, averaged costs to a fine degree, increased efficiency in labor and finally attempted co-operative buying."

"The paint trusts are like all other trusts—powerful and mighty," continues La Torres. "Imagine one or two firms owning all the pig lead in the country. Yet again consider," says La Torres, "how much worse conditions prevail when one of these pig lead owners also controls the vehicle that enters the white lead—Linsed Oil."

The following copyrighted articles by Silas Bent, written especially for the New York World, brings out one of the reasons for the high cost of painting:

Jardine Opposes Any Cut

There is no doubt that Secretary Jardine thinks about the commission's report.

He opposes the reduction in the rate on linsed oil—any reduction. It is an interesting coincidence that he raises, in regard to linsed oil, the same point as President Coolidge has raised in regard to sugar. It is the question of substituting beet acreage for wheat acreage, for wheat acreage, and it will be worth looking into a little later.

March 9, 1923, paint manufacturers, who made the tariff bill, before passing it along to you, asked for relief from the linsed oil rate. The Tariff Commission report says that "practically complete cost data were obtained from the fourteen domestic companies crushing linsed, more than 95 per cent of the total poundage being reported;" and in addition the costs of English concerns representing 55 per cent of the British output, which would be our competitor if competition were possible, were tabulated.

A public hearing was held in March of 1924, but the report was delayed. Not until last March, two years after the application for relief, was a report made to the President.

Representatives Newton of Minnesota and Burness of North Dakota have protested to the President against reducing the rate. So have Senator Laud of North Dakota, called a "half-breed" Republican by partisan organs, and Senator Curtis of Kansas, the party leader in the Upper House. The tariff no less than politics makes strange bedfellows. Senator Curtis has talked not only to the President but privately to at least one Tariff Commissioner.

Merged Firms Benefit

Only eight companies are large manufacturers and sellers of linsed oil, although thirteen companies own the twenty-six flaxseed mills. The number of mills has been reduced by mergers. One of the large beneficiaries of the tariff, for instance, is the Archer-Daniels-Midland Company, product of a recent merger in Minneapolis, Representative Newton's district.

Another of the big beneficiaries is the American Linsed Company, a subsidiary of the Standard Oil.

Another is the National Lead Company, which owns three flaxseed mills. Another is the Pittsburgh Plate Glass Company, of which R. B. Mellon, brother of the Secretary of the Treasury, is a director. Pittsburgh glass owns two big crushing mills.

Still another is Spencer Kellogg & Sons, Inc., of Buffalo. Of all the flaxseed crushed in the United States, 44 per cent is crushed on the Atlantic Coast and is imported. Most of the other mills use the Canadian or Argentine seed, but the Argentine crop, being grown south of the equator, does not come on the American market until March, after the American grown crop is out of the way. It does not compete with the farmer who grows flax in this country.

Last year the production of linsed

President Coolidge is imposing his pigeon-hole veto, not only on the Tariff Commission's majority recommendation for a reduction in the rate on sugar, but on its unanimous recommendation that the rate on linsed oil be reduced.

All the Commissioners reported that the rate was too high, but the high protectionist members thought it should be lowered only from 24 1/2 cents to 20, while the other three—the three who constituted the majority on sugar—held that 18 cents a gallon, which was about the figure in the notorious Payne-Aldrich bill, would be sufficient. President Coolidge has been suppressing this report since March 3.

Even if the higher figure were accepted—the figure recommended by Chairman Marvin, former editor of the Protectionist, and Commissioner Burgess, former lobbyist for the pottery interests, and Commissioner Glasie, who was prevented by Congress from voting on the sugar tariff—when the tariff rate the saving to factory consumers would be \$86,000 a week.

Would Save \$200,000 Weekly

The saving to the ultimate consumer would be more than \$200,000 a week for taxes have a way of climbing upstairs to you; they mount as they move toward you, and economists say that the tariff on linsed oil is about three times as high when it gets to you.

It is a singular fact that less than 2 per cent of the linsed oil used in this country is imported. The tariff wall is so high for foreign competitors to climb. Most of the oil imported, as was shown in the Tariff Commission hearings is brought in by the American producers themselves and sold under their own brands. They do this to cover on short sales during market flurries. They import foreign linsed oil, pay for the long haul, and still profit.

So that, while consumers in the United States, factory consumers, were paying nearly \$24,000,000 last year as the cost of linsed oil, the linsed oil tariff, Uncle Sam was collecting less than half a million in linsed oil revenue. But he did collect a tariff on the flaxseed imported for crushing into linsed oil. This is an agricultural tariff, but is only about half as high as the manufacturing tariff.

President Coolidge, after consulting various officials about the embarrassing situation in regard to linsed oil, referred the commission's report on Wednesday to the Department of Agriculture.

Then, in his disguise as a "White House spokesman," the President gave newspaper men a new theory of the "flexible tariff." He said he was under no obligation to "equalize costs of production" according to recommendations of the commission. His first obligation, he explained, was to see that American industry was not disturbed by tariff changes. In regard to linsed oil, he wished to get the views of Secretary Jardine's department as to the effect of a rate change on farmers who grow flax.

oil in the United States was more than 700,000,000 pounds.

The imports were a little more than 13,000,000 pounds, or 1.87 per cent of the domestic production. The present tariff is 3.3 cents a pound, or a fraction under 25 cents a gallon.

Subject to Drawback

Now, the flaxseed crushers imported last year 16,500,000 bushels of flaxseed, which was 44.66 per cent of all the seed they crushed. And they paid a tariff on this seed—we will soon get past these figures—of 40 cents a bushel. This, however, was and is subject to a drawback when linseed cake and meal made from it are exported; and the crushers themselves have admitted that the drawback—since they export practically all the meal and cake—leaves a net tariff to pay of 30 cents a bushel. The Treasury collected a net revenue on flaxseed last year of about \$1,000,000. The Treasury also got something less than \$500,000 from the import on linseed oil.

But the factory-consumer cost of the tariff was to be exact—\$23,326,739.97. Now let us suppose that the flaxseed crushers paid a net tariff of 30 cents a bushel on all their seed, domestic and imported. (They do not, because with wax, as with sugar, the farmer fails to "get his share.") But we suppose that the labor cost of crushing is 90 cents a ton higher in this country than in England, as the Tariff Commission figures show; let us assume that the eight main beneficiaries of this tariff have manufacturing handicaps, and there is still a subsidy to them taken from the public's pocket, of \$1,908,355.41.

Let us suppose that nearly \$3,000,000 of this goes to the small fry, such as the Fredonia Linseed Oil Company of Kansas. Keep in mind the concern in Senator Curtis' State lives only by sufferance of the big fellows—and we still have an annual tariff-gift to the big fellow of \$1,000,000 each, after labor and the farmer get their share of the bit.

If flaxseed were imported as oil (instead of as a raw commodity) it would yield a tariff revenue at the rate of 62.5 cents a bushel. Imported as seed it yields a tariff revenue of 30 cents a bushel net. It is clear that so long as the rate on the bushel remains untouched the farmer need not worry about a reduction even of 5 cents in the rate on linseed oil.

But it is the farmers, curiously enough, who have been egged on to protest against the linseed oil rate reduction. The farmers have been from time immemorial the goats of tariff manipulators. They pay a linseed oil tax on every varnished or painted field implement they buy, in the paint for their barns, in a dozen ways, just as they help pay the beet sugar barons' immense profits. But they lift their voices nevertheless in behalf of high rates on sugar and linseed oil.

The linseed oil crushers—twelve of them—were denounced by the Supreme Court in June, 1923, for their unlawful compact to boost prices. The Supreme Court said that they fixed prices through Julian Armstrong, operating in Chicago under the name of the Armstrong Bureau of Related Industries. Said Hagar A. Austin, Secretary of the United States Sugar Manufacturers' Association, representing at Washington the tariff interests of the beet sugar manufacturers, in an article which appeared Feb. 2, 1924, in "Facts About Sugar," the weekly organ of the beet sugar manufacturers:

"During the past ten years the United States imported an average of more than 6,000,000,000 pounds of sugar annually, with an average annual value of \$295,000,000.

"In the same period the United States exported an average of 16,000,000 bushels of wheat annually with an average annual value of \$289,000,000."

The article was an argument that the wheat area should be reduced and sugar beets be planted instead, under the encouragement of a high tariff.

IN NEW QUARTERS

Pacific Metal Products Company formerly located at Second and Madison Streets, has moved to 4402 Market Street, Oakland.

R. M. Morton, Highway Chief, Submits Plans for Permanent Road Markers

At a conference in San Francisco of western members of the joint board which is considering plans for a uniform system of signs for interstate, federal aid highways, R. M. Morton, state highway engineer of California, suggested the "adoption of a permanent marker which will embody ideas distinctive of the history and stability of the United States."

The designation of interstate routes, Mr. Morton believes, should be on a much more permanent basis than is possible with enamel or other similar signs such as have been heretofore suggested; particular warnings and other signs of similar character, of course, should be of uniform design and color but the markers which will designate the great trunk line highways of the Nation should be of more lasting construction, perhaps memorial in character.

In a letter to Thomas H. MacDonald, chief of the United States Bureau of Public Roads, he says:

"In California we would hesitate to spend our money on temporary markers, as long as the automobile clubs so efficiently and adequately do the work for us.

"What is needed for route designation is the adoption of a permanent marker to be placed at state intervals. It should be designed by competent artists and perhaps selected as the result of competition. Such markers should be constructed of cast

iron, granite or other enduring stone, or of concrete, and should embody ideas distinctive of the history and stability of the United States.

"I am sure that artists and designers could be imbued with the ideas the highway engineers desire to express and that some of the best ability in the country could be brought to bear upon the details of the design. If cheap signs are put up maintenance costs will be more than the states desire to carry, and within a short while a movement will be started for more permanent markers."

Mr. Morton suggests placing the markers at intervals of five or ten miles along the main trunk with a smaller replica for each intermediate mile. The California highway engineer is a member of the board recently appointed by the Secretary of Agriculture to work out a plan for a system of markers and for the naming and numbering of the main interstate highways of the country, included in the federal aid system. A uniform system of warning signs is particularly desired as a safety measure.

California routes tentatively recommended for inclusion in the suggested system of "United States Highways" are the two trunk lines up and down the state, north and south, and the Yuma, Needles, and Truckee River connections with Arizona and Nevada and the roads connecting Sacramento and Stockton with the Bay district.

Limestone Sales in Indiana District

The largest quarry center in the United States, if not in the world, for the production of building stone is the Bedford-Bloomington colitic limestone district of Lawrence and Monroe counties, Indiana. In recent years the value of building stone from this district has amounted to nearly one-half the total value of all stone quarried for like purposes in the United States.

According to reports received at the Department of the Interior through the Geological Survey the sales of building limestone by the quarrymen in the Bedford-Bloomington district in 1924 amounted to 11,005,570 cubic feet, valued at \$14,164,241. This is a decrease of nearly 6 per cent in quantity

and 7 per cent in value from the figures reported in 1923.

The stone sold by the quarrymen in the form of rough blocks amounted to 4,594,970 cubic feet, valued at \$2,364,217, a decrease of 4 per cent in both quantity and value. The total milled and cut stone sold by the quarry owners operating mills and cutting plants in the district amounted to 6,410,600 cubic feet—7 per cent less than in 1923. Nearly 40 per cent of the rough blocks sold by the quarrymen was sold to mills in the district, the operators of which re-sold in 1924 as dressed stone 1,754,500 cubic feet, valued at \$4,654,145, an increase in quantity sold of 5 per cent over 1923.

ARCHITECT RETIRES

M. V. Politeo, one of the pioneer practicing architects in San Francisco, announces his retirement from active practice. Mr. Politeo was formerly a member of the firm of Cunningham & Politeo. Since the death of Mr. Cunningham, Mr. Politeo maintained offices in the First National Bank Building, San Francisco.

ALL QUIET IN THE BUILDING TRADE

Country Cousin (after prolonged inspection of building operations)—"I don't see the sense of putting statues on the top of your buildings."

Friend—"Statues? Those aren't statues. They're bricklayers."—Punch.

WHY WORRY

Oh, there always will be troubles
 And you can't get rid of them, we can do,
 But, so far as I can figure,
 There is no use being blue;
 If I ever take to preaching
 I will choose this for my text;
 'Count your blessings,' 'stead of guessing
 What darn thing is coming next.'

THE ABOVE eight lines

CONTAIN ENOUGH advice

TO DRIVE away

MOST OF the gray hairs

IN THE world

FOR CLARENCE Sand Pratt, President

OF THE Pratt Building Material Co.

PRODUCER OF sand and rock

AT PRATTROCK (near Folsom)

SACRAMENTO AND Marysville

AND PRATTICO (Monterey County)

SEES SO many people

WORRYING ABOUT nothing

DO YOU know, dear reader,

THAT HALF of us

WORRY OVER things

THAT NEVER happen

THE THING to do

IS SANDY Pratt sees it

IS TO dress up

EACH MORNING

IN A suit of clothes

MADE OF happiness

AND SEWED together

WITH SUNSHINE thread

AND WHEN you walk

ALONG THE street

FACE THE sunshine

AND YOU never

SEE THE shadows.

"I THANK you".

Be the early bird. Get the worm
 (and/or food—whatever you need)
 and you don't have to worry. Sandy
 Pratt, producer of clean sand, crushed
 rock and washed gravel is on the job
 (early bird) and does not have to
 worry. This is the reason Sandy's
 business is growing so fast.

Official Proposals

NOTICE TO CONTRACTORS

(Roads—Crater Lake National Park)

DEPARTMENT OF THE INTERIOR, NATIONAL PARK SERVICE, WASHINGTON, D. C., May 19, 1925. Bids will be opened by George E. Goodwin, Chief Civil Engineer, at 808 Couch Bldg., Portland, Oregon, at 2 o'clock P. M., June 9, 1925, for certain sub-grade rectification and surfacing with asphaltic macadam, of about 18 miles, or more, of roads in the Crater Lake National Park, Oregon. Contracts will be entered into for about \$170,000 worth of work to be done under firm, low bid, immediately available, and for such additional work as may be necessary, which will be done under congressional authorization for obligations to be incurred and paid for under future congressional appropriations. Instructions to bidders, blank proposal forms, specifications and drawings can be obtained from Mr. Goodwin's office at 808 Couch Bldg., Portland, Oregon, upon written or personal application and deposit of \$5.00, which deposit will be refunded upon the return of the specifications and drawings in good condition prior to opening of bids. Specifications and drawings can also be seen at the office of the Superintendent of Crater Lake National Park, at Medford, Oregon, and at Crater Lake, at the Chamber of Commerce at Seattle, Spokane, Tacoma, Washington; Klamath Falls, Eugene, Salem, Oregon, and Sacramento and San Francisco, California.

STEPHEN T. MATHER, Director.

37

NOTICE TO CONTRACTORS

(Pescadero High School)

NOTICE IS HEREBY GIVEN by the Board of Trustees of the Pescadero Union High School District at Pescadero, San Mateo County, California, that bids will be received by said Board of Trustees for the erection and construction of a new High School Building at Pescadero in said District.

Plans and Specifications may be obtained from the Clerk of the Board at Pescadero, or from the Architect, Norman R. Coulter, at 16 Kearny Street, San Francisco, California. A deposit of Ten Dollars (\$10.00) will be required for each set of plans. All bids will be opened by the said Board of Trustees at 8 o'clock P. M., on the 12th day of June 1925, at Pescadero Union High School Building and all bids must be delivered to E. R. Pinkham, Clerk of said Board, before that hour, enclosed in sealed envelope and marked on the outside, "Bids for construction of High School Building at Pescadero."

All bids must be accompanied by a certified check or cashier's certificate, payable to the order of the Board of Trustees, in the sum of Ten Percent (10%) of the amount bid; check or certificate of deposit to be made payable to the Board of Trustees and to be returned to the party or parties whose bid or bids are not accepted, and to the party whose bid is accepted upon his entering into a contract with the said School District and giving such bonds as may be required by Law or said Board. The Board of Trustees reserves the right to reject any and all bids.

E. R. PINKHAM, Clerk of the Board of Trustees of the Pescadero Union High School District, Pescadero, San Mateo County, California.

NOTICE TO CONTRACTORS

(Heating—Lettman Hospital)

OFFICE CONTRACTING QUARTERMASTER, Fort Mason, Calif. Sealed proposals will be received here until June 8, 1925, for altering steam heating system at Lettman General Hospital, Calif. Information upon application.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Sunol Glen School District)

NOTICE IS HEREBY GIVEN that sealed bids will be received by the Clerk of the Board of Trustees of Sunol Glen School District of Alameda County, California, Mr. A. W. Wright, at his office in the Spring Valley Water Company Building, in the Town of Sunol, Alameda County, California, until Thursday, the 18th day of June, 1925, at 7:30 o'clock P. M., at which time said bids will be opened for furnishing all labor and materials and mechanical workmanship required for the erection and completion of a one-story school building, including furnishings and equipment, for the Sunol Glen School District of Alameda County, to be erected in the Town of Sunol, County of Alameda, in said School District, in accordance with the complete plans and specifications for said work on file and open to inspection at the office of the architect, W. H. Weeks, 1524 Broadway, Oakland, California, and on file with the Clerk of this Board at his office heretofore mentioned. Copies of said plans and specifications may be obtained at the office of said architect, on the demand of the sum of twenty-five (\$25.00) Dollars. Contractors will be restricted as to the length of time they may retain these plans and specifications to the day of opening bids. If the plans and specifications are not returned to the Clerk of said Board or said architect within the time above specified, or are returned in a mutilated or damaged condition, the deposit shall be retained by the said school district as agreed and liquidated damages for said mutilation or detection, and will be immediately used for the purchase of a new set of blue prints and specifications.

Each bid must be made on proposals obtained at the office of the architect, and must be signed by the bidder and accompanied by a certified check for at least ten (10) per cent of the amount of the bid or proposal, certified to by some responsible bank or banker, and made payable to the Board of Trustees of Sunol Glen School District of Alameda County, California, to be retained by said school district as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to

give the bond required for the faithful performance of the contract or any bond required by law.

Bids will be opened by the said Board of Trustees of Sunol Glen School District on Thursday, the 18th day of June, 1925, at the hour of 7:30 o'clock P. M. at the present Sunol Glen School Building, in the Town of Sunol, Alameda County, California, in said school district.

The Board reserves the right to reject any and all bids or any or all items of such bids.

Dated: May 27, 1925.

A. W. EBRIGHT,

Clerk of the Board of Trustees of Sunol Glen School District of Alameda County, California.

37

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on June 29, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, at the following: Los Angeles County between Sunland and La Canada (VII-LA-9-A), about eight and one-tenth (8.1) miles in length; to be widened with Portland cement concrete shoulders.

Plans may be seen, and forms of proposals, bonds, contract and specifications may be obtained at the said office and they may be obtained at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at: William Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any and all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,

LOUIS EVERDING,

California State Highway Commission.

R. M. MORTON,

State Highway Engineer.

W. F. MINON, Secretary.

Dated June 1, 1925.

NOTICE TO CONTRACTORS

(Hayward Union High School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of the Hayward Union High School District of Alameda County, California, hereby calls for sealed bids to be delivered to the Secretary of said Board at the office of the Principal in the Hayward Union High School Building, located on the east side of the Foothill Parkway, immediately North of the intersection of said Boulevard with San Lorenzo Creek, near the town of Hayward, Alameda County, California, until Saturday, the 27th day of June, 1925, at 2 o'clock P. M., at which time said bids will be opened for the erection and completion of a new reinforced concrete building and a Connecting covered walkway between the existing building and new building and alterations and additions to the present Academic building of the Hayward Union High School District. Said work is to be done on the grounds of the said Hayward Union High School building located as above described. These bids shall be presented in accordance with plans and specifications for completely filled out. On deposit of Fifty (\$50.00) Dollars, plans and specifications for said work above mentioned may be had, any bidder on application to said Secretary of said Board of Trustees or on application to said architect, at the addresses above mentioned, and may be retained for the period of twelve days. The plans and specifications are not returned to the Secretary of said Board or said architect within the time above specified, or are returned in a mutilated condition, the deposit shall be retained by the said High School District as agreed and liquidated damages for said mutilation or detention, and will be immediately used for the purchase of a new set of blueprints and specifications. Bids must be made on proposals obtained from the Secretary of said Board or said architect at the addresses above specified and must be signed by the bidder and accompanied by a certified check certifi-

ed to by some responsible banker or bank, and made payable, to "N. P. Nielsen, Secretary of the Board of Trustees of Hayward Union High School District of Alameda County," to be retained by the said High School District as agreed and liquidated damages, should the party or parties to whom the contract is awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract or of any bond required by law. Only surety companies will be accepted. The amount of the certified check accompanying said bid shall not exceed \$5000.00 but for all bids of less than \$5000.00 said check shall be 10% of the amount of the amount of the bid. Bids will be opened by said Board of Trustees on Saturday, the 27th day of June, 1925, at 2 o'clock P. M. in the office of the Principal in the Hayward Union High School Building, located as above described. The Board reserves the right to reject any and all bids or any or all division or items of such bids.

N. P. NIELSEN, Secretary of the Board of Trustees of Hayward Union High School District of Alameda County, Calif.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until 2 o'clock p. m., on June 22, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to widening and resurfacing certain portions of State Highway, as follows:

Santa Cruz County, near Boulder Creek (IV-Sr.Cr.-44-A) the following:
A reinforced concrete box culvert at Station 171+72 at Pal Cerro Creek, consisting of a 5-foot by 5-foot opening 94 feet long with wing walls.

A reinforced concrete girder bridge 21 feet wide, at Station 126+60 across High Bridge Creek, consisting of three 21-foot spans on concrete bents.

A reinforced concrete box culvert at Station 131+73 at Cleveland Dam Creek, consisting of a 5-foot by 5-foot opening 45 feet long with a retaining wall and wing walls.

Imperial County between El Centro and Holtville (VIII-Imp-27-C), about eight and six-tenths (8.6) miles in length. The graded and surfaced with crushed gravel or stone or with decomposed granite.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the Division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

Bids will be received unless it is made in a blank form furnished by the

Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
H. R. HARRIS, Chairman.
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: May 25, 1925.

NOTICE TO CONTRACTORS

Luba Pass Extension Forest Highway

Sealed proposals for constructing the above-named National Forest highway, located within the Tahoe National Forest, Sierra County, State of California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 400 Bay Bldg., 9 Main St., San Francisco, California, until 10 o'clock a. m., on the 16th day of June, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The project to be constructed consists of a section of the Luba Pass road between Gold Lake Junction and Sierra City, and is 3.71 miles in length. The principal items of work are approximately as follows:

Clearing, 12,000 cu. yds.
Excavation, unclassified, 54,652 cu. yds.

Class A concrete, 171 cu. yds.
Class B concrete, 94 cu. yds.
Reinforcing steel, 27,304 lbs.
Corrugated metal pipe, 1,222 lin. ft.
Crushed rock surfacing, 3,630 cu. yds.

Construction shall be started within fifteen days after notice of award of contract has been given to the contractor by the District Engineer. The work shall be completed within one hundred twenty-five (125) weather working days after said notice of award of contract is given.

The contract form, maps, plans and specifications may be examined by responsible contractors at the following address:

400 Bay Bldg., 9 Main St., San Francisco, Calif.

J. F. Waller, Assistant, Calif. The Bureau has available for loan to contractors on a rental basis, equipment at Government Island, Oakland, California, as listed in the specifications. Bidder will state in his bid the Government equipment that he will use during construction and minimum time required. The estimated rentals will be taken into consideration and award will be made on the bid to the best advantage of the Government. Government explosives are also available according to the terms of the specifications. Corrugated metal pipe will be furnished by the Government.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and experience and upon deposit of a check for \$1000 payable to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming part of the specifications above referred to.

May 26, 1925.

C. H. SWEETSER,
District Engineer.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

Recent construction projects announced in Canada, as reported by Assistant Trade Commissioner Donnelly, Ottawa, include an 850 foot railway bridge, a \$200,000 theatre project, a \$100,000 fish reduction plant, a \$900,000 subway, and a store building to cost approximately \$2,500,000.

The Clyde Builder's Hoist

Photo shows Clyde single drum reversing builders' hoist working for Kralh Construction Co., Chicago, on the new Venetian Bakery building.

The Clyde single drive reversible steam hoist with boiler and elevator sheave is a unit of the Clyde line which has demonstrated repeatedly its ability to more than meet the requirements.

It is built with the usual Clyde thoroughness in detail construction. Cut gears, extra large shafting, turned and ground, asbestos lined brakes and heavy pawls, all contribute to the satisfaction found in the finished product.

When desired, the hoist can be equipped with friction clutch elevator sheaves, instead of jaw clutch. Full details upon request.

You'll Take Pride in Your Clyde!

COBURN PUTS S. F. SCHOOL BUILD-
ING SYSTEM

The San Francisco Board of Education has denounced the legal system of building schools and praises the Los Angeles method with regards to school construction. Through their own control of building, the Los Angeles School Department has spent \$15,000,000 in one year and has 123 schools in course of construction, according to Ira W. Coburn, general contractor and a member of the Board of Education, who recently returned from the southern city where he attended the Shriners' Convention.

Coburn draws attention to the fact that San Francisco's \$12,000,000 new schools program has been three years under way and only \$5,000,000 of the bonds have been actually sold and not all of that amount yet spent. "We must revamp our system," Coburn says.

Declaring that building is "as cheap in San Francisco as in Los Angeles," Coburn complains that "a new high school in San Francisco costs \$1,200,000, while in Los Angeles they build just as serviceable a school for \$350,000."

COPYISM AND ORIGINALITY IN ARCHITECTURE

Whatever the shortcomings of modern architects and architecture, the interminable criticism of their lack of originality becomes tiresome, and, we are inclined to think, decreasingly effective. It is trite that righteousness can not be legislated upon a people; that education will not make a wise man out of a fool; that God is not moved by prayer of "vain repetition."

Should it not be equally obvious that an architecture, genuine and all our own, will not be attained by harping on the need of it? Certainly the one and only distinctive architecture of our day—the skyscraper—came from no deliberate attempt to create a brand new style. It developed naturally as a part of our scientific, industrial and financial development; and most certainly it is not the child of any architectural tour de force. Countless blunders have been made in its clothing and adornment—classic columns carrying impossible loads, ornament out of scale or located almost out of sight, grotesque attempts and nameless monstrosities in efforts at original treatment—but the skyscraper itself remains—a thing significant, inspiring, even when badly treated. In it we already have an architecture of our age and nation. Its treatment deserves the greatest care but novelty is not the foremost requirement thereof.

The well-intended criticisms of the profession and the calls for originality have become largely labored. They clamor for the obviously desirable without constructive contribution to its attainment; and they sometimes leave the impression (probably unintentionally) that their authors value novelty more than fitness of design.

Universal originality (a really impossible thing) would mean chaos instead of style—a jangle of notes without rhythm instead of ordered passages. The devices of every art are limited. In most instances they are surprisingly few, but their possible combinations and arrangements run to astounding numbers. The great artist is revealed by the fitness and effectiveness of the combinations he uses.

Is it not probable that much of our straining for architectural originality actually impedes our movement as sometimes does the "muscle-bound condition of an athlete?"

This is no argument for slipshod or lazy methods, but if we work honestly and for honest expression, using whatever gifts of ingenuity and originality we may possess, we are more likely to produce architecture of merit than if we overemphasize the need of being different.—Engineering & Contracting.

ASSUMES NEW POSITION

George Duncan, formerly one of the two representatives in the Oakland field for the General Electric Company, has joined the staff of the Pacific Electric Motor Company with headquarters in Oakland.

HUGE LUMBER MERGER IS COMPLETED

The largest merger of lumber yards ever attempted on the Pacific Coast is believed to have been consummated in Sacramento with the organization of a \$2,000,000 concern, headed by California and Eastern capitalists, to take over the Sacramento Lumber Company, and the Kewin lumber yard of Modesto.

Formal announcement of the gigantic lumber merger was made by J. W. S. Butler, director of the corporation, who stated plans of the company call for the amalgamation of a large number of Pacific Coast lumber yards into one of the largest chains of retail concerns in the nation.

Headquarters of the new company, which will be known as the United Lumber Yards, Incorporated, will be located in Sacramento.

Included in the gigantic merger are the eight yards of the Kewin Lumber Co. of Modesto, located throughout the San Joaquin Valley, and the Sacramento Lumber company, giving the new organization a nucleus of nine yards to start with.

The price paid by the new organization for the Sacramento plant was said to be in excess of \$250,000, and the Kewin interests were understood to have been purchased at a cost of \$300,000.

No change in the personnel of the local organization is planned, according to Butler. Lawrence Chapman, manager and part owner of the Sacramento Lumber Company, will remain as executive of the concern. J. C. Butler, son of J. W. S. Butler, will be assistant manager.

In addition to the \$2,000,000 capital of the organization, comprising preferred stock to be issued, approximately 60,000 shares of no par value common stock will be issued. The company was recently organized under the laws of Delaware, and copies of the articles of incorporation have been filed with Frank C. Jordan, secretary of state.

Directors of the new organization are: J. W. S. Butler, Sacramento; E. C. Peck, vice president of the United Bank and Trust Company, Sacramento; George H. Thompson, Minneapolis, former prominent lumber man of that city; E. H. Kewin of Modesto, organizer of the Kewin lumber yards, and C. E. Hagee, Fullerton.

BAKERSFIELD ROCK PLANT TO COST \$100,000

The Bakersfield Rock and Gravel Company has announced plans to build a plant near Bakersfield with a capacity of 50 tons per hour at an approximate cost of \$100,000. Engineers reports and extensive laboratory tests made on the Bakersfield deposit estimate that between 5,000,000 and 10,000,000 tons of commercial material is accessible. Fred C. Macomber, rock man of Taft, is president of the Bakersfield Rock and Gravel Company. J. B. Dowd is vice president and C. F. Smith is secretary. Other directors are J. R. Hughes and J. N. Harvey.

NEW LAW PROVIDES COMPULSORY COMPENSATION INSURANCE

The State Legislature of 1925 enacted the following changes in the Workmen's Compensation, Insurance and Safety Act, effective July 24, 1925:

Amending sections 9 and 24, whereby the all wance for burial expense is increased from one hundred to one hundred fifty dollars. This amount to be in addition to any death benefit allowed dependents.

Amending section 46½, making it a misdemeanor to operate places of employment after prohibition by the Commission, or to deface, destroy or remove notices posted by the Commission prohibiting the operation of such places of employment.

Amending section 29, making it a misdemeanor not to secure the payment of compensation by either carrying the Commission's certificate of consent to self-insure. Failure to so secure being punishable by a fine of not more than five hundred dollars or by imprisonment for not more than six months, or by both fine and imprisonment.

In this connection the Commission is authorized to require the employer to furnish a written statement at any time showing the name of his insurance carrier and failure of the employer to furnish such written statement after a period of ten days constitutes presumptive evidence that the employer has not complied with the law.

RECOMMENDED BUILDING CODE ISSUED BY CEMENT ASS'N.

The Portland Cement Association, 111 West Washington Street, Chicago, has just issued a revised edition of the association's "Recommended Building Code" for cities with populations from 25,000 to 150,000.

The code was first issued in June, 1923. While no important changes have been made, some sections have been modified in accordance with recent developments. For instance, publication of the new report of the "Joint Committee on Standard Specifications for Concrete and Reinforced Concrete" necessitated some changes in Section 45 in order that the code might conform to that report.

Other changes include amplification of Section 44, on Masonry Construction. A complete index has been added.

Cities or individuals interested in building code revision can obtain copies by addressing the Portland Cement Association at Chicago.

COURT REVERSES DECISION IN JURISDICTIONAL DISPUTE

What is believed to be one of the most important decisions ever handed down by a court in a labor dispute was rendered by the United States circuit court of appeals at Cincinnati on May 15th. This decision makes permanent an injunction granted in the Federal Court at Cleveland two years ago, which denied the right of sheet metal workers to strike on jobs where metal trim was installed by carpenters.

The issue arose out of the long standing dispute between the two crafts, which has caused considerable trouble throughout the country. In the opinion of attorneys who have examined the decision, it means that contractors are free to employ any trade to do work and a strike by a trade not chosen to do that particular piece of work is illegal. The court holds that the right to strike or threaten to strike as a means of coercing an employer with whom the strikers have a direct controversy is not questioned.

Building Barometer Shows Business Good

By E. C. Smith, Vice-President, S. W. Straus & Co.

Business and industrial conditions throughout the country and especially along the Pacific Coast are fundamentally sound and business in practically all lines is steadily strengthening. The building industry was never in more satisfactory condition, and there is probably no safer barometer to follow, in attempting to forecast general business volume, than the statistics of construction.

Building is under way in our Pacific Coast cities to a degree that promises an activity throughout the coming months which may establish a new high figure for the year's total, probably \$500,000,000 in construction costs for the 80 major cities of our seven Far Western States. Mr. S. W. Straus, president of S. W. Straus & Co., in a recent interview published by a New York newspaper, is quoted as anticipating a \$6,000,000,000 total of building in the United States for 1925.

Business soundness or weakness is always first noted in building. Tightening of money in anticipation of a slowing down of business is always promptly reflected in a curtailment of building plans and general confidence is always immediately shown in new construction projects. Building is an essential and basic industry, but it employs and is dependent upon large investments and it is one of the first indices to reflect fundamental financial conditions.

But we are not entirely dependent at this time upon the tendencies of the building industry for verification of the opinion that business generally is progressing along sound lines. The employment curve shows an increase

over the first part of 1924. Workmen are earning more money and manufacturers in more than a score of industries are handling a greater volume of business than last year.

The increase in volume earned by workers is due also to an increase of working hours per week, rather than to higher wages per hour. Almost spectacular gains have lately been reported from the lines of trade which suffered the most last year. The cost of labor, material and practically all essential commodities, is apparently more firmly stabilized at this time than at any period since the World War. The importance of stabilization cannot be too strongly emphasized in an attempt to estimate the general business situation.

Progress is dependent upon harmony in labor circles, efficiency of workers and genuine co-operation between manufacturers and merchants. So long as these controlling factors are kept in working accord there is no need for apprehension, even though slight variations may occur here and there in volume of current business in any given line or branch of industry.

One of the most encouraging aspects of the business situation today is the disappearance of all spectacular booms and widespread depressions. The important thing is to keep our national commercial machine functioning smoothly. It is necessary for business to safeguard itself against inflation and thus seek protection from deflation. Over-production in any line should be discouraged. A stabilization of production alone can maintain a permanent balance between supply and demand.

Details Secure Best MillWork Bids

A recent service bulletin of the Millwork Institute of California urges the importance of details to enable estimators to give a fair and equitable price on millwork.

"To make an intelligent and equitable estimate on millwork, the plans and specifications should be complete" says the bulletin. "The incomplete plan or conflicting specification leaves too much to the estimator's judgment and is the direct cause of misunderstanding between the architect, owner, contractor and mill. It also accounts for much of the variance in millwork bids."

"The judgment of different estimators in the survey and pricing of a plan not sufficiently detailed or one indefinitely specified will not be the same. Even the interpretation of telephone information will differ. One estimator will add a certain amount for contingencies and the other will let his price stand, assuming that he understands what is wanted."

"A job taken too low, by reason of insufficient details or faulty and conflicting specifications, is apt to be subject to substitutions or trimming down in an effort to get out of the hole."

The conventional 3/4-inch scale elevation and small scale details are of little help in pricing a job. They allow the estimator to somewhat visualize the extent of the drawings, but are of no use in determining the width and thickness of frame material, cornices, moulds, doors, stiles and rails, and of the many different items enter-

ing into a full mill bid.

"No estimator can determine from the elevation of a door drawn to 1/4", 1/2" or even 3/4"-inch scale if it is solid square stock, solid stuck with mould run on edges of stiles, or applied raised or flush mould. Neither can he be sure that the jams, casings, etc., are run from 1", 1 1/4" or thicker stock. All these points have a bearing on the price."

"In most finish lumber, particularly woods of great value, 1/4" in thickness or width oftentimes adds 25% to the cost of the material. Therefore, to enable the mill to determine the exact material requirements, the details should be of sufficient size to absolutely prevent guessing. Unless dimensions (thickness and width) are specified, marked or otherwise indicated, sectional details should be drawn to not less than 1/2" scale; in fact in most cases 3/4" scale would be preferable."

"The essential requirements for the intelligent estimating of millwork is to have 1/2" to 1" scale drawings of the elevation and plans of all casework, mantels, balustrades, entablatures, pediments, doors, wainscoting, paneling, stairs, rails, store fronts, etc., supplemented with 1 1/2" scale (3") would be better) sectional details, showing dimensions and method of construction. All cornices, beams, frieze and moulds should be drawn to 3-inch scale."

"Carving and all hand tooled work should be detailed half size. If this cannot be done, a flat sum should be allowed for this class of work and the amount stated in the specifications."

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

EDWARD GLASS RESIGNS FROM STATE BOARD

Edward Glass, San Francisco architect and member of the State Architectural Board, announced his resignation from the board yesterday. He has served on the board six years and said he felt that he had done his full duty to the State.

"My office has a large number of schools under construction in and around Bakersfield and in Los Angeles," he said, "and, because I am out of the city so much, I cannot attend the board meetings, and, in justice to the board and the State, I have felt that it was only proper for me to resign. There is nothing of political significance in my action. All my relations with other members of the board have been extremely cordial and no friction of any kind has arisen as far as I am concerned."

MATERIAL DEALERS MEET

The California Builders' Supply Association held its regular monthly meeting, June 5, in the Hotel Oakland, members from Sacramento, Stockton, Santa Rosa, San Jose, Richmond, San Francisco, Oakland, San Mateo and Burlingame being present.

Matters of importance to supply firms were discussed and committees appointed to act on recommendations made on the various suggestions offered to better conditions in the industry.

Discussing business conditions in the Northern California district, members reported as a busy season with expectations that the current year will prove the biggest in the history in the state.

HARMONY IN ARCHITECTURE

The regents of the University of California have inaugurated a new policy of "architectural harmony" which will be enforced hereafter in adding to the building groups on the Berkeley campus and in constructing new buildings of the institution elsewhere in the State.

To carry out their policy the regents named George W. Kelham, of San Francisco, who was supervising architect of the Panama-Pacific International Exposition, to be supervising architect of the university, with power to approve or disapprove plans. A resolution embodying the new policy was adopted by the board.

CO-OPERATION MEANS SUCCESS

An association formed for the purpose of advancing and protecting the mutual interests of its members can only succeed when it functions through its duly authorized channels—with its members co-operating unselfishly and squarely.

SALESMEN ORGANIZE

The San Diego building material salesmen recently organized a club for the purpose of elevating the methods and ethics of their business.

Santa Clara County Builders Hold Thirty-fifth Annual Banquet

By Joe Odgers

Arthur Rowe, Santa Clara county district sales manager for the Garnett-Young Company, wholesalers in electrical supplies, was the principal speaker at the thirty-fifth annual banquet of the Builders' Exchange of Santa Clara County, held Saturday evening, June 6, in the San Jose Commercial Club, San Jose. Mr. Rowe talked on the subject of "Organization" and his remarks were well received by the guests.

The banquet opened with an address of welcome by R. M. Butcher, president of the Santa Clara county exchange, who introduced E. H. Galpin as toastmaster. Ralph Wyckoff, San Jose architect, delivered an interesting address on the "Co-Operation of Architect and Contractor" stressing the fact that it is only through co-operation between both parties that the job will be brought to a satisfactory finish. Other speakers included F. Schieggner, building material dealer of San Jose; Geo. Fuhrman, sheet metal contractor and Wm. F. Serpa, plumber. A telegram was read from Wm. H. George, president of the San Francisco Builders' Exchange expressing his regrets of his inability to attend the banquet and wishing the Santa Clara county builders every success. A program of entertainment was rendered during the evening and music was furnished by John MacDonald's orchestra.

The banquet was declared to be the finest and most successful social held in the history of the exchange.

Lumbermen to Enjoy Outing

(Special Correspondence)

The delayed pleasure trip of members of the San Joaquin Valley Lumbermen's club to the logging camp of the Sugar Pine Lumber company will be made June 19 and 20, according to announcement by Secretary Frank P. Minard, of Fresno. Originally planned for the latter part of May, the trip was postponed because of weather conditions in the mountains.

The pilgrimage will be made by automobile caravan scheduled to leave the Hotel Fresno at 1 o'clock Friday, June 19. Running time has been arranged to bring the party to The Pines at 5 o'clock. The party will have dinner

at The Pines, followed by entertainment and a dance, and will remain there over night.

Leaving early Saturday morning, June 20, the lumbermen will arrive early at Central camp and will have the pleasure of viewing the modern electrical methods of logging employed by the Sugar Pine Lumber company. The visitors will be guests of the lumber company at lunch and will return to town at will Saturday afternoon.

J. C. Fenger, Fresno, is president of the club and Elmore King of Bakersfield, is vice president. J. G. Martin, of Fresno, is treasurer.

Brick and Clay Meet at Portland

The joint summer meeting of the Pacific Northwest Brick Manufacturers' association, the Pacific Northwest Clayworkers' association, the Pacific Northwest branch of the American Ceramic society, will be held in Portland on June 19-20, the last two days of the Rose Festival. By holding the convention at this time it will give the visiting members an opportunity to attend the festival, as well as the convention, association officials point out.

The program has been outlined for the two day session, by the committee in charge, which consists of T. S. Mann of the Pacific Stoneware Co., R. D. Smith, of the Denny Renton Clay & Coal Co., and M. E. Reilly, of the Pacific Northwest Brick Manufacturers Association.

In addition, to the regular business sessions, the program includes trips through the various clay plants of Portland, and a drive up the Columbia River highway to Eagle Creek, where a salmon barbecue will be held.

Ralph P. Stoddard, secretary of the Common Brick Manufacturers Association of America, from Cleveland, Ohio will be present at the convention and will have some interesting things to outline to the convention regarding the clay from the national viewpoint, it is stated. Other addresses are calendared.

Prof. Hewitt Wilson, of the University of Washington, is president of the clayworkers and H. R. Kreitzer, of the Columbia Brick Works, Portland, is the president of the Brickmakers Association.

IN NEW QUARTERS

Pacific Electric Clock Company, formerly located at 86 Third Street, San Francisco, has moved to its new office and factory building, 950 Parker St., Berkeley. Phone Berkeley 747.

PARTNERSHIP FORMED

A. Morrill and L. T. Ganshirt, of San Jose, have formed a partnership and will operate under the trade name of Acme Sheet Metal Works with headquarters in San Jose.

OPENING BIDS IN PUBLIC

Again comes the question of opening bids in public. If this can ever be put across properly in Kansas City it will mean eliminating the greatest temptation that confronts the owner, the architect and the general contractor, which is to violate the ethics of the construction profession. It will mean the forcing of the owner and the architect to select a comparable list of firms when compiling their list of bidders. It will eliminate the old game of playing one contractor against another to force a lower figure. It is not a fair method of procedure to become a party to shopping after bids are opened.

Assuming that it cost each competitor from \$200 to \$500 to figure a set of plans and assuming that there are eight bidders, that means from \$1600 to \$4000 has been spent to get the job.

It is not fair that one firm should have the inside on another, providing all things are equal. Most assuredly after a contractor has spent both time and money to prepare a bid he is entitled to know where he stands.

If an owner or an architect wants a certain firm to get a job, then let that firm have it on a fee basis or any other basis that is mutually agreed on, but once the job is out for competitive figures, then a demand should be made that the opening be made public.

Every contractor who is a member of the Builders' Association understands that competitive bidding implies fair play. Therefore, the stand should be taken that a contractor will not figure a set of plans unless the bids are opened in public.—The Builder, Kansas City.

ENGINEER'S CLAIM REJECTED

A claim of \$5610 presented by Erle L. Cope, engineer, was rejected by Sutter County Board of Supervisors. Cope claims the money is due him on a contract with the county for supervising the construction of the Nicolaus causeway. A former Board of Supervisors hired Engineer Cope to prepare plans and specifications for the causeway but the plans were rejected by the present board and the causeway is being built under plans prepared by County Surveyor William Shearer. Cope sued the county for the amount due him for preparing the plans and was paid that amount and the board now maintains that as he did not supervise the construction work he is not entitled to the additional amount he now claims due.

HOME EXPOSITION

Plans for a "Home Exposition" for San Mateo, to exhibit to prospective home buyers the unusual advantages of Peninsula homes, are being discussed in San Mateo real estate circles. The chief objective of such an undertaking would be to show prospective home owners the value of ownership, the thrift and community interest awakened by having a home of one's own, and to assist and encourage home builders and land agents in San Mateo, Burlingame and Hillsborough.

GOING TO DENMARK

H. P. Vogensen, president of the Vogensen Construction Company of Teteluma, will leave June 15 for a visit to Denmark. This will be the first time Vogensen has visited his native land for thirty months. He will be gone about three months.

Newly Adopted Lumber Standards Makes Lumber Buying Safe and Easy

(Special Correspondence)

About 400,000 houses are built annually in the United States; 75 per cent of them are lumber built, and all contain important quantities of lumber; the total lumber bill being about \$1,500,000,000. The newly adopted American Lumber Standards mean some of this money, or its equivalent, saved for every owner of these new houses. All he has to do is to say "American Lumber Standards" to his dealer when ordering lumber to effect this saving and obtain insurance of normal sizes and specified quality.

In a recent address before the International Association of Purchasing Agents at Milwaukee, Wis., Arthur T. Upson, late of the U. S. Forest Products Laboratory at Madison and now lumber standards advisor of the National Lumber Manufacturers Association, explained and dwelt on the benefits of lumber standardization to purchasers and consumers of lumber.

Benefit of Standards

American Lumber Standards, he said, after three years of effort by manufacturers, distributors, consumers, the U. S. Forest Service and the Department of Commerce, have been quite fully worked out for softwood and have been adopted by practically all the great lumber manufacturing, distributing, and consuming organizations of the country. They cover uniformity of size and grades, and designations thereof for all species of softwood lumber. It is important to economical utilization of the country's timber resources and contributory to saving by the purchaser for the latter to be able to exercise a free choice between the various species of lumber that are suitable to a common purpose.

Standardization has been accompanied by reduction of the number of grades, sizes, and forms, and this results in economy all the way from the tree to the completed house.

Grade Reductions

Hitherto lumber grades (with their thirty or more sets of grading specifications) have been Greek to the average householder or other lumber user. They have now been reduced to one for the whole of the United States, and almost all the important species, and can be understood in a minute of attention.

Grades in Nutsell

Lumber is first divided according to use into (1) yard lumber, (2) shop lumber, (3) timbers. The first and third concern the builder, the second the woodworker.

Yard lumber comes in three general

degrees of manufacture designated as rough, surfaced, and worked. The first is simply sawed, the second is planed smooth on one or all 4 sides; worked lumber is the product of a matching machine, sticker or molder. It is used chiefly for interior and decorative work and may be (1) matched—for flooring, ceiling, etc.; (2) shiplap—siding and close fitting wall uses; (3) patterned—various forms of trim, finish, mouldings, etc.

As to quality of material, yard lumber is divided into: (1) Select lumber; (2) Common lumber.

Select lumber is of better quality than common lumber, and is in turn graded according to quality, A, B, C and D. A and B are of such a superior quality that they may be used with a natural finish. C and D are of excellent quality, but require a paint finish.

Common lumber is graded as No. 1, 2, 3, 4, 5. Nos. 1 and 2 common are susceptible to general building use without waste; and Nos. 3 and 4 and 5 involve some waste in the use of various pieces.

In addition, the consumer of yard lumber need only remember that timbers (6x6" or larger) are graded in order of relative strength as dense select, select, and common.

How To Apply Grades

As for applying these simple quality classifications the consumer should remember that for some uses rough or partly dressed lumber is suitable and that for most purposes not involving appearance a lower grade is just as durable and satisfactory as a higher one. For instance, No. 2 common boards are more generally used in floors and shattering than No. 1. In low grade structures, like simple sheds, No. 3 and even No. 4 may serve the purpose just as well as the much more costly No. 1. In joists and beams the lower grades of common can generally be used with entire satisfaction, especially if some attention is given to placing pieces so that defects are not at the points of greatest strain.

Uniformity of size and grade is now being supplemented by grade marking of each piece of lumber so that the purchaser can buy on faith in the knowledge that he is backed by expert and responsible grading and inspection. He can absolutely count on getting what he buys if he stipulates that sizes and grades shall be according to the American Lumber Standards adopted by the lumber associations and recommended by the U. S. Department of Commerce for the benefit and protection of the public.

LUMBER SHIPMENTS DECREASE

A decrease of 1.2 per cent in lumber shipments by water from the Pacific northwest for the first quarter of this year as compared with the same period of 1924 is shown by the report of the Pacific Lumber Inspection Bureau, just received. Shrinkage was largely due to the fact that Japan only took 50 and China 10 per cent of last year's movement. Other destinations, and particularly the Atlantic coast, took more, some 33,000,000 ft. more going to the Atlantic coast alone.

FLEXIBLE STEEL

Philadelphia newspaper reporters introduced the public to a new grade of flexible steel last week, when, reporting on an address by one of the bridge engineers they stated that "The towers which will hold the great span across the Delaware River will give 20 in. deflection of 20 ft. in the tower height of 350 ft. represents only about 6 per cent deflection! The reporter was modest. The actual deflection of the towers will be about 20 in.—Engineering News-Record.

BONDS

WOODLAND, Yolo Co., Cal.—Election
will be held June 27 in Cacheville
School District to vote bonds of \$7000
to finance 2-classroom addition to
present school.

CLOVIS, Fresno Co., Cal.—Election
will be called shortly to vote bonds to
finance erection of new city hall and
fire engine house.

FRESNO, Fresno Co., Cal.—New
Hope School District votes bonds of
\$20,000 to finance erection of new
school.

VISALIA, Tulare Co., Cal.—Election
will be held June 27 in Vincent School
district to vote bonds of \$4,000 to
finance school improvements. Trust-
ees of district are: Ben F. Chamber-
lain, O. I. Nelson and G. W. Cleek,
(tele-rk).

VISALIA, Tulare Co., Cal.—Election
will be held June 20 in Packwood
School District to vote bonds of \$12,-
000 to finance erection of new school.
Trustees of district are: T. E. Hal-
stead, Mary K. Mitchell, L. A. Hagler,
(tele-rk).

WATSONVILLE, Santa Cruz Co., Cal.—
Election will be held June 29 to vote
bonds of \$90,000 to finance erection
of new grammar school and additions to
standing schools.

GERBER, Tehama Co., Cal.—Election
will be held June 26 in Gerber Union
School District to vote bonds of \$4200
to finance additions to present school.

DOLLISTER, San Benito Co., Cal.—
Until July 6, bids will be received by
supervisors for purchase of \$10,000
bond issue of Southside School Dis-
trict; proceeds of sale to finance school
improvements.

STOCKTON, San Joaquin Co., Cal.—
Until June 22, bids will be received by
supervisors for purchase of \$40,000
bond issue of Valley Grammar School
District; proceeds of sale to finance
erection of new school.

GERBER, Tehama Co., Cal.—Bonds
of \$4,200 voted in Gerber Union School
District to finance additions to pres-
ent school.

CHURCHES

Sub-Contracts Awarded. Cost, \$25,000
ADDITIONS
SAN FRANCISCO, California St. and Grant Ave.

Additions and alterations to church and rectory.
Owner—Old St. Mary's Cathedral.
Architect—Becker Bros., 1915 Steiner St., San Francisco.

Plumbing and Heating—Scott Co., 243 Milna St., San Francisco.
Masonry—Mealey & Collins, 150 Jessie St., San Francisco.

Structural Lumber—Christensen Lumber Co., 5th and Hooper Sts., S. F.
Structural Steel—Central Iron Works, 2550 Bryant St., San Francisco.

Bids are being taken on roofing, plastering, composition floors, pews and other work.

Bids to be Taken Shortly.
CHURCH Cost, \$150,000
BURLINGAME, San Mateo Co.

Cor. State Highway and Occidental Ave.
One-story frame and stucco church and parish house.
Owner—St. Paul's Episcopal Church, Burlingame.
Architect—Howard & White, Lick Bldg., San Francisco.

SEATTLE, Wash.—Arch. Schack, Young & Myers, Central Bldg., and Frederick V. Lockman, Walker Bldg., associates, are taking bids from selected list of contractors to erect University Baptist Church at 12th Ave. northeast and East 47th St.; est. cost, \$150,000. Brick construction, cast stone trimmings; 20x120 feet.

RENO, Nevada—Working drawings are being made for proposed Trinity Episcopal Cathedral to be erected at Court and Rainbow Sts., Rev. E. Tanner Brown, announces. Of \$80,000 required to erect, \$52,325 is on hand. The first unit (the nave) will cost \$56,700.

CLAREMONT, L. A. Co., Cal.—Claremont Congregational church at Claremont First Church, Scientist; auditorium and balcony to seat about 600, classrooms, reading rooms, foyer, etc.; 56x86 ft., pressed brick facing, art stone trim, composition roof, gas unit heating system, common and hardwood floors, art glass, pine trim, mechanical ventilating system, indirect lighting system, ornamental plaster, organ grille, pipe organ.

HERMOSA BEACH, Los Angeles Co., Cal.—Arthur G. Lindley, 860 American Bank Bldg., Los Angeles, is taking bids until June 20 for 1-story and basement brick and concrete church at the corner of Washington and Sixteenth Sts. and Palm Dr., Hermosa Beach, for First Church of Christ, Scientist; auditorium and balcony to seat about 600, classrooms, reading rooms, foyer, etc.; 56x86 ft., pressed brick facing, art stone trim, composition roof, gas unit heating system, common and hardwood floors, art glass, pine trim, mechanical ventilating system, indirect lighting system, ornamental plaster, organ grille, pipe organ.

FACTORIES & WAREHOUSES

Plans Being Prepared. Cost, \$97,000
FABRIK
MANILA, Philippine Islands.
Two four-story steel frame factory buildings.
Owner—Withheld.
Architect—Golden Gate Iron Works, 1541 Howard St., San Francisco.

LAUNDRY Cost, \$24,285
EUREKA, Humboldt Co., Cal. Whipple and Summer Streets.
One-story and basement, Monitor type with 100 foot laundry, stucco exterior.
Owner—Humboldt White Star Laundry.
Architect—F. T. Georgeason, Eureka.
Contractor—Mercer-Fraser Co., Eureka.
Other bids were: Louis Halvorsen, \$25,477; F. J. Maurer & Son, \$24,765.

Bids Being Taken From a Selected List of Contractors. Cost, \$10,000
OFFICE BLDG.
SAN FRANCISCO, Fremont Street.
Two-story Class B factory and office building, 50x150 feet.
Owner—Philadelphia Storage Battery Co., 37 Spear St., San Francisco.
Architect—Ashley & Evers, 58 Sutter St., San Francisco.

Sub-Contracts Awarded. Cost 60,000
WAREHOUSE
SACRAMENTO, Cal., 12th and R Sts.
One-story and basement concrete warehouse, 160x160.
Owner—Wm. C. Keating, Forum Bldg., Sacramento.

Plans by Owner.

ft., here for Imperial Ice & Develop-
ment Co., R. P. Moore, supt. Stucco
ext., tile rf.

POWER PLANTS

SACRAMENTO, Cal.—Decision to
submit the entire proposed Silver
creek water and power development,
with the exception of the proposal to
acquire the distributing systems situ-
ated in the district, to the voters of
the Sacramento Municipal Utility dis-
trict, together with a bond issue for
approximately \$5,000,000 for initial de-
velopment, has been determined. Al-
bert J. Givan is general manager and
chief engineer for the district. Includ-
ed in the project expected to be voted
on will be: (1) Approval of a bond
issue for initial construction; (2) con-
struction of the proposed Union Valley
dam site with a continual flow of ap-
proximately 150 second feet of water;
(3) development of as much electrical
energy as possible, with the amount
of water included in the Union Valley
dam project; (4) construction of lines
to bring the electrical energy to the
boundary of the district; (5) construc-
tion of pipe lines to bring the water,
which it is hoped to sell to the city,
down from the mountain source; (6)
construction of a distribution system
for the water, in the section of the dis-
trict now covered by the city water
main.

Clarence F. Pratt, president of the Pratt Building Material Company, better known as Sandy Pratt, "Mayor" of beautiful Westwood Park, one of San Francisco's pretty bungalow sub-divisions, has just returned from Los Angeles and the Imperial Council of Shriners of North America. Sandy was accompanied by Mrs. Pratt.

Los Angeles, Sandy was elected International Secretary of the International Association of Shriners' Noon-day Luncheon Clubs, organized on June 3rd last at Los Angeles. Sandy originated the idea of such an association, and the next meeting will be held in Philadelphia in June, 1926, when the Shriners meet again and open the Centennial Exposition. During the World's War, Sandy organized the "Shriners' Red Cross Sack of Flour," sold and resold twenty-three times in fourteen states for a total sum of \$134,512.84. The flour traveled 50,000 miles.

Sandy also originated "Builders' Day," when all the architects, engineers, contractors and building men meet for their annual frolics at Santa Cruz and other watering places in California.

Sandy is a Rotarian and looks after his sand, crushed rock and gravel producing plants at Marysville, Prattrock (near Folsom), Sacramento and Prattco (Monterey County). Otherwise he is not very busy.—(San Francisco News Item.)

WHARVES & DOCKS

MANHATTAN BEACH, Cal.—U. T. Thompson has applied to city trustees for franchise to build addition to municipal pier of approx. 1000 ft.

SANTA CRUZ, Santa Cruz Co., Cal.—Lester & Carl, 1201 N. Divisadero, Santa Cruz, at approx. \$33,500 drive contract to const. concrete and steel wharf in connection with Sea Cliff Park project at Aptos. J. E. Leonard, consulting engineer, 331 Bush St., San Francisco.

MISCELLANEOUS BUILDING CONSTRUCTION

MADERA, Madera Co., Cal.—Until July 7, 2 P. M. bids will be rec. by L. W. Cooper, county clerk, to fur. o.b. Madera:
8,000-ft. 12x12x20-ft. Redwood or Sequoia lumber;
12,000 gt. 12x12x14 ft. Redwood or Sequoia lumber;
20,000 ft. 4x16x20-ft. Oregon Pine or Yellow Pine lumber;
Further information obtainable from clerk.

MANTECA, San Joaquin Co., Cal.—Until June 29, 2 p. m., bids will be rec. by M. P. Kearny, secy. Oakdale Irrigation District or S. L. Steele, secy. South San Joaquin Irrigation District, meeting jointly at Manteca, to const. Melones dam on Stanislaus river in Tuolumne and Calaveras counties together with appurtenant works. Bids wanted under:

Proposal No. 1—Involve approx. 16,000 cu. yds. excavation, mostly in rock; 4500 cu. yds. tunnel excavation; 90,000 cu. yds. concrete; erection of 570 tons metal gates, valves, structural steel and other metal work and furnishing approx. 50,000 bbls. cement.

Proposal No. 2—Same as in Proposal No. 1 except that no cement is required. See call for bids under official proposal section in this issue.

BERKELEY, Alameda Co., Cal.—Until June 16, 9 a. m. bids will be received by E. M. Hann, city clerk, to fur. cement, delivered in carload lots f. o. b. Municipal Corporation Yard, Allston Way and West st., during fiscal year commencing July 1, 1925. Further information obtainable from clerk.

SACRAMENTO, Cal.—Funds to construct swimming pool in Del Paso park, west of Auburn Blvd., will be provided in the 1926 budget for the city of Sacramento. The amount to be expended has not yet been determined.

SAN FRANCISCO, Cal.—Butte Electric and Manufacturing Co., 956 Folsom st., at \$1,143 submitted low bid to Ed. Pub. Wks. to fur. and install electrically operated traffic gates and warning signals on bridge at 3rd and Islais Creek. Butte Elect. Equip. Co., only other bidder at \$5,225.

ATASCADERO, San Luis Obispo Co., Cal.—Fiscal agents of R. S. Palmer, motion picture promoter of Los Angeles, announce construction will be started shortly on a \$450,000 motion picture studio here. The plant will be erected in 3 units and will be financed by Los Angeles and Atascadero financial interests.

SACRAMENTO, Cal.—Until June 24, 10 A. M. bids will be rec. by Harry W. Hall, county clerk, to fur. lumber and lists of materials desired obtainable from County Engineer Chas. Deterding, Jr. Cert. check 10% payable to Chairman of Bd. of Suprs. rec. with bid.

SACRAMENTO, Cal.—Until June 24, 10 A. M. bids will be rec. by Harry W. Hall, county clerk, to fur. electrical equipment for Paintersville bridge. Cert. check 10% payable to Chairman of Board of Suprs. rec. Plans obtainable from County Engineer Chas. Deterding, Jr.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 313 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-1565—New York City. Manufacturers of hospital supplies want Pacific Coast representatives.

D-1567—Westfield, Mass. Manufacturers of abrasive grinding wheels of all kinds wish to establish agencies in Oregon, Washington and California.

D-1569—Muncie, Indiana. Manufacturers of pressed steel products made to customers' specifications, want contact with live manufacturers representative capable of selling their line on a commission basis.

D-1572—Washington, D. C. Manufacturers of brass and copper products such as sheets, rods, tubes, pipe wire, etc., want representation West Coast.

9228—Popayan, Cauca, Colombia. Commission merchant, just establishing business, desires to make arrangements for purchasing cement and hardware. References will be supplied.

9231—Brisbane, Australia. Company

desires to buy imitation Spanish tile for roofing purposes, made of galvanized iron with painted, glazed or plain finish. Replies should be complete and samples of various tiles would be appreciated.

9236—Lantoka, Fiji Islands. Party is in the market for a quantity of tools and would appreciate receiving catalogs from wholesale hardware dealers or exporters.

9237—Birmingham, England. Exporters of building material supplies wish to appoint a suitable representative here to handle the sale of their metal enameled tiling, suitable for kitchen and bath room walls. This tiling comes in sheets 18 inches by 24 inches, 3 inches by 6 inches, or 6 inches by 6 inches, in any color desired, together with a regular assortment of borders and may be pasted or glued to wood, plaster, concrete or metal.

9243—Tampico, Mexico. Party is in the market for used cars and door or one-man street cars and four trailers. Desires used cars in good condition.

Official Proposals

STATE OF CALIFORNIA

NOTICE TO CONTRACTORS

CALIFORNIA HIGHWAY COMMISSION

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on July 6, 1925, at which time they will be publicly opened and read, for construction, in accordance with specifications therefor, and which special reference is made, of portions of State Highway, as follows:

San Diego County, between one and one-half miles north of Oceanside and two miles south of San Onofre (V, SD-2-C & D), about thirteen and one-tenth (13.1) miles in length; ten and eight-tenths (10.8) miles to be paved with Portland cement concrete and two and three-tenths (2.3) miles to be shouled with Portland cement concrete shoulders.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and El Centro. Representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made in a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to binding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,

LOUIS EVEREDING,

N. T. EDWARDS,

California Highway Commission.

R. MORTON,

State Highway Engineer.

W. F. MIXON, Secretary.

Dated June 8, 1925.

NOTICE TO BIDDERS

(Dunsmuir Grammar School District)

The Board of Trustees of the Dunsmuir Grammar School District will receive sealed proposals on or before 7 P. M., Monday, June 22nd, 1925, at the office of the Clerk of the Board, Travelers Hotel, Dunsmuir, California, at which time and place bids will be opened and read in public for furnishing the labor and material for erecting and completing additions and alterations to the present school structures and for moving one present school structure in accordance with plans and specifications prepared by John W. Woollett, Architect, Sacramento, Calif. Bids will be received separately for the following classes of work:

1. All architectural and structural work.
2. Electrical wiring.
3. Plumbing.
4. Heating.

All bids must be accompanied by a certified check for 10 per cent or more

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

of the amount of the proposal. In case this proposal is accepted, in whole or in part, and the bidder fails to execute a contract for the performance of said work, and a bond of sufficient sureties in the sum of 50 per cent of the amount of the contract to secure the faithful performance thereof, within fifteen days after such acceptance, then this certified check shall be retained by the Board of Trustees of Dunsmuir Grammar School District as liquidated damages for the failure to carry out this proposal. Such contract and bond shall be in such form and of such contents as shall be satisfactory to the Board of Trustees of said School District.

All bids to be made out on forms furnished by the Architects.

Plans and specifications may be obtained from John W. Woollett, Architect, 606 Plaza Building, Sacramento, Calif., or Mrs. Jennie Ward, Clerk, Travelers Hotel, Dunsmuir, Calif.

A deposit of fifteen dollars will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition.

The Board of Trustees reserve the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Trustees of the Dunsmuir Grammar School District, Dunsmuir, California.

By MRS. JENNIE WARD, Clerk.

NOTICE TO BIDDERS

(Well-Veterans' Hospital)

Sealed proposals will be received by the U. S. Veterans' Bureau, Room 791, Arlington Building, Washington, D. C., until 11.00 A. M., June 30, 1925, and there publicly opened for the completion of a Deep Well at U. S. Veterans' Hospital No. 24, Palo Alto, Calif.

Proposals will be considered only from bidders experienced in this line of work. Plans and specifications may be obtained from the Construction Division, Room 791 Arlington Building, Washington, D. C., or from the Medical officer in Charge at the above mentioned hospital and shall be returned with-

in ten days after date of opening proposals.

A certified check (or proposal bond on attached form) drawn to the order of the TREASURER OF THE UNITED STATES, for 2 per cent of proposal, including all work bid upon in addition to main items, shall accompany each proposal to entitle it to consideration. The check of the successful bidder will be returned after the acceptance of his performance bond. All other checks will be returned as soon as it is determined that proposals represented by them will receive no further consideration.

The successful bidder will be required to execute a formal contract and to furnish a satisfactory performance bond of approximately 50 per cent of the contract price by sureties acceptable to the Director.

Time of performance and the records of bidders for expeditious and satisfactory performance of contract will be considered in making awards. Bidders have the right to be present, either in person or by attorney (Sec. 3710, R. S.) and to examine and inspect all bids (33 Stat. L. 440).

L. H. TRIPP,
Chief, Construction Division

NOTICE TO CONTRACTORS

(Melones Dam-South San Joaquin and Oakdale Irrigation Districts)

NOTICE IS HEREBY GIVEN that sealed proposals will be received at the office of the South San Joaquin Irrigation District at Manteca, California, until 2 o'clock P. M., on Monday, the 29th day of June, 1925, for the construction of the Melones Dam on the Stanislaus River in Tuolumne and Calaveras Counties, California, together with its appurtenant works.

The alternative bids may be submitted as follows:

Proposal No. 1

Requiring about 16,000 cubic yards of excavation, mostly in rock, about 1,500 cubic yards of tunnel excavation, about 50,000 cubic yards of concrete, the erection of about 570 tons of metal gages, valves, structural steel and other metal work, and the furnishing of about 80,000 barrels of cement.

Proposal No. 2

The same in other respects as Proposal No. 1 excepting that no cement is required.

Full plans and specifications can be seen at the office of the South San Joaquin Irrigation District at Manteca, California, and at the office of the Oakdale Irrigation District at Oakdale, California, and copies thereof will be furnished upon application to the Secretary of the Board of Directors of either district accompanied by a deposit of \$25.00 for each copy, to be repaid to all bidders and to all others upon the return of the plans and specifications in good and acceptable condition not later than the 15th day of July, 1925.

Said Joint Board of Directors will meet at the said office of the South San Joaquin Irrigation District at 2 o'clock P. M. of said 29th day of June, 1925, and open all proposals received in response to this notice.

The Contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

Bidders may submit bids upon either or all of the schedules but no schedule will be subdivided.

Each proposal must be accompanied by a certified check for 5 per cent of the amount of the highest of the alternative proposals submitted, payable to the order of the South San Joaquin Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract, and furnish a bond in the sum of not less than 25 per

cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, and a bond of the amount of not less than 50 per cent of the amount of his bid as provided in Chapter 303 of the Statutes of 1919 of the State of California, said bonds to be approved by said Boards.

The proposal forms bound with the specifications must be properly filled out by the bidder, and the plans and specifications, including the proposal, must be submitted in contact with the bid in a sealed envelope marked "Proposal for Construction of the Melones Dam" and addressed to the Joint Boards of Directors of the Oakdale and of the South San Joaquin Irrigation Districts, Manteca, California.

Done in pursuance of an order of the Joint Boards of Directors of the Oakdale and of the South San Joaquin Irrigation Districts this 3rd day of June, 1925.

M. P. KEARNEY,
Secretary of the Board of Directors of the Oakdale Irrigation District.

S. L. STEELE,
Secretary of the Board of Directors of the South San Joaquin Irrigation District.

NOTICE TO CONTRACTORS

(Railway and Wagon Road—South San Joaquin and Oakdale Irrigation Districts)

NOTICE IS HEREBY GIVEN that sealed proposals will be received at the office of the South San Joaquin Irrigation District in Manteca, California, until 2 o'clock P. M. on Monday, the 29th day of June, 1925, for the construction of the Melones Irrigation and Wagon Road adjacent to the Melones dam in Tuolumne County, California, requiring:

About 96,000 cubic yards of grading, About 500 lineal feet of corrugated iron culverts.

About 8.5 miles of track laying, About 850 tons track metal.

About 22,500 cross ties.

About 580 M. Ft. E. M. in trestle timbers.

Full plans and specifications can be seen at the office of the South San Joaquin Irrigation District at Manteca, California, and at the office of the Oakdale Irrigation District, at Oakdale, California, and copies thereof will be furnished upon application to the Secretary of the Board of Directors of either district accompanied by a deposit of \$25.00 for each copy, to be repaid to all bidders and to all others upon the return of the plans and specifications in good and acceptable condition not later than the 15th day of July, 1925.

Said Joint Board of Directors will meet at the said office of the South San Joaquin Irrigation District at 2 o'clock P. M. of said 29th day of June, 1925, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Boards reserve the right to reject any and all bids.

Bidders may submit bids upon either of the above terms but no schedule will be subdivided.

Each proposal must be accompanied by a certified check for 5 per cent of the amount of the proposal payable to the order of the South San Joaquin Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract, and furnish a bond of the sum of not less than 25 per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, and a bond of the amount of not less than 50 per cent of the amount of his bid as provided in Chapter 303 of the Statutes of 1919 of the State of California, said bonds to be approved by said Boards.

The proposal forms bound with the specifications must be properly filled out by the bidder, and the plans and specifications, including the proposal, must be submitted in contact with the bid in a sealed envelope marked "Proposal for Construction of the Melones Railway and Wagon Road" and addressed to the Joint Boards of Directors of the Oakdale and of the South San Joaquin Irrigation Districts, Manteca, Calif.

Done in pursuance of an order of the

Joint Boards of Directors of the Oakdale and of the South San Joaquin Irrigation Districts this 3rd day of June, 1925.

M. P. KEARNEY,
Secretary of the Board of Directors of the Oakdale Irrigation District.

S. L. STEELE,
Secretary of the Board of Directors of the South San Joaquin Irrigation District.

NOTICE TO CONTRACTORS

Swartout National Forest Highway

Sealed proposals for constructing the above-named National Forest highway, located within the Angeles and San Bernardino National Forests, Los Angeles and San Bernardino Counties, State of California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 409 E. Chicago St., Los Angeles, California, until 10 o'clock, A. M., on the 24th day of June, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The project to be constructed consists of the Swartout road between Los Angeles County Park and a junction with the State highway near Cajon, California, and is 14.67 miles in length. The principal items of work are approximately as follows:

Clearing, 45 acres.
Excavation, unclassified, 64,380 cu. yds.

Class A Concrete, 185 cu. yds.
Reinforcing Steel, 18,000 lbs.

Corrugated Metal Pipe, 3632 lin. ft.
Crushed Rock Surfacing, 3360 cu. yds.

Construction of the above items will be completed within one hundred fifty (150) calendar working days after said notice of award of contract has been given to the contractor by the District Engineer. The work shall be completed within one hundred fifty (150) calendar working days after said notice of award of contract is given.

The contract form, maps, plans and specifications, may be examined by responsible contractors at the following addresses:

400 Bay Building, 9 Main Street, San Francisco, California.

400 California Building, General Contractors, Los Angeles, California.

County Surveyor, San Bernardino, California.

The Bureau has available for loan to contractors on a rental basis, all equipment at Government Island, Oakland, California, as listed in the specifications. Bidder will state in his bid the Government equipment that he will use during construction and the minimum time required. The estimated rentals will be taken into consideration and award will be made on the bid to the best advantage of the Government. Government explosives are also available according to the terms of the specifications. Corrugated metal pipe will be furnished by the Government.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and experience and upon deposit of a check for \$10.00 payable to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming a part of the specifications above referred to.

June 4, 1925.
C. H. SWEETSER,
District Engineer.

PROPOSAL FOR BIDS

Greenhouses—University of California

Sealed bids will be received at the office of The Comptroller, University of California, Berkeley, California, at or before 9 A. M., Thursday, June 18th, 1925, for all work in connection with the erection of Green House on the grounds of the University of California at Berkeley.

Drawings and specifications may be obtained at the office of John Galen Howard and Associates, Architects, First National Bank Building, San

Francisco, on deposit of \$10 for each set of drawings and specifications taken out. (Checks given as deposits are to be in favor of the undersigned). Deposits will be refunded on submission of a regular bid for the work and on return of said drawings and specifications in good condition. No bid will be considered unless accompanied by a certified check or bond in favor of the undersigned equal to 10% of the bid to secure execution of the contract by the successful bidder. The right is reserved to reject any or all bids.
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on June 22, 1925, at which time they will be publicly opened and read for construction in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Santa Cruz County, near Boulder Creek (V-S-Cr-4-A) the following: A reinforced concrete box culvert at Station 37+45 at Fall Creek, consisting of a 5-foot by 3-foot opening 94 feet long with wing walls.

A reinforced concrete girder bridge 21 feet wide, at Station 126+60 across High Bridge Creek, consisting of three 27-foot spans on concrete bents.

A reinforced concrete box culvert at Station 131+75 at Cleveland Dam Creek, consisting of a 3-foot by 5-foot opening 15 feet long with a retaining wall and wing walls.

Imperial County between El Centro and Hiltville (Vill-imp-27-C) about eight and six-tenths (8.6) miles in length, to be graded and surfaced with crushed gravel or stone or with decomposed granite.

Plans may be seen, and forms of proposal, bids, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the district in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Inyokern.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work here contemplated, and Contractors are urged to investigate and the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

Bids will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the fact that the Commission will accept no blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any and all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS OVERLING,
N. T. EDWARDS, Secretaries,
California Highway Commission.

R. M. MORTON,
State Highway Engineer,
W. F. MINN, Secretary.
Dated: May 25, 1925.

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3 3 4 0

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent contractors* to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

Interior of Grauman Metropolitan Theatre, Los Angeles. Done entirely in Concrete. William Lee Woollett, Architect.

TRULY CREATIVE

AMONG advanced achievements in concrete is the interior of Grauman Metropolitan Theatre, Los Angeles.

From lobby to proscenium the conception has been executed in the same basic material used to insure structural soundness and economy.

Especially worthy of note are the rough, form-marked walls with murals painted on them, the great open trusses and massive beams, the decorated columns and the symbolic statuary—all of concrete.

The result is a daring creation indicating possibilities through the medium of concrete undreamed of a few short years ago. And it may well be that this truly creative work will serve as an inspiration for other individual achievements destined, perhaps, to herald a new era in architecture.

* * *

Competently supervised, modern workmen can produce concrete in any form, texture or color the architect may direct. If you are interested, we shall be most happy to send further information. Simply address the nearest office listed below.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

The Gasoline Highway Tax— is it Equitable and Desirable

In several states strong opposition to a tax on gasoline has developed. Motor car associations have usually been the chief opponents of a "gas tax." This is unfortunate indeed, for the rapid increase in expenditures for better roads has been mainly due to the influence of motor car owners upon legislators. Now, when a good start has just been made toward hard surfacing of all main highways, it is almost a calamity that fights have been started against so desirable a means of raising road funds as the tax on gasoline.

If the users of roads should bear the main burden of the cost of building and maintaining them, we challenge anyone to suggest a better means of measuring that use than is secured by metering the quantity of gasoline consumed by each motor car. A California automobile association recently put out a statement to the following effect: The state highways were built for the benefit of the entire public, and the entire public should pay for them. It is unfair to attempt to make any one class of taxpayers shoulder the whole burden of highway expense.

With this statement one is apt to disagree. Everyone, it is true, benefits indirectly, if not directly, from roads, but is not the same true of railroads? Would the automobile associations advocate taxing the public in general for the support of railways? The users of railways pay a toll for such use, and they, in turn, collect at least part of that toll from the people to whom they sell goods that have been carried by the railways. This is an economic plan, one that a century of experience endorses. Why, then, should this plan not find favor when applied to road transportation?

A fixed annual license fee plus a gasoline tax seems to us to be the nearest approach to an ideal assessment for the use of roads that has yet been devised. It does just what payment for a railway passenger ticket or railway freight bill does, namely charges the user in proportion to his use of the highway. Then, if that user is performing a service for other people, as when a farmer carries produce to market in his car or truck, he must add to the price of his product enough to cover the cost of haulage, including therein his highway tax.

If the road is used by a person riding for pleasure only, then the entire

burden of the gas tax naturally falls upon the pleasure seeker—and rightly so.

We suspect that much, if not most, of the real opposition to a gasoline tax has been caused by what is regarded as an unfair distribution of road building funds. The residents of cities in many states buy most of the gasoline sold in those states. But most of the money taken from them is expended on roads so far distant from these cities that they derive little direct benefit from such roads. Furthermore, much of the gasoline they buy is used in propelling their cars over city streets, for whose maintenance no expenditure is made from the gas tax funds. Where this is the case, undoubtedly there is an inequitable distribution of the money raised by the tax levied on gasoline. But the obvious remedy is to secure an equitable allocation of the gas tax funds, and not to oppose the gas tax.

There will never be any kind of tax that will not arouse opposition. For centuries the farmers of America were so strong in their opposition to road taxes that we secured no adequate mileage of good roads. It was not till about 30 years ago that State Aid toward Road Laws began to convert the farmers into supporters of large highway appropriations and bond issues. Those laws spread the tax burden over the cities as well as over the farms, and the farmers then began to support the advocates of extensive highway improvement, grudgingly and most meagerly at first, it is true. Then came the automobile. The expense and discomfort of unsurfaced roads became increasingly evident. Better tax laws and better vehicles combined to change the attitude of the farmers toward "going into debt" for better roads. More equitable road taxation was certainly a large factor in this conversion of the farmers. Even more equitable than the property tax for road improvement is the gasoline tax. Hence if a more equitable property tax was instrumental in giving to the country a better highway system, is it not evident that a still more equitable tax, the gas tax, will accomplish a vast deal in pulling America out of the dust and mud?

In 1924, 36 states had a gasoline tax. Of the total gross receipts in 1924 from this tax only about 60 per cent was applied to road work. This is an obvious defect in the law.—Engineering and Contracting.

OPENS OFFICE

E. Guy Warren, former sales manager of the Shasta Division for the Pacific Gas & Electric Company, has resigned and will open an office in Redding for the practice of civil and hydraulic engineering. Max Stewart of Red Bluff will succeed Warren in the P. G. & E. post.

SUFFERS FIRE LOSS

The Colma Lumber Mill at Colma, Calif., on June 4 suffered a \$25,000 fire loss. The box factory and planing mill of the plant were completely destroyed, according to reports.

INCORPORATED

The Capitol Construction Company has been incorporated in Sacramento with a capital stock of \$500,000. Harry Berry of Sacramento is named as one of the four directors.

NEW CONCERN ENTERS THE SAN JOSE FIELD

The Central Glass and Paint Company has started operations in San Jose. The company is capitalized at \$25,000 and will have the exclusive agency for the products of the Pittsburgh Plate Glass Company carrying a full stock of plate and window glass. The concern will also manufacture art glass. John Carlson, connected with the glass industry for the past 18 years, heads the company. For twelve years he was connected with the Pittsburgh Plate Glass Company and at six years ago came west and opened a glass and paint jobbing plant in Pocatello, Idaho. Last year he sold this business to enter the San Jose field. The Central Glass and Paint Company was recently awarded the contract for the glass work in the addition to the Mercantile Trust building at San Jose.

The California Clay Corporation of Stockton, which recently purchased a larger tract of clay land near Lincoln, Placer county, now has a crew surveying and grading for a spur track that will connect the property with the Southern Pacific line at Clayton Switch, about a mile northwest of Lincoln. It is reported that this corporation contemplates extensive development work when the track is completed.

PROFESSIONAL ENGINEER IN PUBLIC AFFAIRS

In his annual address at the annual meeting of the American Association of Engineers at Orlando, Fla., President Morris Rien reviewed the activities of the association during the last year. He emphasized the duty of the professional engineer toward the public in participating actively in civic affairs in which a knowledge of engineering principles and practice are needed, and the members were urged to do their part in this direction. One instance cited was the problem of the farmer, which is now prominently before the public. The address pointed out how the interests of the engineer, both as a professional man and as a citizen, are closely tied up with the prosperity of the farmer and showed how the association, which is made up of engineers from every one of the numerous special branches of the profession, is best able to study the problem and present a rational solution for public consideration. This investigation is being undertaken by the federal advisory committee of the association of which Dr. F. H. Newell of Washington is chairman.

The energies of the members of the association can be utilized in working out local problems in every one of the many cities where chapters have been organized. This line of study will also benefit the individual, as it broadens his horizon and enlarges his contacts with the several members of the association, and the people of his community.

A great deal of time and energy has been devoted to working out plans to secure for the members opportunity to take up professional study in engineering and business lines that are often important for rounding out their knowledge, developing their experience and enlarging their usefulness.

TRADE ASSOCIATION DECISION

Under date of June 4, at Washington, D. C., Dr. Wilson Compton, secretary and manager of the National Lumber Manufacturers Association, issued the following statement:

"The decisions Monday by the United States Supreme Court in the two trade association cases are the most fundamental and far-reaching under the anti-trust laws since 1911. Their importance lies not in the mere reversal of two lower courts but in the fact that for the first time the Supreme Court has taken cognizance of economic facts and their bearing upon business progress and public welfare, in determining reasonableness. The 'Rule of Reason' has been extended. The Court has not permitted the shadow to hide the substance. These decisions are the greatest victory in fifteen years for intelligent, fair, and equal competition which is the greatest safeguard we have against monopoly."

BURKELEY BUILDING IN MAY

During the month of May, 1925, the city of Berkeley issued 232 permits for new buildings valued at \$533,465 and 59 permits for alterations, additions and repair, valued at \$70,000, making the total operations for the month 291 permits, the improvements approximating a total valuation of \$603,745.

TO BOND FOR SCHOOLS

The Fresno City Board of Education contemplates a bond issue for \$1,500,000 to finance erection of new schools and additions and alterations to standing buildings. It is proposed to hold the election within the next two months.

Builders Can Save \$30,000,000 Annually Says Steel Engineer

Thirty million dollars is the price American builders are paying for lack of uniform specifications in steel construction. This is the startling declaration of Lee H. Miller, chief engineer of the American Institute of Steel Construction and one of the world's leading authorities on steel.

The statement is backed up by facts and figures in a series of addresses Miller is making engineers, constructors and architects. Miller is urging the adoption of the Institute's steel Specification and Code in the building code of each large city in the nation. About 30 cities already have authorized the adoption.

Lack of accepted standards in steel construction, points out Miller, causes each mill to make composite specifications of its own and causes each engineer, for instance, to evolve his own column formulae. In brief, he emphasized the fact individualism is practiced where standardization is demanded by all laws of efficiency and economy.

If each major city in the United States were to adopt the same specifications for steel construction, the problem of waste in construction would be eliminated to a great extent, he said. Such adoption would permit great economies in steel construction.

An unquestioned authority and an interesting speaker, Miller said in part:

"Under existing conditions a premium is placed on individualism. The responsible manufacturer, engineer or architect is constantly compelled to lower his standard to meet irresponsible competition, making the public and responsible firms the victims. Co-operative research and the establishment of safe uniform practices can alone check these conditions and prevent the demoralization of our national industries on which we must depend in the event of emergencies.

"If we were to distinguish between the Iron Age and the Steel Age, we would readily appreciate the necessity of operation on a uniform basis. There is nothing to indicate when the Iron Age started, but we know that the puddling process used at its inception is still in existence. It was nearly 1500 A. D. before the first masonry furnace enabled the development of a temperature that would melt cast iron, and this furnace resembled the principle of our modern blast furnace.

Variations in Treatment of Design

"It was not until after 1855 that the Bessemer and Open Hearth furnaces made it possible to melt steel. It was about 1885 that this was developed on a commercial basis. This development made it possible to roll structural shapes from a cast steel ingot. The Carnegie Steel Company announced in the Preface of the 1893 Handbook, that they were eliminating all data relative to wrought iron.

"Mill competition was not limited to steel production, but was carried into the preparation of handbooks, which was not only expensive to publish, but led to variations in the treatment of important details of design. They have all adhered to the basic unit stress of 16,000 pounds adopted as empirical, and this one thing has frozen fast to the industry and has come to be considered with a reverence to which it is

not entitled. For 35 years the various handbooks have duplicated tables showing the same loads on beams which are loaded uniformly and continuously restrained against lateral buckling.

"None of them have the same treatment of such important questions as columns, rivets, web strength of beams and girders, standard connections for beams, or the strength of compression flanges which are free to buckle.

"This variable information is scattered in the different books in such a way that it is necessary to refer to six or more places to obtain data from which to make calculations vital to proper designing. The result has been that responsible parties never know whether their work is on a fair and even basis of competition; precedent exists to justify almost any practice.

Infinite Uses for Unit Stress

"Since the development of steel, there has come into existence between the rolling mills and the public, an industry that handles the fabrication of steel. It is in this industry that the talent is developed qualified to direct the uses of steel. The industry constitutes the bridge which is the only outlet the mills have to the ultimate buyer. Their contracts spread into every corner of the country, and without such contracts the tonnage of structural steel would never have reached its present proportion; and if further extension is to be made it will be through these outlets. It is natural that an industry so young should be free from coordinated efforts. Individualism was sure to assert itself, and local influence sure to develop.

"The result has been an almost infinite number of ways to use a basic unit stress of 16,000 pounds to beat a competitive design or price. Irresponsible practice was sure to raise its head, and the responsible engineer or architect constantly was forced to lower his standards to meet irresponsible practices, with the result that the public and the responsible firms became the victims.

Financial Distress or Uniformity?

"So long as no uniform practice and standards exist, the industry which should be prosperous must continue on the edge of financial distress.

"It is the purpose of the American Institute of Steel Construction properly to codify all the conditions relating to the industry and put them on a safe rational basis.

"As one illustration of what a wide range of practice exists, there is shown a diagram of about 30-column formulae from various sources. This number could be increased to several hundred, as it seems to be considered that personal liberty entitles every engineer to his private column formulae. The designer or manufacturer can never tell whether his work is in competition with his competitor's cost, his assumptions, or his omissions.

"Every building code in the country is different, and it requires an extensive library to know on what conditions work must be done. Innumerable specifications have come into existence which make it necessary for every bidder to keep some of his most experienced and valuable men constantly engaged in the study of these specifications to detect unusual and expensive requirements."

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

BUILDERS TO PICNIC

The members of the Santa Clara County Builders' Exchange will hold their annual picnic at "Ye Olde Trout Farm" on Stevens creek on June 28.

The committee in charge will furnish everything necessary in the way of eats and an abundance of prizes have been contributed for the contestants in various games. A feature of the program for the day will be a special lunch for the "kiddies."

The committee are: Eats and music—Bud Gallichotte and Joe Alva; William Herman and William Loos will have charge of automobile parking. Tom Price and R. L. Robinson will attend to the games and prizes; Fred Schiegner and Bill Moore, assisted by a number of ladies, will serve as a reception committee.

EXCHANGE LUNCHEON CLUB ELECTS DIRECTORS

The San Francisco Builders' Exchange Luncheon Club has elected the following to serve as a Board of Directors: N. A. Dickey (Calif. Brick); R. G. Guyett (Insurance); Peter Bradley (Plasterer); D. B. Farquharson (General Contractor); Roy Geary (Hardwood Floors); Al. Wilson (Plumber); L. J. Neal (Painter); Nels Larsen (Brick Mason); A. Maillard (Concrete Contractor); W. Feary (Bldg. Material); Chas. Halloway (Metal Lath).

Officers of the club are: President, D. B. Farquharson; Vice President, N. A. Dickey; Secretary, R. G. Guyett; Treasurer, Peter Bradley.

EIGHT BOSTON TRADES SIGN THREE YEAR AGREEMENT

Eight of the Boston building trades have signed agreements at 1924 rates which will not expire until April 1, 1928. Practically no change has been made in the working rules. If an increase is sought at the end of the first year, the matter will be arbitrated by a committee of three members, consisting of one from the Building Trades Employers Association, one from the United States Building Trades Council and a disinterested person. If an increase is sought for at the end of the second year, the same process of arbitration will be used.

Following are the rates under the new agreements: Bricklayers and tile layers \$1.25 per hour; carpenters, sheet metal workers, roofers, hoisting engineers and asbestos workers \$1.1 per hour; marble and tile layers' helpers \$3.0 per hour.

U. S. ELECTRIC CHIEFS HERE

M. H. Aylesworth, managing director of the National Electric Association, accompanied by his assistant Robert L. Ellingham, A. Jackson Marshall, secretary of the association and George F. Oxley, director of publicity, have arrived in San Francisco to arrange plans for the forty-eighth annual convention of the association which opens in San Francisco June 19 for a 5-day session.

Program Arranged For East Bay Builders' Exchange Show

Friday evening, June 26, 1925, promises to become a famous date in the history of entertainments connected with the Builders' Exchange of Alameda County, if one is to believe the things that have been told by the committee in charge of the affair.

The personnel of the committee should be enough of a recommendation that the entertainment will be of the very highest class. The following members working in conjunction with the House Committee are working hard to make this a real success:

General Chairman

H. E. Bettinger, Tyre Bros. Glass Co.

Entertainment Committee

L. B. Kirby, Cowell Lime & Cement Co.; Jas. B. McKeon, McKeon Roofing Co.; Henry Capion, W. P. Fuller & Co.

Promotion Committee

Kenneth Graham, Atlas Heating Co.; A. B. Greenberg, Judson Mfg. Co.; Vic Treadwell, Calif. Pottery Co.; Jesse Stevens, Rice Sign Co.

Refreshments Committee

Paul F. Cunningham, General Fireproofing; Rex Thompson, Pacific Portland Cement Co.; Frank B. Moller, Cement Contractor.

Electrical Effects

Laurence Chilcote, Sect'y. Electrical Cont.

The show will open with the chorus

singing a very snappy number which will be followed by solos by E. Dowdle, Vic Treadwell, R. V. Woods, Wm. Makin, Geo. Lester, Frank Oates, Geo. Schuster, Jack Norwood, L. Develbiss, Sam Stroud and J. B. McKeon. The chorus will assist the soloist singing the popular numbers and every one is assured that they are good.

The second part will contain some very clever acts by the Anton Brothers, musical entertainers; R. O. Brown, monologist; R. A. Brown, soloist; Jack Norwood, song and dance artist; Sam Murlale, operatic soloist; Fred Bishop, whistler; E. A. Mulford, specialties; J. S. Orr, dancer, and a rousing finale by Greenberg's Irish Hawaiians.

The orchestra under the leadership of Willis C. Lowe, Architect, the chorus under the leadership of Henry Capion, the end men under the direction of Jas. B. McKeon, and the second part with L. B. Kirby in charge, are now at the stage where they are almost perfect. Under the direction of these very able instructors the members of the Builders' Exchange of Alameda County are not going to be disappointed in looking forward to a wonderful show on the evening of June 26th and a real night of entertainment.

Industry in Healthy Condition

The National Association of Manufacturers has just completed a survey of conditions in the leading industries of the country which indicates that business is on a more stable basis than it has been any time since the war. More than 10,000 answers to questions submitted by the Association go to make up the review, which summarizes conditions as follows: "Seven particular indices stand out in this particular barometer of business:

1. Stability has supplanted hysteria and indecision.
2. Production is at a healthy flow.
3. Wages are high, with no indication of wide reductions.
4. Employment is on the increase for the summer.
5. Competition is keen.
6. Consumers' prices are lower.
7. Price variations are less severe than a year ago."

The report on building material and supplies is of unusual interest. It says: "Excellent business is reported by 7 per cent of the firms; good business by 50 per cent. None report poor business 43 per cent and only fair business by

ness. For the summer the prospects are 73 per cent good; 13 per cent reporting excellent; 60 per cent reporting good and 27 per cent reporting prospects as fair; none report poor prospects.

Compared with business a year ago, 43 per cent reported increased sales, some as high as 50 per cent; 34 per cent reported the same volume; 23 per cent reported decreased business and stock on hand are normal in 70 per cent and overstocked in 30 per cent. There has been a large increase in employment in 4 per cent of the factories; small increases in 62 per cent, while 34 per cent report small decreases. Labor conditions are reported unsettled in 10 per cent of the concerns. Employment prospects for the summer are bright, 13 per cent planning for extended forces; 53 per cent keeping the same and 4 per cent planning reductions. Production increases are planned for 70 per cent of the plants for the summer; 23 per cent will remain the same and 7 per cent look for decreases. Increased wages are reported in 23 per cent of the firms; no change in 67 per cent; reductions in 10 per cent."

CEMENT PRODUCTION HIGH

The production and shipments of Portland cement during April were the highest for that month in any year, according to Geological Survey Bureau

of the Department of the Interior. Production of cement for the first four months of this year exceeded that of last year by nearly 2½ million barrels, while shipments over the same period exceeded those of 1924 by nearly 3 million barrels.

PREPARATIONS UNDER WAY FOR 1925 INDUSTRIES EXPOSITION

Active work has already begun on the fifth California Industries Exposition; four months will be necessary to complete arrangements for the exposition, which will be enlarged in every department and many new features added to the 1924 exhibits. Manufacturers from all parts of California and distributors doing business in the state have already evinced a keen interest in the big exposition, which last year had an attendance of 392,000. Many former exhibitors have reserved space for an enlarged display this year.

The show itself will be liberally advertised throughout the state and in northern and western states in order to increase the attendance of buyers during the two weeks of the exposition, October 17 to November 1.

The exposition is given under the direction of the Central Bureau and Program Committee of San Francisco organizations, consisting of more than forty San Francisco civic and commercial clubs, including the Advertising Club, Rotary Club, Chamber of Commerce, Down Town Association and California Development Board.

The exposition will again be ably managed by A. A. Trempp for the fifth consecutive season, and Angelo J. Rossi is president; the selection of these two live wires meets the approval of the manufacturers who annually exhibit, and under their direction the exposition has grown to be one of the largest annual commercial shows in the world. As an exploitation medium, the exposition offers unusual opportunities for manufacturers. Exhibitors at past shows pronounce it to be a real business stimulator, which produces traceable results. Offices have been opened in the Auditorium, where all inquiries for space should be made.

CLASSIFICATION OF BUILDINGS ERECTED IN 1924

Classifications of expenditures for construction of various types of buildings in 1924, as compiled by the Copper and Brass Research Association, follows:

Type of Bldg.	Amount Expended of 1924	Pct. Whole
Apartments	\$1,090,000,000	20.1
Business	662,000,000	12.4
Dwellings	956,000,000	17.9
Farm	53,400,000	1.0
Hospitals	197,500,000	3.7
Hotels	577,500,000	10.8
Industrial	523,500,000	9.8
Public	144,000,000	2.7
Recreational	342,000,000	6.4
Religious	229,500,000	4.3
Schools	566,000,000	10.6
	\$5,341,400,000	100.0

HARBOR BONDS PROPOSED

Orange county board of supervisors, by a 3-to-2 vote, has called a harbor bond election for October 7 next. The ballot will carry two propositions, one for \$650,000 to repair the entrance and the other for \$550,000 to dredge and improve the inner harbor.

NEW BRANCHES OPENED

To afford better service, the Standard Sanitary Manufacturing Company has established branch offices at Riverside and Long Beach in addition to the one already started in Santa Barbara. Frank Gabbart is manager of the Santa Barbara office, S. A. De Lude is in charge at Riverside, and D. B. Reeder manages the Long Beach branch.

May Building in Western States Totals \$47,193,311 Survey Shows

A total of \$47,193,311 in building permits issued during May in 80 principal cities of the seven Far Western States shows an increase of \$7,141,087 over the record for May of last year. This supports the opinion held by many students of the subject, that the total volume of building for 1925 will be equal and probably exceed any previous annual record, according to the Pacific Coast section of the National Monthly Building Survey of S. W. Straus & Co.

NATIONAL BUILDING RECORD IS ESTABLISHED DURING MAY

All existing records for volume of construction work under way in the United States during a single month were shattered in May, according to statistics compiled by the Associated General Contractors of America. The May volume was 26 per cent greater than that of April, reflecting the great volume of contracts awarded during the two preceding months. The amount of construction activity in the first five months of this year is being taken as an indication that 1925 will set a new twelve month record.

The cost of construction in the principal centers of the United States remained stationary during May, being double that of 1913. The fact that costs have not increased as a result of the heavy volume of contracts awarded in March is being viewed as a marked assurance of the stability of the construction industry.

Building permits issued during April showed an increase of 20 per cent over March.

Humanizing Industry—Touching On The Human Side of Things

(Reprint from Chicago Daily News)

Conservation of human resources has become an important factor in modern industry. According to report of the Universal Portland Cement Company, all its mills, located in various parts of the country, operated last month without having a single employee lose any time on account of accident.

Yet cement manufacture, in common with other industries, is a hazardous occupation unless constant care is exercised by both company and employees. There is intense heat in the rotary kilns, where the temperature rises almost to 3000 degrees, more than hot enough to melt steel, almost hot enough, in fact, to melt stone. There is the complicated electrical equipment which carries danger to the careless worker. Powerful crushers and rollers crunch big chunks of rock and grind them to a powder fine enough to go through a sieve that will hold water.

Despite these hazards and despite the fact that thousands of employees include many nationalities and languages, making group instruction difficult, the use of modern safeguards to promote the health and life of workers, and the close cooperation between company and employees in promoting safety, resulted in the 100 per cent record last month.

When Mike Pilkowski, for example, wants a job in a cement mill does he march right in and get it? He does not. He is handed a thirty-page booklet containing instruction in his own language in safety and told to master it before he comes back. No prospective matriculant for a college course ever "crams" more diligently for his entrance exam than does Mike in poring over the booklet. Upon his return

to the mill he is given a "quiz" by the foreman or by the committee on safety. If he passes the test he is turned over to the foreman or to an experienced employee who shows him about, points out dangerous spots, indicates safeguards and keeps in constant touch with him until the initial hairy feeling wears off and he becomes familiar with his job.

Foremen, by the way, are largely responsible for the welfare of their men. If an employee is injured through neglect of the boss in cautioning him the foreman is laid off.

Twice each week safety classes of employees are conducted with instruction through interpreters on ways to prevent accidents. At one plant a night school, conducted by the board of education, where workers are taught English, materially helps the movement. Movies are effectively used to put the idea across. Magazines and other literature are also available.

Competition in exercising care is likewise encouraged among the workers. Various rewards stimulate to caution.

A much-coveted banner flies at each mill. The department having the best safety record for the month has the satisfaction of seeing its name prominently displayed on this banner. If another department excels it the following month the honor is transferred to the new winner.

This co-operation of employees, coupled with maintenance of approved mechanical safeguards, has cut industrial accidents at Universal mills in half, according to the report. In seventeen years the number of serious accidents decreased over 55 per cent and the number of minor accidents over 70 per cent.

ARCHITECTS' EXAMINATION

The U. S. Civil Service Commission, Washington, D. C., announces an examination will be held shortly for the position of "principal architectural and structural steel draftsman." The date for filing applications closes July 11.

The examination is to fill vacancies in the Lighthouse Service, Department of Commerce, throughout the United States, at an entrance salary of \$2100 a year. Advancement in pay may be made without change in assignment up to \$2700 a year. Promotion to higher grades may be made in accordance with the civil service rules. Full information may be obtained from the U. S. Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the Post Office or Customhouse in any city.

WHAT WAGES WILL BUY

An economic principle, which is often disregarded, is that a decline in the cost of living is just as potent in affecting the purchasing power of the worker's wages as a corresponding increase in the amount of money earned. In January, 1925, average weekly earnings of all wage earners in the United States were \$27.09. In February they had increased to \$27.12. In the meantime, the cost of living index number declined from 167.1 to 165.3. The result was that the index number of "real" weekly earnings based on conditions in July, 1914, as 100 advanced from 129 to 131.

NEW ADDRESS ANNOUNCED

Shields, Fisher and Lake, architects and engineers, announce that permanent offices have been opened at 1501 Pacific Southwest Building, Fresno and the Edwards and Wilder Building, Sixth Street and Grand Avenue, Los Angeles. The concern has considerable construction under way in the Northern as well as the Southern section of the state.

SAFETY CONVENTION HERE

The 1926 convention of the Pacific Coast Safety Council will be held in San Francisco, it was decided at the convention recently closed in Los Angeles. More than four hundred general managers, superintendents and foremen representing various industries attended the conference.

EAST BAY UTILITY DISTRICT SEEKS BIDS

Bids will be considered by the East Bay Municipal Utility District, Bay Building, Oakland, for (1) construction of a dam approximately 350 feet high containing 325,000 cubic yards of concrete to impound waters of the Mokelumne river at a point near Lancha Plana and (2) for an aqueduct of tunnels and pipe lines approximately 90 miles in length and (3) for construction of a pumping plant and other auxiliaries. The work is divided into ten schedules which may be bid on separately.

ORGANIZE TO FINANCE FOUR MILLION DOLLAR PROJECT

Articles of incorporation of the Feather River Power Company, an organization proposing the construction of a \$4,000,000 power and irrigation project on Buck's creek in Plumas county, have been filed with Secretary of State Frank C. Jordan.

The company proposes the building of a dam which would impound 110,000 acre feet of water to serve farmers in the Honeycut-Yuba irrigation district. Its directors are: Arthur L. Erb, San Francisco; L. R. Jorgensen, Berkeley, and Karl Brehme, Belvedere.

ARIZONA COURT RULING ON BID BOND

Notes On The Production of Short Length Yard Lumber

By Arthur T. Upson, recently of the U. S. Forest Products Laboratory and now Lumber Standards Advisor of the National Lumber Manufacturers Association

In a recent survey, conducted by the National Lumber Manufacturers Association, the production of short length yard lumber during 1924 was found to be slightly more than 3 billion board feet. This is based on the assumption that 85 per cent of the total cut of softwood lumber of 20,000,000,000 feet, or 25,500,000,000 feet of yard lumber and that 12 per cent of this amount consists of lumber of lengths 9 feet and shorter.

The information from which these data are compiled is based on authentic reports received from softwood lumber manufacturers, who, during that period, produced 3,340,000,000 feet of yard lumber.

The amount of short length lumber, unavoidably produced in ordinary saw and planing mill operations, varies considerably between the various species. In California white and sugar pine, it is slightly less than 8 per cent of the total production, while in Northern hemlock it is practically 20 per cent. This variation is due not only to the inherent characteristics of woods and the uses of which they are put, but also to the policy of individual lumber manufacturers on the shortest length they consider economical to save.

The average shortest length reported saved by any lumber manufacturer was 2 feet in Southern cypress and Southern pine. A large number of manufacturers of Southern pine in the southeastern Gulf States, and of North Carolina pine, do not save lengths shorter than 10 feet, and this represents the average maximum short length reported saved. The longest, shortest, and mean length of short lumber saved for all species averaged 7, 3 and 5 feet, respectively.

As just indicated, many manufacturers save much shorter lengths than others, and this policy is followed primarily because of the use of better methods of merchandising and their ability to market such material. In case all manufacturers of all species uniformly saved and sold the shortest lengths reported saved by any one manufacturer, there would be an increase in short length production of about one-third or during 1924 of slightly more than one billion feet. Thus by the universal practice of better merchandising methods on the part of lumber manufacturers and dealers, and through a more widespread knowledge on the part of ultimate consumers on the high intrinsic value of short length lumber, the present waste of short length material could easily be eliminated. The amount of short lumber so saved would be sufficient to build approximately 100,000 eight-room homes, annually, it would reduce the drain on the present forests by the amount of the annual softwood lumber cut once in each thirty years.

An analysis of the short lengths produced in milling and working yard lumber shows that a little less than 60 per cent are 8 and 9 feet long, and the balance less than 8 feet long. In some species a majority of short lengths occur in such yard items as Finish, Flooring, and Bevel Siding, while in other species the majority of short

length material is Common Boards and Dimension. On the average, the greater amounts of shorts occur in Flooring, Ceiling, Partition, Common Boards, and Dimension. And it is significant that in ordinary house construction, these particular items can be used in short lengths to a greater extent than the others. It is not uncommon, in fact almost universal to cut the short pieces, used around windows and doors, as backing for lath, braces for floors, roofs, etc., from 16 and 18 feet lengths with considerable waste. Material for these purposes could be obtained from short lengths with little, if any, greater waste.

It is the frequent practice of all lumber manufacturers to include in random shipments, and in shipments calling for specific lengths, a certain quantity of short length material. The amount included varies both with the species and with the items and grades; the higher percentage usually being placed in shipments of lower grades and in shipments of those items, such as Flooring, Bevel Siding, Ceiling and Partition, which are used in short lengths in proportionately larger quantities.

Contrary to the belief of many, lumber manufacturers sell such shipments at a lower price than shipments made up of strictly long lengths. Thus not only an inducement is held out to the dealer to buy shipments containing short lengths, but also he is able to buy high quality lumber at a lower price than long lengths. This lower cost for short lengths is not always passed on to the ultimate consumer. Were this true the ease of merchandising short lengths would be greatly increased.

The high quality and utility value of short length material is not generally appreciated by the small consumer. It is almost axiomatic that short lengths are of high quality, often free of defects their entire length. Neither is it generally appreciated by the home owner that high quality short lengths are admirably suited to home carpentry, are easier to handle, require less cutting up, and should be secured at a lower price.

The sawing of nearly 3 billion feet of short lengths during 1924, which would be increased by over 1 billion feet if all manufacturers adopted the same policy, could be further greatly increased if better merchandising methods were practiced and the small lumber users educated to their value. At present there is a great deal of medium quality lumber produced in lengths 10 feet and longer, which if there was a greater demand for short lengths, would be cut to shorter lengths thereby producing a much higher grade of lumber.

Without doubt a sound and economical policy of production, distribution and consumption of short length lumber would reduce by one-tenth or more, the amount of standing timber which must be annually removed from the forests in order to supply the present lumber demand. This would amount to enough material to build over 300,000 eight-room homes each year.

STEAM, HOT WATER HEATING AND VENTILATION IS SUBJECT OF NEW BOOK

"Practical Steam, Hot Water Heating and Ventilation" is the subject of a 550-page book by Alfred G. King, an authority on all subjects relating to steam and hot water heating and ventilation. The book is the latest, most complete and up-to-date work on this subject and is written for all engaged in the practice of steam, vapor, hot water heating and ventilation, and will prove valuable for those seeking knowledge in the trades as heating contractors, journeymen steam fitters, steam fitter apprentices, architects and builders. The price is \$4. The book is published by the Norman W. Henley Publishing Company, 2 West 46th St., New York.

RENO PLUMBERS SEEK RAISE

The first clash between organized labor and the Board of Exposition Governors of the Nevada Highways Exposition developed when representatives of the plumbers' union demanded an increase of 50 cents per day for all work performed. The present scale is \$10 per day.

Chairman W. S. Lunsford of the exposition labor committee says the demand of the plumbers does not conform with the agreement made between the committee and organized labor, as accredited representatives of the various unions recently signed an agreement not to raise wages.

The demand was referred to an arbitration committee of four.

NEW PLANING MILL

Nelson Brothers, planing mill operators at Hayward, plan early erection of a new mill in Castro street near the Hayward city limits. New equipment will be installed.

RICHARD PAUL Stark is the name.

OF THE greatest boy baby.

IN THE world.

AND DICK Stark arrived.

AT SAN Francisco.

VIA THE stork route.

ON THURSDAY, June 11th, 1925.

DICK'S DAD owns half.

OF THE Daily Pacific Builder.

DICK'S MOTHER was head.

OF THE editorial staff.

OF THIS wide-awake paper.

DICK IS doing fine.

AT THE St. Francis Hospital.

AND IN a few days.

DICK WILL be.

AT THE office.

OF THE Daily Pacific Builder.

WRITING EDITORIALS.

AND SUPERVISING Joe Odgers.

OF THE Advertising Department.

AND JACK Farrell.

OF THE "observer" Department.

DICK IN an exclusive interview.

WITH CLARENCE Sand Pratt, President.

OF THE Pratt Building Material Co.

PRODUCER OF clean sand.

CRUSHED ROCK and gravel.

SAYS HE will attend.

THE NEXT "Builders' Day."

AT SANTA CRUZ.

AND WIN a few prizes.

SUCH AS handsomest boy baby.

WEST OF the Rocky Mountains.

MOST INTELLIGENT child born.

"NORTH OF South of Market Street."

DICK'S FATHER, Joseph Stark, Esq.

TOLD SANDY Pratt.

IN A confidential way.

THAT DR. E. Wise.

AND MISS U. R. A. Goodnurse.

BOTH OF the St. Francis Hospital.

SAID DICK (sometimes Richard Paul).

WAS THE finest baby.

THAT THE stork (not Stark).

EVER LEFT in San Francisco.

JOSEPH, FATHER and publisher.

TOLD SANDY all the above.

IN CONFIDENCE.

SO, DEAR reader.

IF YOU tell it.

ONLY TELL a few.

"I THANK you."

Joe Stark wants his new son (see above birth notice) to be an editor, but Sandy Pratt, President of the Pratt Building Material Co., predicts he will at least start as a "Babe Ruth." The first window he breaks will cost a year's subscription to the Daily Pacific Builder.

Contract Awarded.
RESIDENCE Cost, \$14,000

company wants contact with local firms
that stamp metal numbers up to three
inches in height.

NEW HIGHWAY FINANCE BILL IS
PROPOSED

Plans for a proposed \$15,000,000 ini-
tiative revenue measure to provide
funds for new California highway con-
struction are announced by Assembly-
man Robert E. McPherson of Vallejo.
McPherson's plan would provide the
sum of \$3,000,000 per year for a period
of five years. The measure would pro-
vide for the transfer of all monies in
excess of \$3,000,000 received from the
state, to plate tax and in additions a
readjustment of the plate tax to the
extent of a possible increase of 30
per cent on automobiles only, based
on a weight basis, according to the
assemblyman.

The bill which, would be put on the
state ballot in November, 1926, would
provide funds for construction of new
highways in both Northern and
Southern California, including \$250,000
for the Vallejo-Sears Point highway
and \$5,000,000 for the Bay Shore high-
way at San Francisco.

SUFFERS FIRE LOSS

Foundry plant of the Nevada Engi-
neering and Supply Company, Fourth
and Alameda streets, Reno, Nevada,
suffered a \$50,000 fire loss on June 10.

Official Proposals

NOTICE TO CONTRACTORS

(East Bay Municipal Utility District)

Sealed proposals will be received by the East Bay Municipal Utility District, at its office in the Ray Building, 1924 Broadway, Oakland, California, until 8 P. M., Monday, July 20, 1925, for all or part of the following construction work—(1) a dam about 350 feet high, containing about 325,000 cubic yards of concrete, to impound the waters of the Mokelumne River at a point near Lancha Plana; (2) an aqueduct of tunnels and pipe lines about 90 miles in length; (3) a pumping plant; and (4) other auxiliaries. The work will be awarded in lot or item schedules, which may be bid on separately.

Plans and specifications for this work may be obtained from the office of the District, by depositing the sum of \$100 for an entire set, or \$10 for one schedule, as a guarantee of the return of same on the date upon which bids are opened. Bids will be received on alternative plans for the work, and on separate schedules of said project, upon conditions set forth in the specifications. Each bid must be accompanied by a certified check of not less than 2% of the amount of the bid, or a surety bond or negotiable bonds in the same amount. The right is reserved to reject any and all bids.

JOHN H. KIMBALL,

Secretary.

Oakland, California, June 10, 1925.

NOTICE TO BIDDERS

(Merced Irrigation District, Merced County, California.)

Crescoted Bridge Timbers

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors of Merced Irrigation District in the Barcroft Building, Merced, California, until Tuesday, June 30, 1925, at 10 o'clock A. M., for the furnishing of about 405,000 feet of Crescoted bridge timbers for Merced Irrigation District.

Specifications and plans for said material can be seen at the office of said Board and also at the office of Jerome Newman, Clunie Bldg., San Francisco, California.

Said Board will be in session at its office at 10 o'clock A. M. on Tuesday, June 30, 1925, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

A proposal must be accompanied by a certified check for five (5) per cent of the amount of the schedules bid upon, payable to the order of the Merced Irrigation District as a guarantee that the bidder, will, if successful, execute a satisfactory contract and furnish a bond in the sum not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, said bond to be approved by said Board.

The proposal forms bound with the specifications must be properly filled out by the bidder, and the proposal must be submitted intact with the bid in a sealed envelope addressed to the Board of Directors of the Merced Irrigation District, and marked to indicate that it is a proposal for Crescoted Bridge Timbers.

Done in pursuance of an order of the Board of Directors of the Merced Irrigation District, this 9th day of June, 1925.

H. P. SARGENT,
Secretary of the Board of Directors of the Merced Irrigation District.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every world-wide contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.
All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

NOTICE TO CONTRACTORS

(Cupertino Union School District)

NOTICE IS HEREBY GIVEN that sealed proposals will be received by the Board of School Trustees of the Cupertino Union School District for the construction and completion of two new classrooms on the second floor of the two-story central portion of their school building situated at Cupertino.

Said proposals to be in sealed envelope and addressed to the Board of Trustees of the Cupertino Union School District, each bid being accompanied by a certified check of not less than 5% of the amount of the bid presented, and delivered at the office of Charles S. McKenzie, Architect, Room 511, Bank of San Jose Building, San Jose, Cal., up to and not later than 11 o'clock A. M. on Tuesday, June 30, 1925. Plans and specifications may be obtained at the office of said Architect.

WARREN E. HYDE, Clerk.
Board of School Trustees, Cupertino, Union School District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

(Maintenance Shop—Fresno)

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until two o'clock P. M., July 13, 1925, at which time they will be publicly opened and read, for the construction, in accordance with plans and specifications therefor, of a Maintenance Shop Building and Truck Shed in the City and County of Fresno, California.

The Maintenance Shop Building will be a one-story steel and wood frame building with the walls and concrete floor and foundation. Part of the space will be finished off for office, stock room, etc. The Truck Shed will have concrete floor and foundation, wood frame covered with corrugated iron. Plumbing and Electrical Work is included.

Cash, a bidder's bond, made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works,"

QUANTITY SURVEYOR

NOTICE TO PAINTERS

(Jefferson School District—Painting)

The trustees of Jefferson School District, Daly City and Colma, hereby give notice that bids will be received for painting of Jefferson School, Colma, Vista Grande School, and Crocker Tract School, Daly City, according to specifications to be obtained from W. J. Sweeney, at Bill's Garage, 6806 Mission Street, Daly City. A certified check for 10 per cent of the amount must accompany each bid.

Bids will be received up to 8 o'clock P. M. on June 24, 1925, when they will be opened at Vista Grande School. The Trustees reserve the right to reject any or all bids.

W. J. SWEENEY,
GEORGE R. AUGUSTIN,
LOUIS NAVA,

Trustees Jefferson School District.

NOTICE TO CONTRACTORS

(Oroville School District)

Notice is hereby given that the undersigned as the Board of Education of the City of Oroville and Trustees of Oroville School District, Butte County, California, will receive, up to the hour of four o'clock P. M. of Tuesday, June 30, 1925, sealed bids for furnishing labor and material for the construction of two school buildings, one on the Oro Vista Site and one on the East Side School Site, all to be on the property of the Oroville School District, Oroville, Butte County, California, and to be in accordance with the plans and specifications for same prepared by Cole & Brouchoud, Architects, Room 393-394 First National Bank Building, Chico, California.

Plans may be seen at the office of the Clerk of the Board at 327 Myers Street, Oroville, or at the Architects' Office, Chico, California.

Each bid shall be accompanied by check certified to by a responsible bank, or by a Bidder's Bond, in the amount of ten per cent of the maximum bid submitted, as provided for in said plans and specifications.

The Board reserves the right to reject any and all bids.

Bids are to be sent to or filed with Mildred F. Martin, Clerk of the Board, 327 Myers Street, Oroville, California.

C. G. THUNEN,
W. F. REECE,

H. E. CAUTHARD,
A. E. DARBY,
G. G. CROWE,

Board of Education of the City of Oroville and Trustees of Oroville School District.

Engineering News Section

BRIDGES

mond Ave., Berkeley. \$4500

A Variety of Work on the Same Machine

In addition to business correspondence the modern
office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
ci cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

Typewriters Rented

Hoists that Qualify

Three Clyde Hoists, a one drum steam and two double drum steam, handled all the material used in the construction of the new Arlington Hotel, at Hot Springs, Arkansas. They have lived up to the usual Clyde standard, by handling the work to the entire satisfaction of their owners.

CLYDE

Mr. C. H. Burden, of Ault & Burden, general contractors, writes: "We are glad to furnish photo of the Arlington Hotel with our best wishes and take this occasion to express our complete satisfaction with the three Clyde Hoists used on this operation.

"This equipment has not given us at any time the least trouble and has met every demand made upon it. We wish to assure you of our high regard for the equipment secured from your good company and the genuine quality involved."

YOU'LL TAKE PRIDE IN YOUR CLYDE!

SANITARY DISTRICT PROPOSED

Initial steps seeking organization of a sanitary district to serve some 200 square miles of territory in Santa Clara County have been taken, according to I. D. Mable of Los Gatos, prime mover in the proposed project. It is proposed to have San Jose, College Park, Burbank, Campbell, Saratoga, Santa Clara and perhaps Cupertino and Sunnyvale included in the district. It is proposed to provide metropolitan facilities for the disposal of sewage from the cities named.

FILES ARTICLES

Bender Refrigerating Corp., with principal place of business in Reno, Nevada, has filed articles of incorporation in that city. The company is capitalized at \$100,000 and has the following directors: Jesse Robinson, John J. Clude and E. Ritchie, all of Oakland. A branch office will be maintained in Oakland, the company to engage in the manufacture and sale of refrigerating plants and iceless machines.

ANNUAL CONVENTION AND ROAD SHOW SET FOR CHICAGO

The Annual Convention and Road Show of the American Road Builders' Association will be held January 11th to 15th, 1926, in Chicago. The Road Show which has been steadily increasing in size for the last few years, will once more be held in the Coliseum and adjoining buildings. The place in which the sessions of the Convention will be held will be announced later.

Before deciding to go back to Chicago, the Executive Committee of the American Road Builders' Association canvassed the country thoroughly, as it was felt that a gathering so important to the nationwide highway industry should always be held in the same section of the country. It was found, however, that at the present time Chicago is the only city which can meet the specifications of the American Road Builders' Association in regard to hotel accommodations and exhibition space for heavy machinery. At the Show held last January, more than three hundred carloads of machinery were displayed and the registration list showed more than 16,000 persons interested in the various phases of highway construction and maintenance were in attendance.

W. H. Connell, engineering executive and deputy secretary of the Pennsylvania Department of Highways, the new president of the Association, has announced that the Convention will be carried on in two divisions, one covering the engineering side of road building, and the other the construction (Continued on Page 3)

side. These two divisions of the Convention will be in session simultaneously in adjacent rooms. By handling the program in this manner, those interested in engineering can devote their entire time to engineering subjects, while those whose main interest is in construction may keep their attention fixed on that phase of the work.

An effort will be made this year to increase the attendance from foreign countries by issuing official invitations requesting other nations to send delegates and special arrangements will be made for their entertainment. Invitations also will be extended to the Pan American Highway Commission and to the delegates who attend the Pan American Road Congress in Buenos Aires this fall.

In addition to the Convention and Road Show, the usual entertainment program will be provided.

TIMBERO FOILED BY CONCRETE PILE IS REPORT

The teredo, that industrious sea worm that worries the harbor engineer by denuding wharf piles, can be routed, according to a paper read by Frank B. White, chief engineer of the California State Board of Harbor Commissioners, at the convention of the Pacific Coast Association of Port Authorities held in San Francisco recently. Engineer White declares that the encasing of piles in concrete reinforced with wire fabric has been found a dependable protection in waters infested by the marine borer.

TIMBER DEAL IS CLOSED BY PICKERING INTERESTS

Deeds placed on record at Alturas, ratify the purchase of 5770 acres of timberland in the western part of the Modoc National Forest, for which negotiations have been pending for several months.

This deal represents the purchase by the Pickering Land and Timber Company of Kansas City of the entire holdings of the Roe-Burgess Land Company of Oshkosh, Wis. The consideration involved in the deal was \$210,000.

It is estimated that these lands contain a stand of at least 100,000,000 feet of merchantable yellow pine besides a small quantity of white fir and incense cedar.

This purchase makes the Pickering Company the second largest timber holding company in Modoc County, the holdings of this concern being surpassed in size only by the Red River Lumber Company.

The Pickering Land and Timber Company owns approximately 80,000 acres of virgin timber, all located within the boundaries of the Modoc Forest.

CENSUS OF LIGHTING EQUIPMENT IN 1924

The Department of Commerce announces that, according to returns received at the annual census of manufacturers of lighting equipment, the total value of such equipment made during 1924 was \$205,566,358, an increase of 13.3 per cent as compared with \$180,926,000 in 1923. Reports were received from 720 establishments for 1924, as compared with 732 for the preceding year.

In this report the several classes of lighting fixtures proper are arranged in five main groups, namely, "Residence," "Commercial," "Industrial," "Street," and "Marine," followed by five auxiliary groups, "Shades for lighting fixtures," "Globes, bowls, chimneys and other illuminating glassware, except shades," "Reflectors, metal, glass, or porcelain," "Miscellaneous lighting equipment," and "All other lighting fixtures and accessories." The highest rate of increase shown for any of these groups is that for street-lighting fixtures, 64.6 per cent. For residence lighting and industrial lighting, increases of 29.3 per cent and 4.2 per cent, respectively, are shown. But for marine-lighting fixtures and commercial-lighting fixtures decreases of 61.3 per cent and 10.7 per cent, respectively, are recorded. An increase of 13.1 per cent appears for miscellaneous lighting equipment.

\$100,000 LUMBER FIRE

Fire of undetermined origin swept through 7,000,000 feet of lumber at the Eastern and Western Lumber Company's yards, at Portland, Ore., June 18, causing a loss estimated by company officials of \$100,000. For an hour the fire threatened the main mill of the company, but the flames were finally controlled before spreading to the mill.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

L. John Bergman, formerly assistant treasurer, credit manager and purchasing agent for Pass & Seymour Inc., of Solvay, New York, has given up these connections and will represent Pass & Seymour Inc. in the sales capacity throughout Southern California. Bergman came to California in 1919 on a visit to his cousin, J. A. Korell, of San Francisco, and became so impressed with this State that he endeavored to find an opening to make his home here. Bergman has been for 24 years with Pass & Seymour Inc., manufacturers of P. & S. Standard Electrical Wiring Devices. This line is based in San Francisco by the Geo. A. Gray Co.

To permit development of a plan of expansion which has become necessary due to increased business in all markets reached by the concern, the California Pottery Company of San Francisco, has leased a site in Fresno on the Southern Pacific Railroad and plans to erect a \$300,000 warehouse and office building. The site is 215 by 225 feet. The Fresno offices of the company are now located at Monterey and H streets. Plants are located at Oakland and Merced.

George K. Hooper, assistant city manager of Pasadena, resigned 24 hours after the resignation of City Manager C. W. Koerner. Hooper gave no reason for his retirement, but it is understood he and Koerner were not in sympathy with the policies of the newly elected board of city directors.

The Rhodes-Jamieson Company of Oakland has opened an exhibit on the floor of the Alameda County Builders' Exchange in Oakland. The exhibit features all materials handled by the firm ranging from the modest home to the business structure.

The H. W. Johns-Manville Company of California with headquarters in Francisco, is reported to be negotiating for a site in Pittsburg, Contra Costa County, on which it is proposed to erect a million dollar plant employing about 500 men.

Southern Pacific Company has been authorized by the Interstate Commerce Commission to extend its lines into the Sutter basin region of the Sacramento Valley at a cost of approximately \$300,000. The extension is to go seven miles beyond Hindsdale.

California Materials, Inc., capitalized at \$150,000, has been incorporated in Sacramento. Directors of the company are E. G. Maple, V. J. Persons, H. Miller, Chas. L. Gilmore and Thomas Ashby. The company will handle building materials.

President Coolidge has approved acceptance by the U. S. Veterans' Bureau of a twenty-five acre site on Marquam Hill, in Portland, Ore., for a new \$1,600,000 federal hospital with a capacity of 300 beds.

The W. J. Bettingen Lumber Co. has sold its Arcadia yard to the Kerckhoff-Cuzner Mill & Lumber Co. which will continue to operate it with the present manager in charge.

Webster Brinkley Company announces the opening of a branch distributing warehouse at 368 First St., Oakland, to serve the Central California district and Orient trade. This company is the Pacific Coast branch of the Webster Manufacturing Company of Chicago and maintains offices in Los Angeles, Portland and Seattle. The Pacific Coast factory is located in the latter city. The company handles transmission, conveying, elevating and screening machinery. The Webster Brinkley Company is also distributor for the Gutta Percha Rubber Manufac-

Safe Cabinet Co., of Marietta, Ohio, has opened a branch office at Fresno in charge of L. W. Andrews, formerly located at Santa Rosa. Prior to June 1st Fresno and vicinity have been a part of the territory of the Stockton agency of the company, with C. C. Williams in charge of the business. Under the new arrangements, Williams was transferred to Santa Rosa as agency manager, and Andrews, who for three years has been in charge at Santa Rosa, was transferred to Fresno. The territory served by the Fresno branch will comprise Fresno, Madera, Kings, Tulare and Kern Counties.

A certified copy of articles of Incorporation of the Monterey Bay Redwood Company has been filed at San Jose. The principal place of business is San Francisco. The company is capitalized at \$1,350,000 and has the following directors: Charles R. Wayland, Donald M. Gregory, Clifton R. Gordon, A. De Martini and Winfield Dorn, all of San Francisco, except the first, a resident of Palo Alto.

The suit of Charles J. Casper to annul the contract entered into by Los Angeles city council with Architects Curlett & Beelman to prepare plans for the \$5,000,000 city hall was taken under advisement by Judge Shaw in the superior court. Casper claims the right to make such a contract is vested only in the board of public works and that the contract does not comply with the ordinance of intention.

Thirty thousand trees, which will afford shade for more than 300 miles of California highways, have been planted under state supervision during the last four years. W. E. Glendenning highway tree expert, stated in his biennial report to State Forester, M. B. Pratt. The cost of caring for the trees approximates \$60,000 per year.

Frank Carroll and Dan Searle of Santa Cruz have opened a new electrical store at 354 Pacific Avenue, Santa Cruz. Carroll was formerly with the Blide Electric Company and Searle with the Cox Electric Company, both of Santa Cruz.

A bond issue for \$10,000,000 to finance construction of boulevards and city park improvements is proposed by the San Francisco Board of Park Commissioners.

Henry H. Kruger, plumbing and heating contractor, formerly of Omaha, Nebraska, has opened shop and offices at 242 Main street, Redwood City.

The Southern Pacific Company has been ordered by the State Railroad Commission to cease on or before July 30, 1935, from collecting rates on lumber and lumber products from Susanville to Lasco and Facht, and from Westwood to Susanville, Leavitt and Litchfield insofar as they exceed the following rates per 100 pounds minimum carload rate 30,000 pounds: from Susanville to Lasco, 7 cents; Susanville to Facht, 8 cents; Westwood to Susanville, 9 cents; Westwood to Leavitt, 11 cents; Westwood to Litchfield, 13 cents. This decision was rendered by the Commission following hearings on complaint of Lassen Lumber and Box Company and Red River Lumber Company versus Southern Pacific Company.

Organization of a school of engineering with Professor Theodore J. Hoover, brother of Herbert Hoover, as dean, is announced by Dr. Ray Lyman Wilbur, president of Stanford University. The school will begin functioning at the beginning of the college year in October. The school provides for a six-year course. Professor Hoover was graduated from Stanford in 1901 and after a career of 18 years as a mining engineer returned to the university as head of the department of mining and metallurgy.

Leon Kuttner, George Bowles, Leon Morris and Matthew O'Brien, San Francisco architect, comprise interests which plans to expend between \$2,500,000 and \$5,000,000 in the construction of a race track and casino resort just across the Mexican-United States boundary. It is proposed to lay out grounds and buildings having a frontage of 1-mile along the Pacific Coast.

George F. Wakefield, civil engineer and for twenty-five years head of the Santa Clara County Humane Society, died at his home in San Jose, June 9, following a brief illness. Wakefield was city superintendent of parks of San Jose in 1915 and under his administration many important improvements in the municipal parks system were put into effect.

The Federal Refrigerator Company has let a contract for a six-story reinforced concrete plant in the Central Manufacturing District, Los Angeles. The structure will cover an area of 200 by 200 feet and will cost in the neighborhood of \$1,000,000.

The Gaffigan Sheet Metal Works is now occupying its enlarged plant at Ninth and Railroad Ave., San Mateo. The plant has a floor space of 5000 square feet and is declared to be the largest sheet metal plant between San Francisco and San Jose.

Twelve prisoners have been transferred from San Quentin Prison to the convict road camp at Briceburg, Mariposa county, where they will be employed in road construction.

Plant of the San Joaquin Box Factory at Fresno, suffered a \$40,000 fire loss June 16. About 40 carloads of box shook material were destroyed.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

DIRECTORS ARE ELECTED BY CONTRA COSTA EXCHANGE

Out of twenty-six nominees, seven directors were elected June 19 by the Contra Costa County Builders' Exchange, to guide that organization during the coming year. The new board of directors is composed of E. H. Higgins, A. P. Hill, Roy Eakle, James Walker, John I. Collins, Geo. P. Ingram and W. Snelgrove. A tally of the ballots showed a tie between W. Snelgrove, E. B. Bull and E. A. Marshall, but on a re-balling Snelgrove won out.

At a separate meeting of the newly elected directors, officers for the fifth year of the Builders' Exchange were chosen as follows: E. H. Higgins, president; George P. Ingram, first vice-president; A. P. Hill, second vice-president; James Walker, treasurer; John I. Collins, secretary of the board. L. C. Dexter was re-appointed as executive secretary of the exchange for the ensuing year. The various standing committee of the exchange will be appointed by the new president during the next week.

SHEET METAL MEN ELECT

The following directors have been elected by the San Francisco Sheet Metal Contractors' Association to serve for the ensuing year: J. A. Korell, Geo. A. Wieland, A. F. Forderer, John J. Delucchi, J. McCaron, T. Guilfooy and C. Morrison.

Officers of the association are: J. A. Korell, president; Geo. A. Wieland, vice president; A. F. Forderer, treasurer. Edmund Grundy is secretary of the association.

APPRENTICES IN NEW YORK

The Apprentice Commission of the New York Building Congress reports that there are 2240 apprentices enrolled in the building trade schools of that city at the present time, representing seven of the building trades. Negotiations are now under way for the inclusion during the coming year of several other trades.

PLUMBERS AND CEMENT MEN TO PICNIC

The Master Plumbers Association of Alameda County in conjunction with the Associations of the Cement Contractors and Brick Contractors of Alameda County, will picnic, Sunday, July 12, at Oak Springs. A lengthy program of amusements will be provided. Bob Torr is in charge of the committee of arrangements.

FAVOR SCHOOL BONDS

Taken on a straw ballot, members of the Fresno Engineers' Club in regular weekly luncheon meeting, endorsed the proposal to issue school bonds to finance erection of additional schools and improvements to the present structures in Fresno. The vote was 17 in favor and 4 against the bonds.

Master Painters Enjoy Radio Program of Bass-Hueter Company

Last Wednesday evening, the Master Painters Association changed their regular business session to two hours of entertainment, furnished by the Bass-Hueter Paint Company.

The Bass-Hueter Paint Company has been broadcasting radio programs over KPO for some months and the program had as its background radio broadcasting.

A complete radio outfit had been installed by the Offenbach Electric Company under the supervision of Mr. Russell and short talks were received over the radio from the Hon. John J. Davis, Secretary of Labor, H. W. Rubens, President of the International Association of Master Painters, and Arthur M. East, manager of the "Save the Surface and You Save All" Campaign; also, from C. J. Fenimore, Past President of the International Association of Master Painters. While Mr. Fenimore's talk was exceedingly brief the greetings which he sent to the San Francisco Master Painters were very much appreciated.

After the talks the latest development in photographic transmission and reception were explained and a demonstration given showing the reception of pictures which had been transmitted by wireless.

About this time something went

wrong and a picture of Byron Gurnette was shown for that of the Secretary of Labor, while an excellent likeness of L. J. Neil was given as that of Arthur M. East, the man who is directly responsible for the Partial Payment Plan for Painting Residential property.

Following this was an interesting and entertaining program, introduced by the Osta Trio. Their numbers were particularly well received, especially the dancing by Teresta Osta and the piano solos by her brother.

Madam Monotti won her audience as the repeated calls for encores showed.

The Columbia Park Boys furnished an excellent exhibition of boxing and tumbling. Their best number, however, was the group of solos by Billy McGraw. Although only seven years old, Billy has a wonderful voice and should have a future before him.

Guy Kibbee kept the crowd in an uproar during his talk with his inimitable stories and the solos by Ed Draper, who is a member of the Bass-Hueter organization, were well received.

After the entertainment, President Gurnette, in a few well chosen remarks, voiced the appreciation of the Master Painters Association for the exceptionally pleasant evening.

Lumbermen Resent Selling Methods

The lumber industry has no quarrel with competitive materials. The industry holds, however, that they sell on their own merits, and that in this regard all of us are so vitally interested, that fairness and consideration in marketing of the building material in

relation with competitive materials. They should be sold, as lumber is sold, on the great field of construction in which here should be continued the tradition which has been conspicuous in the industries.—Editor.

(Special Correspondence)

WASHINGTON, D. C.—Encouraging reforestation by advising the public to stop using forest products is the anomalous proposal now being advanced by sales representatives of a well established building material marketed in nation-wide competition with lumber. The lumber industry deprecates this departure from frank and constructive merchandising practice so long observed in the construction materials field.

"Such solicitude for our forest resources lacks sincerity when it is manifestly a disguise for selling brick," says Wilson Compton, Secretary and Manager of the National Lumber Manufacturers Association. "No lumber famine is imminent. Nor may

forests be wisely conserved from refraining from using them. Lumbermen may not be expected to view complacently such specious presentation of the forest problem. Our forest wealth must be kept useful if it is to be propagated profitably. In order to be useful it must be used. Curtailing lumber markets will not encourage reforestation. Under a system of scientific utilization and replacement, now well recognized among far-seeing lumber manufacturers, there will continue to be abundant forest products for every reasonable need. Lumber is sold upon its merits and so continues to be the home builder's favorite material. Other building materials should be marketed the same way.

STATE PLUMBERS ELECT

The California Master Plumbers' Association, in annual convention at Portland, Ore., elected the following officers to serve for the ensuing year:

Charles M. Swinnerton of Los Angeles succeeding Harry G. Newman of Oakland as president; William Goss, San Francisco, vice president; Charles R. Hutton, Los Angeles, treasurer; John L. E. Firmin, San Francisco secretary, and Vincent Gurcio, Los Angeles, honorary assistant secretary.

The following executive board was named: Fred High, Fresno; George E. Richardson, Pasadena; Ralph Francis, Sacramento, and H. G. Newman, Oakland.

LUMBER CLUB ORGANIZED

The Portland, Oregon, Hoo-Hoo Club has been organized in Portland with a membership of fifty lumbermen. Chas. Miller is president; Wilson Clark and Chas. Linder, vice-presidents; W. B. Mack, secretary-treasurer.

BUILDING A CITY

In the past, cities, like Topsy, "just grewed." Some "grewed" faster than others but in much the same way.

"But there is a new era beginning," says John Ihlder, Manager of the Civic Development Department of the Chamber of Commerce of the United States, in a report on "City Planning and Zoning."

"As the trained athlete who uses his brains as well as his muscles often beats a stupid man who is physically superior," he says, "so cities which utilize their advantages to the full and reduce their disadvantages to a minimum will win over competitors. Economy of effort counts in gaining a lead and in staying power. And economy of effort is due to use of brains. Our most progressive cities realize this and one way in which they apply their realization is by so planning their development that no natural advantage will be neglected, that handicaps imposed by nature or by their own mistakes in the past will be overcome or even turned into advantages, and that there will be a minimum of wasted time and effort in the daily movement of population. When no city had a plan all were equally wasteful of their resources. If a few cities get good plans they will outstrip their rivals because for the same money and effort they will secure greater results."

POLLOCKS BUY ANOTHER MILL AND HOLDINGS

C. E. and H. R. Pollock, operators of a sawmill and lumber camps near Sportsman's Hall, El Dorado county, have just consummated a deal whereby the Pollock Lumber Company has acquired 3000 acres of timber land adjoining its other holdings. No definite plans have as yet been formulated for operating in this big body of virgin timber, making a total of approximately 10,000 acres held by the company.

The Pollocks, with an associate in Sacramento, have acquired the A. F. Baumhoff mill, located twelve miles above Placerville, near the Lincoln Highway.

The present plans are to put the Baumhoff mill in prime order, ready to operate when lumber markets warrant a resumption of operations.

STATE EXAMINATIONS

The California Civil Service Commission, Forum Building, Sacramento, announces examinations will be held shortly for supervisory positions in harbor construction, repair and maintenance, the positions paying \$250 a month. Receipt of applications closes June 27.

Examinations for Senior Architectural Draftsman in the Bureau of Architecture, State Department of Public Works, will also be held in the near future. This position pays from \$235 to \$250 a month. Receipt of applications for this examination closes June 20.

Further particulars may be had by addressing the commission at Sacramento.

MOVIE PLANT PROPOSED

Fiscal agents of R. S. Palmer, motion picture promoter of Los Angeles, announces that construction will be started shortly on a \$150,000 motion picture studio at Atascadero, San Luis obispo county, in the near future. Los Angeles and Atascadero financial interests will finance the project.

\$34,000,000 Available For State Highway Construction

After careful analysis of the accounts of the Department, and a reasonable estimate of funds from Gas and Motor license fees, W. F. Mixon, Secretary of the California Highway Commission, has issued the following as an authentic statement of the financial probabilities for the coming two year period:

In outlining its construction program for the fiscal years, July 1, 1925 to June 30, 1927, covering the 77th and 78th fiscal years, the California Highway Commission lays particular stress upon that provision of law made effective by Assembly Bill 589, which was signed by Governor Richardson, and which requires maintenance of all traversable roads now in the system on which no work has been done. Approximately 1240 miles of highway are effected by this new law.

Thus, for a reasonable expenditure from the maintenance fund, which is raised by the two cent gas tax, these roads will be well improved and, in many cases in a few years, be built to satisfactory standards, and during this process will afford easy and comfortable accommodation to the traveling public. With this mileage removed from consideration for new construction, the funds available for such construction will be concentrated on the more important portions of main line and interstate connecting roads, affording relief from the demands for construction on the less important roads.

The new law is wise and equitable and should have the endorsement of all who are interested in the proper development of the highway system.

The Commission expects to carry on a progressive plan of reconstruction and maintenance during the biennium. With approximately \$11,000,000 a year for these purposes, a well developed program can and will be carried out. Of this sum available for reconstruction and maintenance, approximately \$7,500,000 will come from the two cent gas tax and \$3,500,000 from the motor vehicle license fees.

The Engineering Department is prepared to take up the various projects over the State where the reconstruction needs are most pressing, and from time to time contracts will be awarded and the work pushed to completion. Motorists will recall many evidences of the reconstruction program in evidence over the State, and will no doubt, recognize the improved condition of the maintained roads.

For new construction the Highway Commission will also have a tidy sum to spend during the biennium. Cash on hand July 1 of this year will approximate \$2,300,000, previous Federal Aid allotments yet uncollected stand at \$4,200,000, additional on new Federal Aid become available on July 1 of this year in the sum of approximately \$4,200,000, a total of \$11,400,000 to be available for new construction. New construction contracts are already in force in the sum of \$3,200,000, leaving

\$8,200,000 available for further new construction up to June 30, 1927.

With the provision of Assembly Bill 589, relative to maintenance, carried into effect, the possibility exists of concentrating this sum of money on the primary roads and a real program of new construction is not only possible but assured during the biennium.

An analysis of funds for the two fiscal years, or up to July 1, 1927, for construction, as well as reconstruction and maintenance, from all sources, is taken in detail from the accounting records of the Commission and show as follows:

For New Construction

Cash on hand.....	\$2,300,000
Federal Aid now available....	4,200,000
Additional Federal Aid available July 1, 1925	4,900,000
Total	\$11,400,000

The sum total of new contracts now in force is enumerated above.

Gas Tax Assets

It is necessary, in estimating the receipt of gas and motor vehicle funds, to project into the future. No person can absolutely determine the amount which will be collected, but the experts in the Engineering Department of the Commission have gone very carefully into the matter and the Commission believes that from the data at hand there will be for expenditure the sum set out below.

2c gas tax due in Nov., 1925. \$	4,000,000
Gas tax for the year 1926....	7,800,000
May 1 payments for 1927....	3,674,000
Total of	\$15,474,000

There will be cash on hand as of July 1, 1925, \$2,300,000. Good business dictates that this cash balance should also be a reserve balance as of July 1, 1926 and of July 1, 1927, and on from time to time during the biennium periods.

The real amount, therefore, for reconstruction and maintenance from this particular fund would be \$15,474,000.

Motor Vehicle License Fees

Computations made as carefully as is possible indicate that there will be collected from this source

For the year 1925.....	\$3,450,000
for 1926	3,750,000
Total	\$7,200,000

which also becomes available for reconstruction and maintenance. This sum, in addition to \$15,474,000, results in a grand total of \$22,674,000 for reconstruction and maintenance during the biennium period. Of this approximately \$6,000,000 is now under work orders for maintenance and other expenditures during the year 1925.

The totals quoted above show that for all purposes of highway work there will be a total of \$34,070,000 available during the 77th and 78th fiscal years, of which sum there is now under contract and work orders \$9,225,000.

From these figures it is apparent that these will be available for highway work of all kinds \$24,845,000 in addition to sums allocated to work now authorized.

ENGINEERING SOCIETY FORMED

The Russian Engineering Society of Los Angeles has been incorporated with the following as directors: V. L. Malcev, E. E. Kovalevich, G. S. Stakevitch, S. C. Plottinghoff and K. A. Leonovitch, all of Los Angeles; no capital stock.

ENGINEER APPOINTED

C. E. Grunsky, San Francisco engineer, has been appointed a consultant engineer on the staff of the East Bay Public Utility District, which will bring water in the East Bay District from the Mokelumne river.

Thin Lumber Not Standard— Warning Issued Against Its Use

Standardization of lumber sizes and grades is above everything, a quality guarantee for the house builder as well as for the general lumber user. After more than two years of exhaustive study by experts in government offices and laboratories as well as engineers employed by the great commercial lumber manufacturers, American Lumber Standards have been adopted by makers of lumber and officially endorsed by the Departments of Commerce and Agriculture. All this has been done to improve the product and insure uniformity of grades, sizes and quality, so that those who buy and use the material may be sure of getting satisfactory service.

Having provided American Standard lumber that meets every requirement, it is now squarely up to lumber users to take full advantage of this great industrial achievement. Unless consumers of the product demand and secure lumber made upon standard specifications, now sold almost everywhere, lumber satisfaction cannot be guaranteed by manufacturers. The Central Committee on Lumber Standards, created under Hoover's supervision, is now engaged in impressing upon the lumber-buying public the necessity of cooperation in putting lumber standardization into universal practice. Unfortunately, there are still some lumber manufacturers who insist upon sub-standard material, that is, lumber that is thinner than good service de-

mands. Lumber thinner than Standard specifications contains less material, and, weighing less, saves in freight. Consequently, sub-standard lumber can be sold in some places at a lower price than Standard lumber. This is especially true of certain grades of Western shiplap. Some of this siding is only 11/16th of an inch thick, whereas Standard specifications call for 25/32d, dry and dressed. Apparently the dealer and customer look only at the price and do not weigh the advantages of efficient utility; consequently, this thin shiplap is sold for sheathing purposes in some markets almost to the exclusion of American Standard shiplap in other species.

The American Lumber Standards definitely fix the finished thickness of one inch dry shiplapped common lumber at 25/32d of an inch. This thickness was established as the maximum size obtainable, under average conditions of good manufacture, from one inch rough green lumber, and at the same time serve efficiently the requirements of those uses, such as wall and roof sheathing and concrete form material, to which purposes the majority of such lumber is put. Therefore, the manufacture and sale of 11/16th inch shiplap is wholly in violation of American Lumber Standards, and such material can not be expected to meet satisfactorily the requirements of use, thus making it uneconomical to the consumer in the long run.

FIVE-DAY WEEKERS

(By Thos. A. Edison)

"I am not against the eight-hour day, or any other thing that protects labor from exploitation at the hands of ruthless employers, but it makes me sad to see young Americans shackle their ambitions by blindly conforming with rules which force the industrious man to keep in step with the shirker," said Thomas A. Edison, who recently celebrated his seventy-third birthday.

"I have always felt that one of the principal reasons for American progress in the past has been that every man has a chance to become whatever he wanted to be. It used to be fashionable to be ambitious. The employee planned to become an employer; the unskilled man sought to become skilled. A young man was not well thought of if he were not striving for a higher place in life.

"Today I am wondering what would have happened to me by now if fifty years ago some fluent talker had converted me to the theory of the eight-hour day and convinced me that it was not fair to my fellow-workers to put forth my best efforts in my work. I am glad that the eight-hour day had not been invented when I was a young man. If my life had been made up of eight-hour days I do not believe I could have accomplished a great deal. This country would not amount to as much as it does if the young men of fifty years ago had been afraid that they might earn more than they were paid. There ought to be some labor leader strong and wise enough to make trade unions a means of fitting members for better jobs and greater responsibilities."—California Constructor.

Public Works Declared an Impractical Cure For Depression

(Reprint from Engineering and Contracting)

It has become popular during the past five years to advocate curtailment of public works during "good times" and to increase it during "bad times." The argument is, that this will aid materially in mitigating the ill effects of business cycles. The fallacy of this argument is easily demonstrable we think.

Dr. Benjamin Anderson, economist of the Chase National Bank, says that expenditures for public works average \$900,000,000 annually, but that if they were reduced to \$600,000,000 for four years of "good times" there would be available \$1,200,000,000 extra to spend in one year of bad times. He says: "Such expenditure, directed through the usual channels of trade and stimulating related trades, would make a very substantial difference in the volume of employment." But he fails to prove that it would. An extra billion and a quarter dollars spent in a single year sounds impressive. Is it really as impressive as it sounds?

The total annual income of the American people is about seventy billion dollars, hence an added billion and a quarter is only 1 1/2 per cent of total. When thus viewed, the extra expenditure that Dr. Anderson proposes is seen to be without any real efficacy. Moreover, he overlooks the fact that periods of depression usually last more than a year, and that periods of intervening good times usually are shorter than four years.

To men who are very familiar with the executive problems of construction, Dr. Anderson's proposal to spend three times as much money for construction in a "bad year" as in the average "good year" is impractical.

The doctor fails to consider that this would require the use of nearly three times as much construction equipment and materials in one year out of five as in the other four years. Who is to pay the fixed charges on the idle plant during the four "good years"? And what would those fixed charges total? The doctor evidently seems to think that construction work is almost all purely manual labor. But if he will familiarize himself a little with it he may be surprised to find that it has become closely analogous to manufacturing, and that only a very small part of the work is done with picks, shovels and other primitive tools.

This leads to another difficulty. It takes trained workers and trained foremen to perform construction work at all efficiently. Where would such men be secured in the one "bad year" to handle three times the normal amount of construction?

Finally, there is the question of raising the money for the big "bad year." It is noteworthy that during every serious depression in the past, the taxpayers have been prone to vote against increased appropriations for public works. In fact, they have urged curtailment of public expenditures. When factories are on part time, or no time at all, when incomes are declining, experience shows that the public is in no mood to tax itself heavily for public works. This alone would kill the plan that Dr. Anderson and other political economists have been advocating, were it not that its death knell is sounded the instant that its insignificant effect upon general employment is made evident.

UNFILLED STEEL ORDERS

Unfilled orders of the United States Steel Corporation for May amounted to 4,049,800 tons, a decrease of 395,768 tons from the total of forward business announced April 30. This is the third consecutive month that unfilled orders have registered a decline.

The reduction brings the total unfilled tonnage of the corporation to the lowest point since last November, when orders amounted to 4,031,969 tons. The decrease exceeded Wall Street's estimates, which ranged between 250,000 and 350,000 tons, but was lower than the April reduction of 461,996 tons.

With current trade reports indicating an increase in operations of the Steel Corporation's subsidiaries to 69 per cent of capacity, as compared with 67 per cent a fortnight ago, and a moderate gain in the volume of new business, the company is expected to make a better showing in its June report.

The May total is a gain of 421,711 tons over the figures of May last year when the unfilled orders amounted to 3,628,089.

TO ELECTRIFY STEEL MILL

One of the most radical changes—overs from steam to electric drive in the history of the steel industry is to be made by the Colorado Fuel & Iron Co. at its Minnequa Works, Pueblo, Colo. This plant is the largest steel mill in the West. The mills are at present engine-driven, using low pressure steam obtained from a hand-fired boiler plant. This plant will be superseded by a complete new power house, using powdered fuel and waste gas fired boilers, furnished by the General Electric Company.

IF YOU believe.
IN "SIGNS."
YOU WILL read the sign.
BELOW THIS KCB type.
AND IF you want one.
OF THESE auto "guides."
IN THE form.
OF A windshield sticker.
AND WANT.
TO DECORATE your windshield.
LIKE SOME.
OF THE "sticker" fans.
WHO RIDE in Fords.
AND AUTOMOBILES.
ON VACATION trips.
JUST PHONE or write.
TO SANDY Pratt.

AT HIS sand producing plants.
AT MARYSVILLE, Sacramento.
AND PRATT CO (Monterey County).
OR SANDY'S crushed rock plant.
AT PRATT ROCK (near Folsom).
OR AT the central office.
AT 518 Hearst Building.
IN SAN Francisco.
PLEASE NOTICE "A. Rock, sheriff.
OF SAND County, California."
HIS SPEED buggy is terrible.
WHEN HE goes.
AFTER LAW breakers.
THE TRICYCLE burns "sand."
FROM THE sand plants.
OF SANDY Pratt, President.
OF THE Pratt Building Material Co.
DOUGLAS 300—"easy to remember."

If you want a windshield sticker for your car write or phone to Sandy Pratt at the addresses in the K. C. B. part of this story. Have you met "A. Rock, Sheriff of Sand County, California," and his tricycle speed wagon? Law breakers fear him. The above sign is at Prattco (Monterey County), two miles from Hotel Del Monte.

Official Proposals

NOTICE TO CONTRACTORS

(Banta-Carbena Irrigation District—Contract No. 10)

Sealed proposals addressed to the Board of Directors of the Banta-Carbena Irrigation District, Box Z, Tracy, California, and endorsed "Proposal for Excavation of Distribution System, Contract No. 10," will be received by said Board, at the District office, at Carbona, three miles south of Tracy, until 8 o'clock p. m. of the 11th day of July, 1926, and at that time and place, will be publicly opened and read.

All proposals must be made on blank forms to be obtained from the Secretary of the Board of Directors, W. Schlossman, Box Z, Tracy, or from the Chief Engineer, W. D. Harrington, Box 631, Tracy, California; must give the prices proposed both in writing and in figures, and must be signed by the bidder with his address.

Each bid is to be presented under sealed cover and shall be accompanied by cash or certified check, made payable to the President of the Board of Directors of the Banta-Carbena Irrigation District, Henry T. Ohm, for the amount of two thousand dollars (\$2,000), and no bid shall be considered unless such cash or certified check is enclosed therewith and also no bid will be considered unless in conformity with the specifications. Should the successful bidder to whom the contract is awarded, fail to execute the same, said cash or check shall be forfeited to and become the property of the District, all other cash and checks will be returned to the unsuccessful bidders, who submitted the same.

A Common-law bond will be required for the faithful performance of the contract, in a sum not less than fifty per cent (50%) of the estimated amount of the contract, and a further bond in the sum of fifty per cent (50%) of the estimated amount of the contract must be furnished with acceptable sureties, to secure payment of laborers and materialmen.

The contractor to whom the contract may be awarded, will be required to appear at the office of the District, with sureties offered by him and execute the contract, within ten (10) days (not including Sundays) from the date of the notification of such award and the preparation and readiness for signature of the contract, and in case of failure or neglect so to do, he will be considered as having abandoned it, and said forfeiture of cash or certified check will operate.

All bids are to be compared on the basis of the Engineer's estimate of the quantities of work to be done as follows:

ITEM No. 1. 80,000 cubic yards excavation.

ITEM No. 2. Installing 610 Redwood timber checks and drops and furnishing 300 timber turnouts and furnishing materials for same.

ITEM No. 4. Extra work. Cost, plus 5%.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids and the Board of Directors of the Banta-Carbena Irrigation District does not expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any claim or portion of work as may be deemed necessary or expedient by the said Board of Directors.

The work to be done in accordance with the plans and specifications which may be seen at the office of the Secretary, at Carbona, or at the office of W. D. Harrington, Chief Engineer, Tracy, California, where copies may be purchased for the sum of seven dollars and fifty cents.

A call for bids published in this section indicates that bids are desired from other than those bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rates 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

The right is reserved to accept the proposal of the lowest responsible bidder or to reject any or all bids.

By Order of the Board of Directors of the Banta-Carbena Irrigation District, made this 17th day of June, 1926.
W. SCHLOSSMAN, Secretary of the Board of Directors of the Banta-Carbena Irrigation District.

NOTICE TO CONTRACTORS

(Highlands Hospital, Alameda County)

Office of the Clerk of the Board of Supervisors, Alameda County, Calif.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County at his office until Monday, July 20, 1926, at 10:30 o'clock A. M. (the day when said bids will be opened and the contract awarded) for the erection and completion of miscellaneous equipment consisting of steel instrument cases, steel lockers, utensil racks and refrigerators, and for sterilizing equipment for use at the Highland Hospital of Alameda County, situated at 14th Avenue and Vallecito Place, Oakland, Alameda County, Calif.

The above specified equipment is divided into the following departments: Department No. 21 (miscellaneous equipment), Department No. 22 (sterilizing equipment, etc.).

Complete plans and specification for each of the above specified departments are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by depositing with the County Clerk the sum of Twenty-five (\$25.00) dollars for each department. Contractors will be restricted as to the length of time these plans and specifications may be retained to two (2) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent (10%) of the total amount of the bid or proposal, certified to by some responsible bank or made payable to Geo. E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda as agreed and liquidated

damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board of Supervisors reserves the right to reject any and all bids.

Dated: June 22nd, 1926.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO BIDDERS

(Merced Irrigation District)

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors of Merced Irrigation District, in the Barcroft Building, Merced, California, until 10 A. M. on Tuesday, July 23, 1926, for the furnishing of certain equipment for the Spillway Gates of the Exchequer Dam and Power Plant of the Merced Irrigation District, consisting of the following materials:

14 Sets of Gate Operating Gearing, consisting of Cast Steel Gears and Racks with screw stems on cast steel bevel plate, and worm and bevel gear drive.

Specifications for said material can be seen at the office of said Board and copies thereof will be furnished upon application to the Secretary of said Board accompanied by a deposit of \$20.00 to be repaid to all bidders and to all others upon return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

Said Board will be in session at its office at 10 o'clock A. M. on Tuesday, July 28, 1926, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

Each proposal must be accompanied by a certified check for five (5) per cent of the amount of the bid, or of the bidder's highest bid in case alternative bids are submitted, said check to be payable to the order of the Merced Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, said bond to be approved by said Board.

The proposal forms bound with the specifications must be properly filled out by the bidder, and the plans and specifications, including the proposal, must be submitted intact with the bid in a sealed envelope addressed to the Board of Directors of the Merced Irrigation District, and marked to indicate that it is a proposal for Equipment for the Spillway Gates for the Exchequer Dam.

Done in pursuance of an order of the Board of Directors of the Merced Irrigation District, this 9th day of June, 1926.

H. P. SARGENT,
Secretary of the Board of Directors of the Merced Irrigation District.

All bids must be in the hands of the secretary by 5 P. M., July 9, 1925, bids to be opened at 8 P. M. in the Board of Education rooms, 2525 Tuolumne street, July 9, 1925.

The board reserves the right to reject any and all bids.

L. L. SMITH, Secretary.

NOTICE TO BIDDERS

(Electric Clocks—Fresno Board of Education)

Pursuant to an order of the Board of Education duly made and entered in its minutes the 18th day of June, 1925, the Board directs the Secretary to advertise for bids and receive bids on wiring, furnishing and installing ready for use, with one year free guarantee, electric clock system to include one Master Clock, 17 Auxiliary Clocks, two Yard Guns, this clock to be equipped with automatic program relays, all to be installed in a workmanlike manner, contractor to assume all responsibility for the proper working of this clock system. Also all charging apparatus to be furnished by the contractor.

Plans and specifications are on file with the secretary of the board, 2525 Tuolumne street.

A certified check in the amount of 10% of the bid must accompany each bid.

All bids must be in the hands of the secretary of the board by 5 P. M. July 9, 1925, said bids to be opened at 8 P. M. July 9, 1925, in the board rooms, 2525 Tuolumne street.

The board reserves the right to reject any and all bids.

L. L. SMITH, Secretary.

NOTICE TO CONTRACTORS

(Bakersfield Board of Education)

Notice is hereby given that sealed bids will be received by the Board of Education, Bakersfield, California, up to 8 P. M., of July 9, 1925, for the following:

1. For furnishing all materials and labor necessary for the erection and completion of additions and alterations to the Emerson, Jefferson, Williams and Lincoln School Buildings, in accordance with plans and specifications for same on file with the office of the Board of Education, City Hall, Bakersfield, and open for the inspection of bidders.

2. A price per square foot for concrete walks and for inlaid foot for curbing at the following schools as per specifications on file in the office of the Board of Education:

- Bryant.
- Emerson.
- Hawthorne.
- Jefferson.
- McKinley.
- W. N. Penn.

3. For a concrete pipe line in Arroyo Ditch on Dolores Street, between King Street and Beale Avenue, as per specifications on file with the Board of Education.

4. For furnishing labor and materials for painting, varnishing and repainting in several schools as per list of specifications on file in the Board of Education office.

5. One 6-inch motor driven jointer and planer mounted on column.

Copies of said plans and specifications for additions and alterations of school buildings may be had upon deposit of Ten Dollars (\$10.00) at the office of Charles H. Biggar, Architect, 65 Bank of Italy Building, Bakersfield, California, and the work will be done under direct supervision. Deposit will be returned upon receipt of plans and

specifications in good condition previous to the time bids are received.

Bids will be received for the work on each building separately, or segregated as shown on bid form furnished by Architect or Board of Education. Bids must be accompanied by a cashier's or certified check in the amount of at least ten per cent (10%) of the amount bid, such check to be made payable to the Board of Education, Bakersfield School District, and to be submitted as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board of Education, and in addition thereto, will furnish good and sufficient bonds therefor.

The Board reserves the right to reject any or all bids, and to waive any informality in any bid received.

By order of the Board of Education, Bakersfield School District, made June 15, 1925.

M. P. FLICKINGER, President.
W. F. WHITAKER, Secretary.

NOTICE TO CONTRACTORS (East Bay Municipal Utility District)

Sealed proposals will be received by the East Bay Municipal Utility District, at its office in the Hay Building, 1224 Broadway, Oakland, California, until 8 P. M., Monday, July 20, 1925, for all or part of the following construction work:—(1) A dam about 350 feet high, containing about 325,000 cubic yards of concrete, to impound the waters of the Mokelumne River at a point near Lancha Plana; (2) an aqueduct of tunnels and pipe lines about 90 miles in length; (3) a pumping plant; and (4) other auxiliaries. The work will be divided into eleven schedules, which may be bid on separately.

Plans and specifications for this work may be obtained from the office of the District, by depositing the sum of \$100 for an entire set, or \$10 for one separate schedule, as a guarantee of the return of same on the date upon which bids are opened. Bids will be received on alternative plans for the whole or for separate schedules as said project, upon conditions set forth in the specifications. Each bid must be accompanied by a certified check of not less than 2% of the amount of the bid, or a surety bond of negotiable bonds in the same amount. The right is reserved to reject any and all bids.

JOHN H. KIMBALL,
Secretary.

Oakland, California, June 10, 1925.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

(Maintenance Shop—Fresno)

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, California, until two o'clock P. M., July 13, 1925, at which time they will be publicly opened and read for the construction, in accordance with plans and specifications therefor, of a Maintenance Shop Building and Truck Shed in the City and County of Fresno, California.

The Maintenance Shop Building will be a one-story steel and wood frame building with tile walls and concrete floor and foundation. Part of the space room, etc. The Truck Shed will have concrete floor and foundation and wood frame covered with corrugated iron. Plumbing and Electrical Work is included.

Cash, a bidder's bond, made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works,"

in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

Plans and specifications may be had upon application to the California Highway Commission, 515 Forum Building, Sacramento.

A deposit of Twenty-five (\$25.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of plans and specifications to the said Commission in good condition.

Bids must be on forms prepared by the Commission. Attention of bidders is called to "Instructions" on proposal form for full directions as to bidding.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.

R. M. MORTON,
State Highway Engineer.
W. R. MIXON, Secretary.

Dated: June 15, 1925.

(June 19-26, July 3-10)

STATE OF CALIFORNIA

NOTICE TO CONTRACTORS

CALIFORNIA HIGHWAY COMMISSION

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on July 6, 1925, at which time they will be publicly opened and read, for construction, in accordance with specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Diego to San Bernardino and one-half miles north of Combs, and two miles south of San Onofre, (VII-SD-2-C & D), about thirteen and one-tenth (13.1) miles in length; ten and eight-tenths (10.8) miles to be paved with Portland cement concrete and two and three-tenths (2.3) miles to be widened with Portland cement concrete shoulders.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineer at Los Angeles and San Francisco and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Williams, Redwood, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" on the reverse of the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.

R. M. MORTON,
State Highway Engineer.
W. R. MIXON, Secretary.

Dated June 8, 1925.

MONTEREY, Monterey Co., Cal.—Until July 7, 1:30 P. M., bids will be rec. by J. H. Graves, clerk, Monterey Union High School District, to fur. school bus for transportation of pupils; 4-cylinder; seating 26 to 30 passengers equipped with tires, etc. Further information obtainable from clerk.

RAILROADS

OREGON—Southern Pacific Co., 65 Market St., San Francisco, has filed application with Interstate Commerce Commission for permission to construct a r. r. from Klamath Falls, Oregon to Cornhill, California.

FIRE ALARM SYSTEMS

MONTEREY, Monterey Co., Cal.—Fire Chief W. E. Parker recommends installation of additional fire alarm boxes.

FIRE EQUIPMENT

MONTEREY, Monterey Co., Cal.—Fire Chief W. E. Parker recommends purchase of additional equipment, ladders, etc., to fight fires at great heights also the purchase of a 1000-gal. per min. pumping engine in addition to general overhauling of the present 750-gal. pump.

SEWAGE DISPOSAL PLANTS

VENTURA, Cal.—\$130,000 bond issue for sewage disposal works carried at recent election.

PORTERVILLE, Tulare Co., Cal.—H. A. Teget, Harvard Pl., Ontario, sub. low bid to city at \$43,330.60 and will be awarded cont. to const. sewage disposal plant. The unit prices are: (1) Inhoff tanks, \$27,575; (2) filters, \$3300 (3) sludge beds, \$250; (4) excav. approx. 18,070 cu. yds., at 38c yd.; (5) oil surf. at 33c sq. yd.; (6) 18-in. vit. sewer pipe at \$1.70 ft.; (7) 12-in. vit. sewer pipe at \$1.20 ft.; (8) m. h. at \$80 each; (9) outlet box at \$50. Other bids: Hartley Lamp Constr. Co., \$50,672.77; Frederickson & Watson, San Francisco \$58,376.25.

LOS GATOS, Santa Clara Co., Cal.—Initial steps toward organization of a sanitary district to serve approx. 200 sq. miles of territory have been taken by interests representing San Jose, College Park, Burbank, Campbell, Saratoga and Santa Clara. Efforts will be made to have Cupertino and Sunnyvale included. I. D. Mable of Los Gatos is a prime mover in the proposed project. It is proposed to provide metropolitan facilities for the disposal of sewage from the cities named.

SANTA CRUZ, Santa Cruz Co., Cal.—Engineers Chas. Gilman Hyde and Walter H. Hyde have submitted sewer projects to the city council ranging cost from \$275,000 to \$665,000 to solve city's sanitation problem. The engineers will probably recommend a \$500,000 bond issue to cover a project estimated to cost \$475,000, bids to be asked on two types of pipe, concrete and cast iron. Briefly, the engineers' report covers the following propositions:

Project No. 2 estimated the land would cost approximately \$175,000, and that the outfall would range from \$225,000 to \$400,000, according to the pipe used, either cast iron or concrete. The total cost was \$175,000, and it was figured the annual cost would be from \$27,000 to \$31,300, according to the type of construction.

Project No. 2 estimated the land works at \$180,000; the outfall from \$95,000 to \$140,000, with the totals ranging from \$275,000 to \$320,000.

Project No. 3 gave the cost of the land works at \$185,000, with the outfall ranging from \$280,000 to \$355,000, according to the type of construction. The totals were from \$465,000 to \$450,000, and the annual cost \$31,300 to \$35,200.

Project No. 4 estimated the land works at \$190,000, and the outfall from \$110,000 to \$165,000, and the totals from \$300,000 to \$355,000.

Projects 5, 6 and 7 ranged from \$445,000, \$500,000 and \$655,000, and all were projects for treatment of the sewage, rather than disposal and being more costly to operate were not considered advisable.

MISCELLANEOUS SUPPLIES

INGLEWOOD, Cal.—Chamber of Commerce backs movement to call election on \$500,000 bond issue for public improvements, incl. \$250,000 for streets and highways; \$100,000 for parks; and \$50,000 for drainage work.

WATER WORKS

SAN FRANCISCO—Board of Public Works has requested supervisors to appropriate \$18,500 to finance extensions of water mains in Beach and North Point streets.

OSWEGO, Ore.—Bonds of \$100,000 voted to finance construction of municipal water system. H. L. Gilbert, Portland, Ore., is consulting engineer on project.

SAN DIEGO, Cal.—City council has formally transferred \$400,000 Otay pipe line funds to water main extension fund. Work is to start at once as many paving jobs have been held up for water pipes.

REDWOOD CITY, San Mateo Co., Cal.—Bids will be asked at once by W. A. Price, city clerk, to fur. and install pump at city water works.

A Variety of Work on the Same Machine

In addition to business correspondence the modern
office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
ci cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

Typewriters Rented
